

VoloTM

Movable Wall

Your Vision...

Your Volo™!

Speak Volumes with Volo

Volo Delivers On All Fronts

- Personalized Privacy
- Performance with Purpose
- Effortless Integration

Personalize
Volo™ ...

Seek the level of Privacy you need

Use Segmented Veneer or Glass to Make Statements

Personalize Volo Through Material Choices

- Veneer
- Tackable/fabric
- Laminate and faux veneer
- Tempered and decorative glazing
- Writable/Steel Backed glass (magnetic friendly) in a choice of colors

Create the Feel of Custom Millwork >

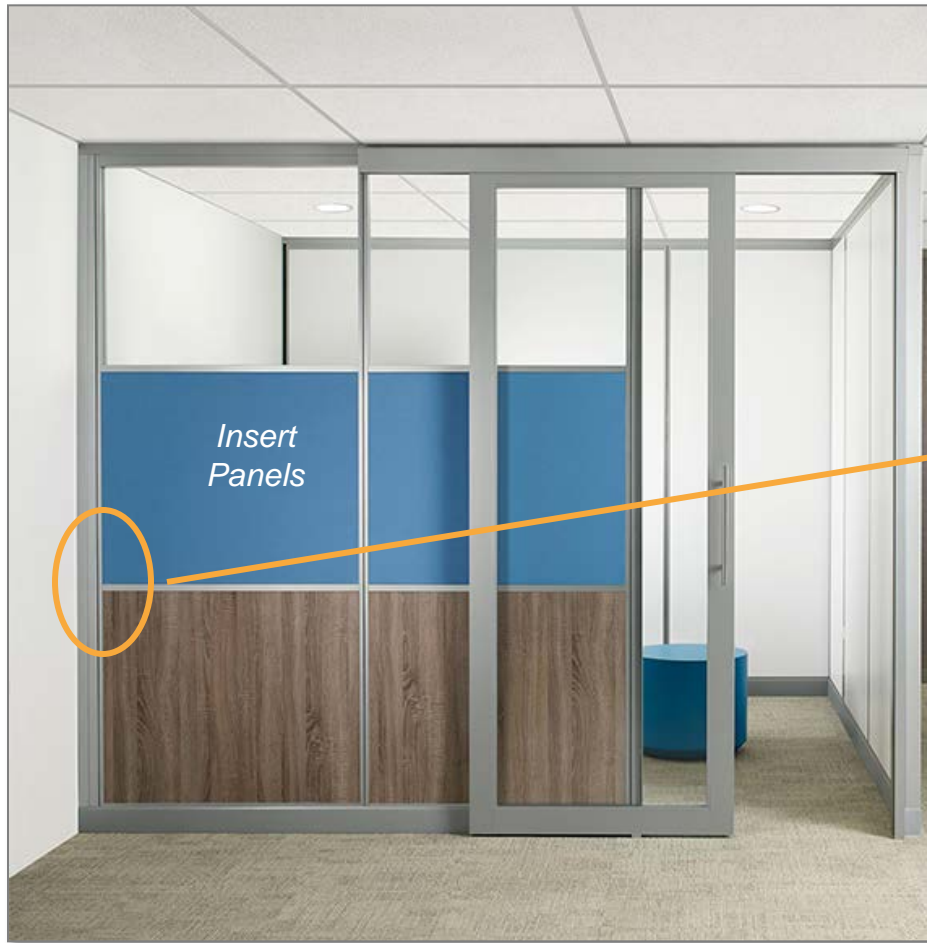

Attention to Detail

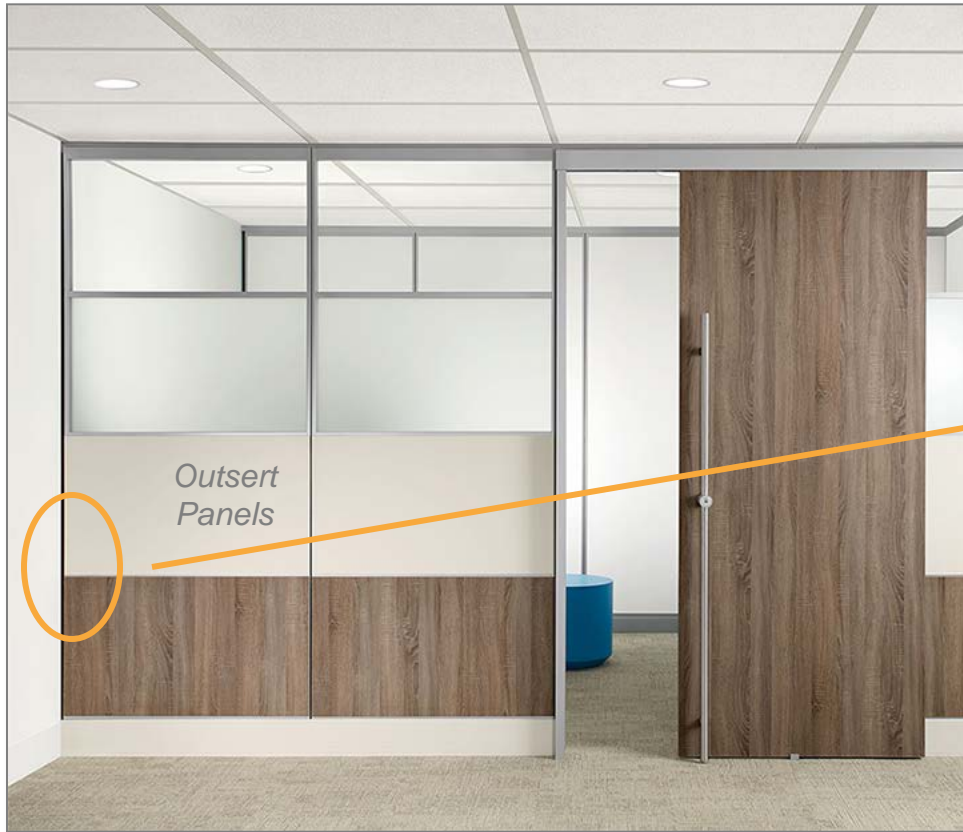

- Crisp lines
- Precise reveals
- Extensive coverings and material options

Wall Starter – Adjustable

The Adjustable Wall Starter matches frame elements & provides flexibility to cleanly attach to wall conditions (shown with insert panels)

Wall Starter – Reveal

Reveal Wall Starters create a subtle, recessed wall connection (shown with outsert panels)

Base Options

