

Partner

Alberto Meda, Paolo Rizzatto

A system made up of an extruded aluminium structure and shelves where the “transparent plastic”, available in various colours, is expertly combined with the punched aluminium slab. This way, the various materials best exploit their aesthetic and functional characteristics in a poetic, new and original creation. Partner comes in three different fixed modules to fit into different contexts: as a bookshelf for books and trinkets, for the living room or bedroom, as a bathroom or kitchen cabinet. The practical flat box packaging is a practical additional advantage. Two bookends are included for each shelf.

		width	height	depth	shelves distance	weight kg.
