Geiger Sotto Executive Chair

"CATALYST ADDRESSES A PERFECT STORM OF WORK GROWING MORE COLLABORATIVE AND WORKERS BEING LESS TETHERED TO A SINGLE SPACE—WHETHER THAT SPACE IS PRIVATE OR OPEN. WITH A UNIFORM PLATFORM TO FURNISH BOTH SCENARIOS, CATALYST GIVES DESIGNERS A TOOLKIT FOR PLANNING ENTIRE OFFICES MORE EFFECTIVELY, WHILE PRESERVING THE FINISH AND MATERIAL STANDARDS THAT ARE ESSENTIAL TO IMAGE-CONSCIOUS ORGANIZATIONS."

COLIN NOURIE

Named for the role played by mission-critical teams in law firms, financial-services companies and other professional organizations, Catalyst creates constructive settings for individuals who provoke action and keep workflows moving. The lines are minimal: the aesthetic is horizontal and lean, yet the resulting environments are warm, personal and productive. Catalyst preserves the comfort and material standards of executive offices for those managers joining open-plan or collaborative settings. A new vocabulary of furniture for the professions, Catalyst places a premium on the individual and the contributions they make to the enterprise.

CATALYST CASEGOODS BY COLIN NOURIE

The product of a family of architects, engineers and musicians, Colin Nourie earned a Bachelor of Science in Industrial Design from Ohio State University. He spent his early career in product design, packaging and furniture design, before starting triplefive design in 2002. Nourie has designed furniture systems for major commercial-furniture manufacturers, as well as consumer products for companies such as Staples, Procter & Gamble and Abercrombie & Fitch.

CATALYST CASEGOODS | PART OF AN ENDURING LEGACY

In 1964, master cabinetmaker John Geiger parlayed a passion for woodworking into a handcrafted furniture business. His love of and respect for the materials he used, combined with an appetite for perfection, set new international standards in furniture manufacturing.

Today, Geiger's reputation for design and craftsmanship continues to enhance business interiors with an elegant and intelligent portfolio of products for the modern workplace. From executive offices to collaborative environments for knowledge workers, Geiger delivers excellent return on investment through timeless design, superior materials, integrated technology and an unwavering commitment to quality.

CATALYST CASEGOODS | SIX BASIC ELEMENTS COMPRISE EVERY CONFIGURATION

1 BASE 2 STORAGE 3 TOP 4 SHELF 5 OVERHEAD 6 DIVIDER

CATALYST CASEGOODS | DEDICATED, FLEXIBLE AND ACCESSIBLE ENVIRONMENTS

Catalyst traverses the entire office landscape, from dedicated private offices, to hoteling and shared suites, to community meeting and work zones. The same storage, work and privacy components comprise every Catalyst configuration, providing visual and functional continuity to the office floorplate. Designed for both private and open environments (and everything in between), Catalyst can be tailored for each user's access needs: to colleagues, storage, other activity areas, daylight and technology.

FROM LEFT

DEDICATED: Leg Base Private Office with Loop leg runoff desk, wall mount overheads, one-high storage credenza, fabric tackboards

FLEXIBLE: Leg Base Shared Zone with Loop leg runoff desks, stacking storage, shelf mount overheads, modesty panels, privacy screens, fabric tackboards

ACCESSIBLE: Leg Base Open Environment with Loop leg runoff desks, shelf mount overheads, glass divider

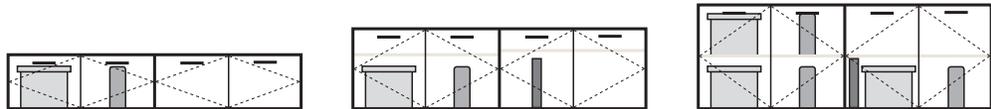

CATALYST CASEGOODS | STORAGE

Designed to hold Redwelds, Bankers Boxes and legal binders, Catalyst credenzas meet the filing and storage requirements of law firms and financial-services organizations. Credenzas can be configured with open cubbies, file drawers or full-height doors, behind which are shelves or a pullout tray for stowing laptops and other accessories. Offered in three heights, Catalyst credenzas help address every planning need, from extra seating to maximum uninterrupted work area.

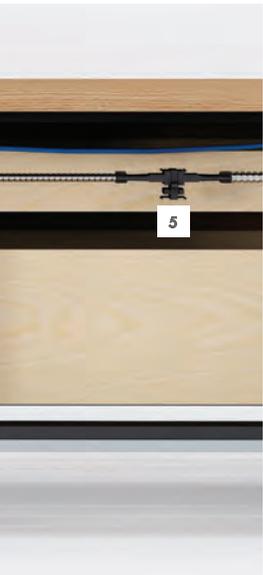

The one-high storage credenza also serves as extra seating; add a power module, and it becomes a hub for short-term work. The one-and-a-half-high credenza allows a runoff to be fixed nearly anywhere along the credenza width. With a runoff, the two-high credenza provides the maximum amount of uninterrupted work area.

CATALYST CASEGOODS | POWER SYSTEM

POWER/VOICE/DATA INTEGRATION

Storage credenzas provide a 6" continuous wire chase, which houses power modules. Power, voice and data cables from the floor enter 2½" access holes on the storage credenza's bottom panel (1). Voice/data bundles connect to the power module's faceplate (2) and pass from cabinet to cabinet as needed. Floor power flows through a power infeed (3), which connects to power modules via pass-through cables (4) joined with H connectors (5).

LEFT

Power module is UL-approved for use throughout the United States and includes five outlets on four circuits (one dedicated), one powered USB port and one slot that accepts third-party faceplates for voice and data.

RIGHT

Optional hinged end of runoff top provides access to concealed power module in storage credenza below.
