### Hot water supply required

Should be 70% of water capacity of tub or greater.

### Turbine access

Must be at least 18" X 22" to access the pump. Must be connected to a 15 A. 120 V, 60 Hz, protected by a ground-fault circuit interrupter (GFCI) on a dedicated line.

### Standards

All BainUltra products meet and/or exceed the highest quality and certification standards. For further details about BainUltra's product standards, please go to the following link: ([www.bainultra.com/standards](http://www.bainultra.com/standards)).

Our products must be installed by certified professionals only and according to our Owner's Manual as well as federal, provincial/state and local building codes and regulations ([www.bainultra.com/documentation](http://www.bainultra.com/documentation)).

1 800 463.2187 | From 8 a.m. to 8 p.m. Monday to Thursday (EST) . From 8 a.m. to 5 p.m. on Friday (EST)

The specifications shown indicate the outer edge dimension and the inside bathing capacity dimension measured at air jets' height. The manufacturer accepts a 1/4" [0.64 cm] variance. There are variations on each product and specifications are subject to change as we improve upon our product as required. The dimensions needed for site preparation and structure building will differ. BainUltra® assumes no responsibility for preparatory work done prior to the product being on site.
