Designers

Kaiju Studios attempts to marry the rational and the emotive by creating meaningful products and experiences through poetic simplicity, creative thinking and elegance in function and form. By focusing on a way to creatively approach problems versus a mastery of solving a single problem, their designers work across traditional categories in a broad variety of disciplines, from products and furniture to graphics and interactive design.

Blink Mirrors

Designed by Kaiju Studios. The collection explores the mirror as canvas, playing with illusion and reality through dimension and light. Each mirror features a unique, contemporary design etched on the front surface that reflects back into the glass, bringing alive dimensional qualities that evolve with motion.
