

Care of Sina Pearson Textiles Alhambra 401

No matter how soundly constructed an upholstery may be, it will not wear well if it is not cared for properly.

Please attend to spots immediately. Remove excess stain matter from surface of the fabric before cleaning. Use solvent or water based cleaning solution in a small, less conspicuous area before attending to entire furniture surface. Apply a gentle wiping motion. Do not use bleach based solutions exceeding 20% strength. Do not allow the bleach based solution to remain on the fabric for more than 30 seconds. Wipe bleach solution treated area afterward with a clean, damp cloth (no bleach). Regular vacuuming is recommended.
