

Environmentally friendly textiles by Brentano, Inc.

Green Story:

Environmental impact and sustainability specifications of Brentano Green fabrics

Product Name: **Imagine- 5164**

Contents: 100% Organic Cotton

Usage: Eco-fabric, Upholstery, Rapidly renewable, Biodegradable textile, LEED points possible

- 1) Organic cotton is a rapidly renewable resource.
- 2) Organic cotton textiles are biodegradable.
- 3) Organic cotton reduces the overall exposure to toxic chemicals from synthetic pesticides that pollute the ground, air, water, and food supply, and are associated with a range of health consequences.
- 4) Organic cotton offers an alternative to the problems related to conventional cotton, such as salinization (too much salt in soil), desertification (overexploitation of vegetations causing depletion of plant life), and poisoning of the environment and human health.
- 5) The growing, dyeing and spinning of organic cotton used for Daydream is GOTS compliant.

For more information, please visit the website: www.global-standard.org

- 6) **Imagine** is manufactured using 100% wind power.
