

AL3
adjustments

AL3 simplifies design while maximizing functionality. An innovative three-pivot-point vertical mechanism and integrated controls revolutionize the look and performance of the office chair. Three easy adjustments provide a full range of ergonomic support, simplifying chair operation without compromising user comfort.

1.
SEAT HEIGHT
Adjustment range of 4.75 inches allows users to position seat height to suit individual body type and preferences.

2.
TILT LOCK (*not shown*)
The back tilt sets in upright, free-flow or a three-position tilt lock to provide appropriate and preferred support for multiple tasks.

3.
TILT TENSION
Sleek twist-grip tilt tension adjustment tailors the chair's tilt resistance to personal size, weight and preference.

4.
SYNCHRO-TILT MECHANISM
AL3 adapts synchronously to every movement of the body, providing optimum support during seating. Features a 3:1 tilt ratio—for every three degrees the back tilts, the seat tilts one degree for a total back tilt of 20 degrees.

AL3

PREMIUM DESIGN

Flawless in function and form, AL3™ elevates the executive chair to a new level of design and technology. The essence of AL3 is the synchronous mechanism concealed within the chair column. Discreetly hidden from view,

this patented, innovative concept provides the full range of ergonomic features. AL3 conveys both lightness and substance, featuring a sleek aluminum frame with soft organic contours.

The integration of technology, ergonomics and aesthetics makes AL3 an exceptional accomplishment in seating design.
