Stash™

Stash is designed for mobile workers who appreciate a clutter free work environment. Compact outer dimensions make Stash the ideal companion to high density open plan environments while providing ample storage for essential worktools. The primary compartment holds any type of bag or CPU while the upper tray keeps personal items close at hand. A deliberately simple and durable design allows Stash to be used on a daily or hourly basis. In-line micro-casters allow Stash to be tucked away or easily accessed at any time. The two-tone finish complements all Watson products while accentuating the unique personality of Stash.

3 x 22 x 1½ upper tray holds personal items

9 x 22 x 18 compartment holds any type of bag or CPU

Folded steel panel holds contents in place

In-line micro-casters make stowing Stash easy

Stash blends perfectly with Tonic Benches configured for high-density environments, touchdown work styles and full CPU stations.
