Initiate a Better Work Environment

A

Why start building your work environment with Initiate? Because it's simple, smart and sustainable. It provides exceptional long-term value through durable construction, exacting fit and finish, and easy reconfiguration. And it offers several features that reduce its environmental impact.

B

THE SIMPLE STORY

Some room to spread out. Plenty of space to store your stuff. Just the right mix of privacy and collaboration. Does outfitting your office have to be complicated?

Initiate doesn't think so. Order an Initiate worksurface and the cantilever supports are included. Order overheads and they ship preassembled. Order a panel and it comes complete—no trim to specify or install. Panels even attach with a single universal connector that simplifies installation and reconfiguration.

c

SIMPLE SOLUTIONS

Fabric panels may not be the best choice for intense uses like manufacturing, healthcare, and high-traffic areas. That's why Initiate also offers hard-surface laminate panels that clean easy and hang tough.

SIMPLE CONNECTIONS

Initiate uses one universal connector for all right-angle configurations—L, T, or X—so you can change your layout fast without ordering additional parts.

SIMPLE CONSTRUCTION

Initiate panels have integral finished ends, so there are no trim pieces to specify, order, or install.

SIMPLE SEGMENTS

Initiate lets you specify up to three segments in a single panel. Result: The aesthetic versatility of a frame-and-tile system without the expense, extra parts, or complexity.

A SMART CHOICE

The longer you own Initiate, the better you understand what a smart choice it is. Metal frames and trim retain their integrity through years of reconfiguration. Metal-to-metal connections create a solid structure, keeping panels perfectly aligned. Components fit together tightly without gaps, and finishes match precisely from one piece to the next.

THINKING AHEAD

Stuck in a corner? With Initiate, space planners can orient your people any which way. Face in, face out, face the side... whatever fits their style.

VERSATILITY MAKES SENSE

The Initiate line includes desking components and storage units that can be used independently or combined with panels.

VALUE THAT MAKES SENSE

The open base panels offer a value option and lighter look for customers who prefer that aesthetic and don't require a raceway.

RECYCLED SURFACES

Initiate worksurfaces are made from 80% post-industrial content particleboard and feature a low-emitting backer that has minimal impact on office air quality.

LOW EMISSIONS

Even the adhesives used to make Initiate are selected for their low emissions. What's more, interior parts are finished with recycled paint captured from overspray.

A SUSTAINABLE SOLUTION

All tackable Initiate panels feature Nature Core®, a patented low-emitting fiberboard made from a rapidly renewable material. Nature Core also exceeds tackability standards and controls sound remarkably well. In addition, Initiate is certified under Scientific Certification System (SCS) Indoor Advantage™ Gold, recognizing its compliance with specific requirements for air emissions. Initiate also meets the BIFMA e3 Furniture Sustainability Standard, earning level 2 certification as a comprehensive evaluation of its sustainability attributes. Finally, Initiate contributes to LEED® credit for offices seeking that certification.
