

## **SWOOP™ LOUNGE FURNITURE**

Designer Brian Kane created Swoop lounge furniture based on the needs he observed in public seating areas. He realized that people don't sit in traditional ways—they occupy their seating environment with a variety of postures. This led him to design a versatile and fluid lounge seating and table solution that supports the ways people sit and move.

Swoop offers a different kind of lounge seating construction. Its sweeping curves and modular components provide multiple configuration options for variety of spaces—large or small, individual or group. The result is a comfortable and inviting seating solution for areas where people learn, meet, and work.

Freestanding tables round out the collection and can function as desks or stools. The square box table is available with power access to accommodate technology needs.
