Specifications

VENEER

Veneers on exposed surfaces are select grade sliced American Black Walnut and are carefully selected and matched to assure proper balance and consistency.

TOPS

Wood veneer tops are 5-ply balanced construction and high pressure laminate tops are 3-ply balanced construction. Tops are 1⅝" thick with solid hardwood rims. All buffets, credenzas, serving carts, video and storage/wardrobe cabinets are shaped on user side only. Grain direction runs left to right unless otherwise noted.

CHASSIS CONSTRUCTION

Tops and end panels are securely fastened using high quality European fastening systems to assure maximum strength. All units are equipped with heavy-duty adjustable glides to ensure proper leveling and compensation for uneven floors.

DRAWERS

All drawer fronts are standard with elegant vertically matched walnut veneer faces. Drawers feature 5-sided construction with ¾" 3-ply fronts, ⅞" thick hardwood sides and ⅝" hardboard bottoms. Units with 36" wide file drawers feature ¼" thick drawer bottoms for maximum storage strength. Drawer interiors are sanded, sealed, and finished to provide for a smooth, quality feel and appearance.

DRAWER SUSPENSION

File drawers and box drawers feature high quality, black progressive full extension slides with precision steel ball bearings to ensure a smooth, quiet operation. All suspensions have a lifetime warranty.

FILING HARDWARE

All file drawers are standard with custom fitted filing systems designed to accommodate a variety of filing requirements. Storage cabinet file drawers provide legal filing front to back, and legal or letter filing side to side.

LOCKING MECHANISM

Video and storage/wardrobe units with drawers feature locking. Removable lock cylinders allow for units to be re-keyed at a later date if required. Units are shipped randomly keyed.

FINISH

All exposed surfaces are protected by Ultra-Violet finish utilizing roll-coat technology. Our durable UV finish makes surfaces less likely to be damaged by abrasions, scratches, water, alcohol, stains and common chemicals. Our UV finish magnifies the beauty of our wood finishes and reduces the darkening, aging and yellowing process of wood furniture that naturally occurs over time. Once cured by UV lighting, our UV finish does not emit irritable toxins, formaldehyde, or solvents into the air creating safe work environments within new furniture installations.
