Decorative Solutions for Architects, Designers, and Builders

Artists have turned to glass for its intrinsic beauty for centuries. Now, with AFG Patterned Glass, architects, designers and builders are offered the same freedom to create translucent works of art for a myriad of applications.

Frequently chosen for its decorative value alone, patterned glass has the unique capacity to separate space while sharing light. Whether it is "one of a kind" treatment for a foyer or doorway, or the central focus of a shower or tub enclosure, the smart alternative is our patterned glass.

Choose from a large variety - all with the unique ability to separate space while sharing light. AFG also has the capability to develop and produce new or custom patterns as required by our customers. Whether it is a classic look or a new, contemporary design, AFG offers a variety of glass to meet your needs.

Patterned Glass by AFG is available in varying degrees of obscurity or diffusion and different thicknesses.

Applications:

- Shower doors and tub enclosures
- Patio furniture
- Interior partitions
- Translucent door treatments
- Decorative furniture
- Palladium windows
- Lighting fixtures
- Foyers and vestibules
