ASSEMBLY REQUIRED**

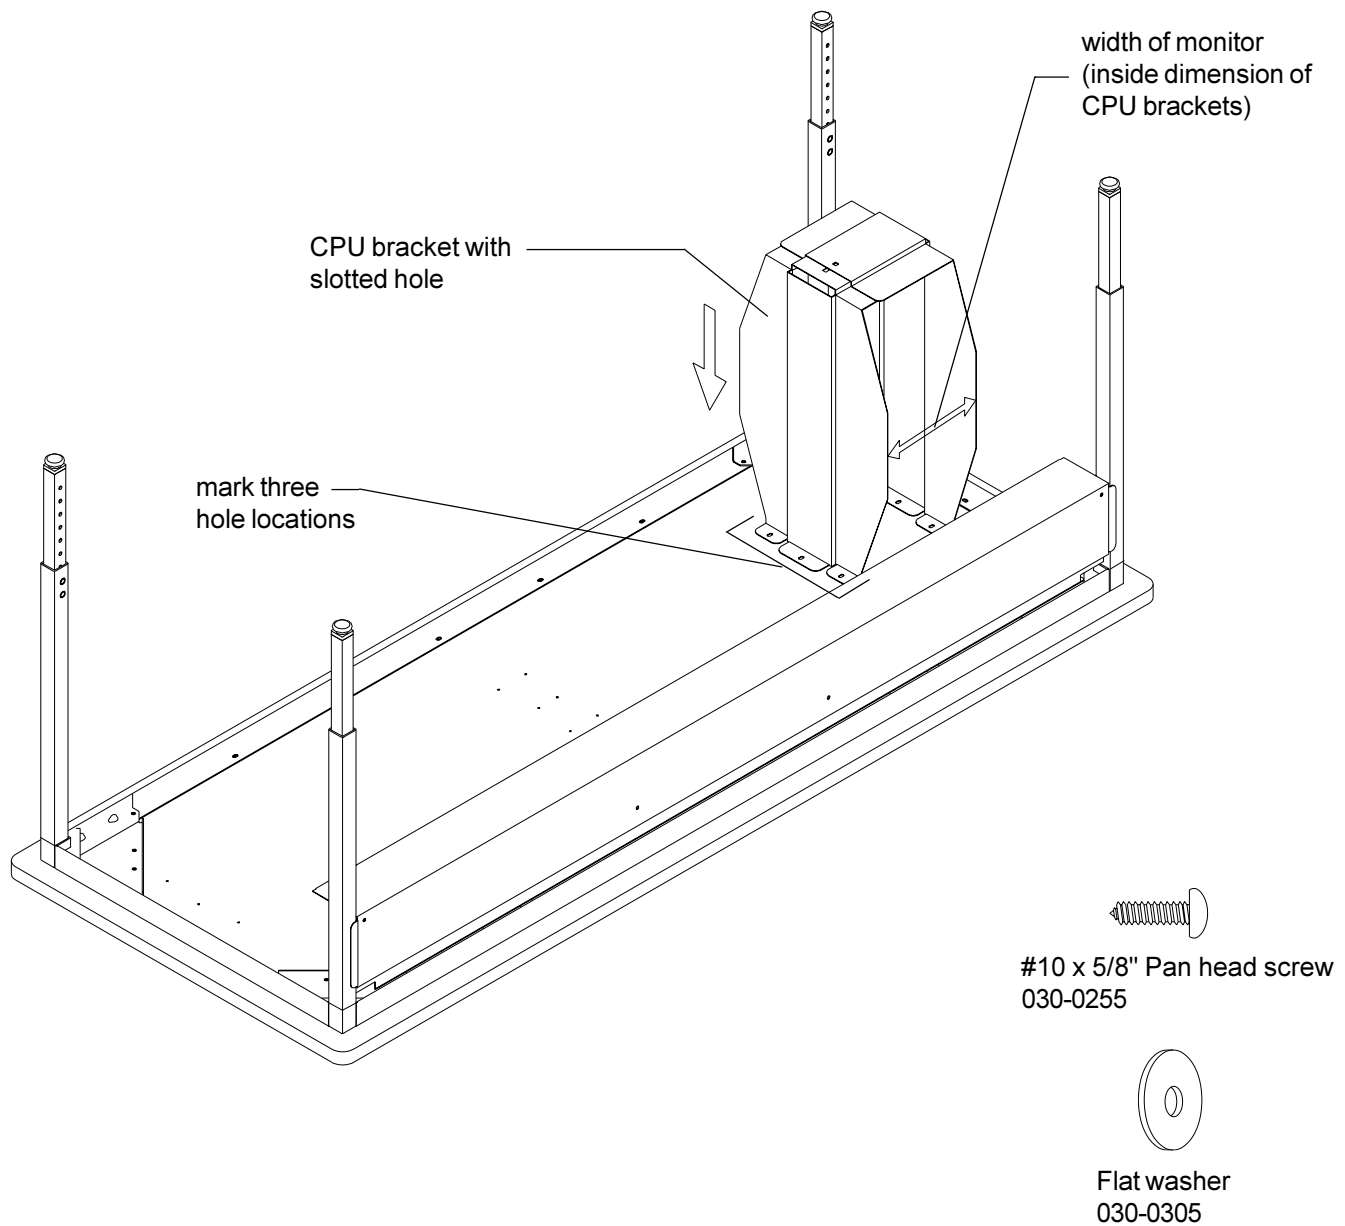

Step 1

Lay the table on a carpeted surface with legs facing up.

The table predrilled so the first CPU bracket can mount on the left, right or middle side of your table (depending on model).

Attach the CPU bracket with the square hole located on the bottom flange first. Install with flat washers (030-0305) and screws (030-0255) as shown.

