# SINGLE CIRCUIT POWER AND DATA SYSTEMS

**MODESTY PANEL:**

• Back panel is extruded in aluminum, with 3 separate channels: one for the power and two for running data wires.

• Front door panel is 18Gauge formed cold-rolled perforated steel.

• Door is hinged at the bottom; secured with spring steel push pins.

• Optional locking door available

**POWER:**

• 15 Amp, single-circuit, plug-in, interconnected power modules

• Each system has an integrated circuit breaker and a surge protector.

• Powered Form Modesty units up to 48″ long have one set of simplex plugs (2 plugs) as a standard. Units longer than 48″ and up to 96″ long have two sets of plugs (4 plugs) as standard.

• ETL Listed to UL962 - Powered Table Systems)

• Maximum of 16 simplex outlets per circuit. This can be accomplished in various configurations of units (some can have 2 plugs, others 4, etc.)

• Capable of being powered from the right or the left.

• 9ft power cord on the 1st unit. Custom lengths up to 15′ available.

• System is designed to conform with UL962, with keyed connectors that prevent the system from being hooked up in numerical order (1-2-3-4-5-6, etc.).

• Endcaps are available for the units.

**DATA:**

• One set of (2) RJ45 jacks provided as a standard on units up to 48″. Two sets (4) jacks provided on units from 48″ to 96.″

• One jack per set is a CAT6 (data). The other is a CAT3 (voice).

• Systimax jacks are standard. Superior UMJ jacks are available as a standard option. Alternative configurations and jack types are available...samples must be submitted for approval.

• Jacks can be ordered already wired, with various configurations of termination on the other end (male or female connections, etc.).
