

ALDER KISS

The Alder Kiss is a play on the forms used in the Alder collection. By parting the square column through its midsection, we bring the heart of the material to light. Beautifully proportioned, it is an ideal pedestal for sculpture.

As a dining table, the Alder Kiss can easily support a 50" square or round glass top. Large rectangular tabletops can be accommodated by two or more bases.

Shown in alder with clear finish, supporting a 50" square glass top. It is recommended that you purchase your own glass for the Alder Kiss.
