(IMO MSC 88 Part 8, was IMO Resolution A.652)	

Infinitas® Leather Care System

Infinitas® Leather should be cleaned exclusively with Tiger Leather's specially designed Care Kit to insure deep-down, long-lasting protection. It is best to treat the leather at least twice a year using the original Care Kit.

- For Liquid spills, first dab off residual liquids. Treat major stains such as cream, shoe polish, grease, lipstick and water-soluble crayon, Ink immediately.
- Soak the sponge supplied with the Care Kit with the deep-acting cleaner.
- Only by pressing the sponge (do not rub) work up lather and allow it to soak into the stain for a few minutes. Then gently rub the stain in a circular motion without applying pressure.
- Dab off the treated area with a paper tissue or kitchen towel.
- Allow the area treated with cleaner to dry thoroughly for at least 30 minutes.
- After using cleaner; apply the Cream Conditioner gently and evenly in circular motion to rejuvenate surface protection. After approximately three hours the Cream Conditioner has penetrated deep into the leather restoring the leather, softened and easy-to-care character.
