X7 Specs

DESKS X7

Melamine worktops Desktops are in matt, scratch resistant, non-reflective and washable melamine. The 18mm thick desktop decreases up to 10mm on the outer edge. Long sides have an ABS edge, 1,5mm thick matching with the desktop; short sides edges are finished with a 1,5mm thick x 10mm high chromed profile made out from an aluminum extrusion.

Glass worktops The extra white glass tops are10mm thick and tempered; they are painted and scratch resistant on the underside and they are satin and finger print proof on the upper surface. They are fastened through linking plates in stainless steel. Edges are smooth polished with bevel 1,5mm x 45 and corners 10mm radius.

Metal structures Legs are available in 2 versions, Open and Closed. They are made of steel 3mm thick with a trapezoid shape section 94x30mm. They can be powder coated polyester matt finish, scratchproof and finger print proof or polished chrome, equipped with adjustable feet. Side rails are made in steel with rectangular section 100x40mm and 1,5mm thick, they are lacquered with epoxy powders and linked to the legs through screws.

Storage compartment It's made in matt melamine particleboard 18mm thick, scratch resistant, non-reflective and washable. This storage compartment is equipped with a flip top cable tray and a 3 drawer + pencil tray pedestal. The structure and fronts of the pedestals are in melamine 18mm thick; they are washable, scratch resistant and non-reflective. The standard inner sides of the drawers are in metal silver finish with the self-closing mechanism (Soft). Handles are in chromed metal. Drawers run on metal guides and have an inner stop in order to avoid their accidental opening. Pedestals come with lock and folding key.

Modesty panels (optional) Melamine 18mm thick, washable, scratch resistant and non-reflective.

MEETING TABLES X7

Melamine worktops Desktops are in matt, scratch resistant, non-reflective and washable melamine. The 18mm thick desktop decreases up to 10mm on the outer edge. Long sides have an ABS edge, 1,5mm thick matching with the desktop; short sides edges are finished with a 1,5mm thick x 10mm high chromed profile made out from an aluminum extrusion. Meeting table worktops tops mm. 140D are provided with ip top cable tray whose sides and lid are made of polished chrome aluminum and chromed ABS. The flip top cover can be opened on both sides and is provided with a brush for the passing of the cables.

Glass worktops The extra white glass tops are tempered and 10mm thick; they are painted on the underside, scratch resistant and they are satin and finger print proof on the upper surface. They are fastened through linking plates in stainless steel. Edges are smooth polished with bevel 1,5mm x 45 and corners 10mm radius. The meeting tables tops mm. 140D have the cable trays with the cover in polished chrome aluminum painted with epoxy powders and ABS head caps. The flip top cover can be opened from both sides and it has (always on both sides) a brush profile for cable entry.

Metal structures Legs are available in 2 versions, Open and Closed. They are made of steel 3mm thick with a trapezoid shape section 94x30mm. They can be powder coated polyester matt finish, scratchproof and finger print proof or polished chrome, equipped with adjustable feet. Side rails are made in steel with rectangular section 100x40mm and 1,5mm thick, they are lacquered with epoxy powders and linked to the legs through screws.

Cable management Cable grid are in painted steel øN.15cm and Ü.7cmi silver finish, held up by supports, lacquered with epoxy powders. Supports allow the unfastening of the grid in order to insert cables into it. The vertebra for the vertical cable management is made in opaline transparent ABS. Thanks to its supports the vertebra can be linked to glass and melamine tops and to cable grids.