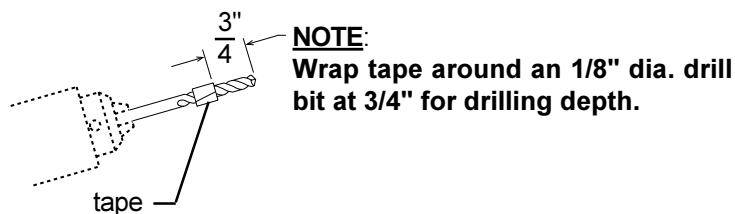

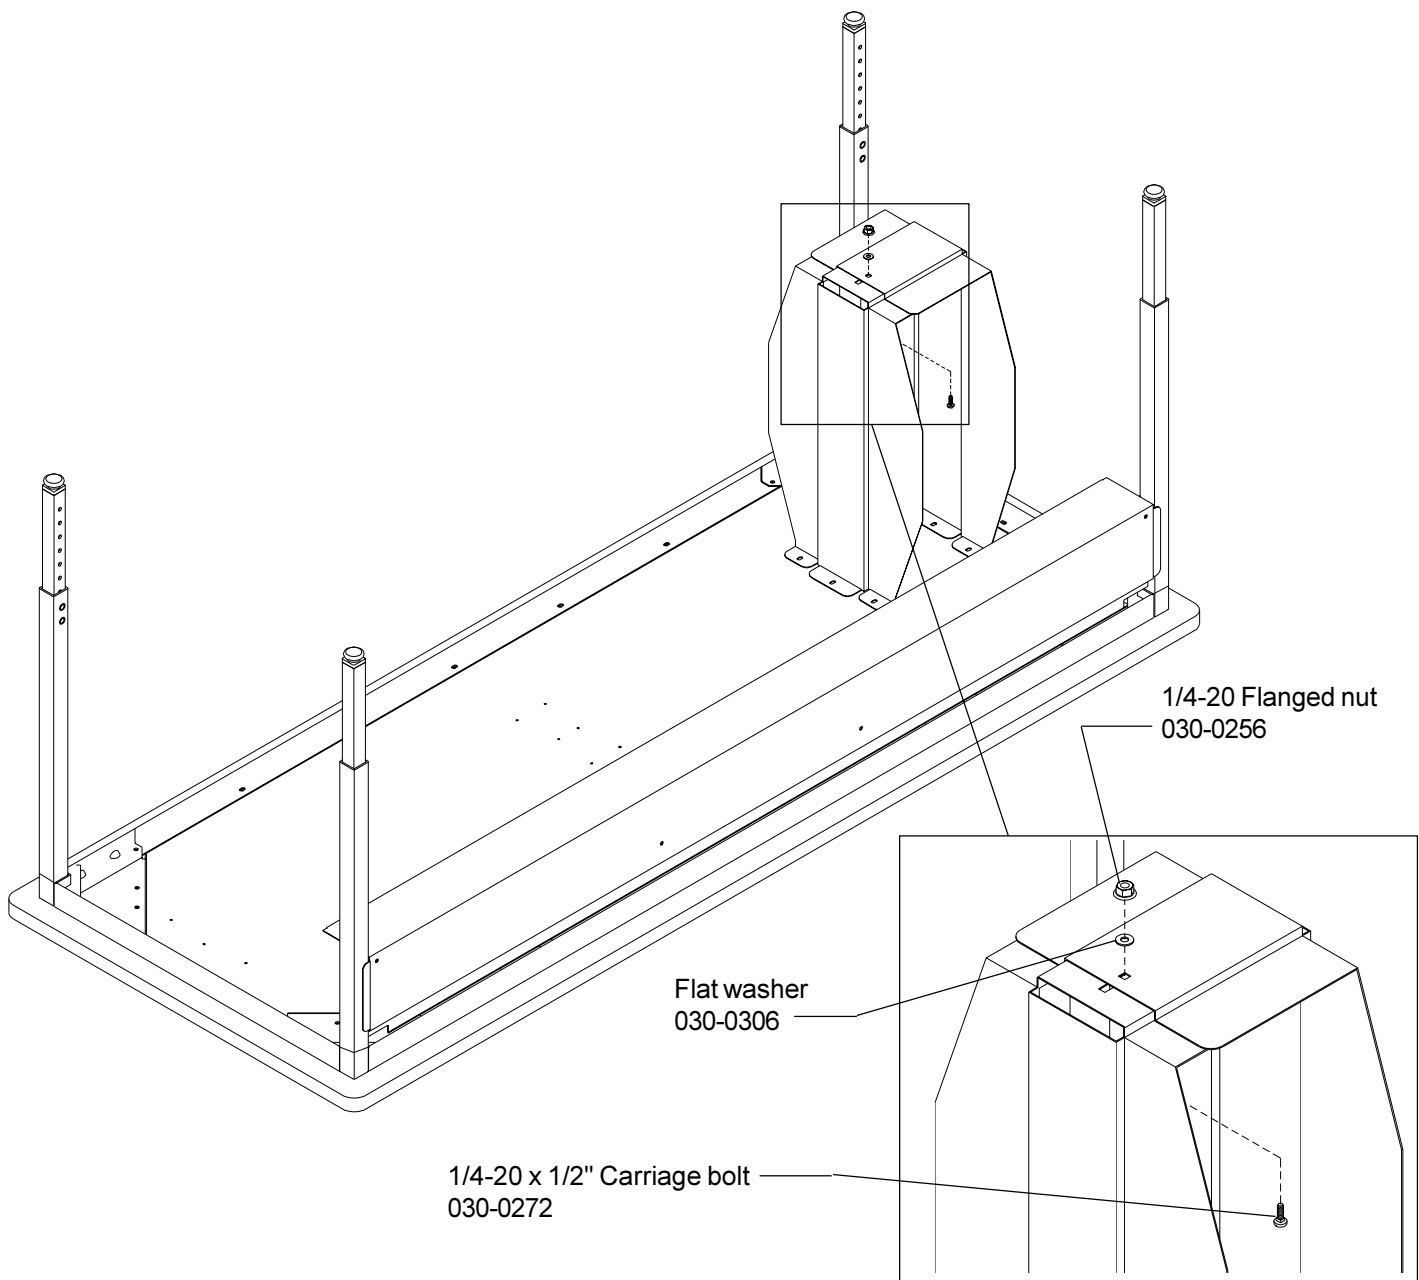

Step 2

Determine the overall width of your CPU. Place the other CPU bracket (with the slotted hole located at the bottom) over the mounted CPU bracket as shown. Adjust the space between the two brackets by sliding the bracket side to side to equal your CPU width.

MAKE SURE THAT THE BRACKETS ARE PARALLEL.

Using the CPU bracket as a template, mark the three hole locations for drilling pilot holes. Carefully drill an 1/8" dia. pilot holes 3/4" deep (see note above). Install the second bracket with flat washers (030-0305) and #10 x 5/8" Pan head screws (030-0255).

Step 3

Install 1/4-20 x 1/2" Carriage bolt (030-0272) to the inside flange with flat washer (030-0306) and 1/4-20 Flanged nut (030-0256) on the outside flange as shown.

Repeat steps 1,2, & 3 to install additional CPU holder.

Carefully turn over the table and place into position.