2" Reveal Base creates a subtle recessed transition to the floor.
(Power & Data can pass through.)

The 4" Traditional Base gives a framed finish to the panel.
(Power & Data can pass through.)

8-wire, 4-circuit power is available in the 6" Traditional Base.
(Power & Data can pass through and be accessed via outlets)

Crown Options

Reveal Crown
diminishes the visibility
of attachment elements

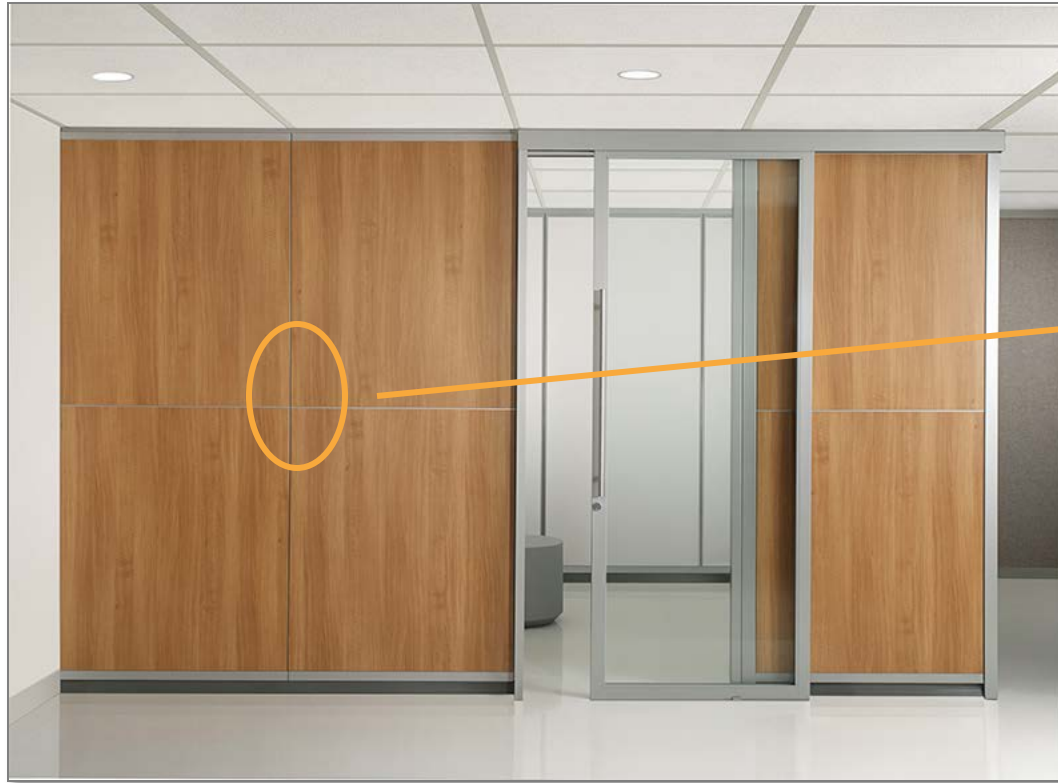

Traditional Crown
stands slightly proud of
the wall panel

Tile Options – Insert Panels

Inserts offer many decorative and functional options – all framed within the wall tile

Tile Options – Outsert Panels

Outserts bring a uniform look to surface materials and eliminate the framing effect with very subtle reveals

Filler Panel

Use filler panels to work around irregularities (soffits, radiators, etc.) where regular panel sizes won't work

Glazed Panels

Volo offers clear, super-clear, frost, and steel-backed glass in a variety of colors, writable, and magnetic glazing options

Acoustics

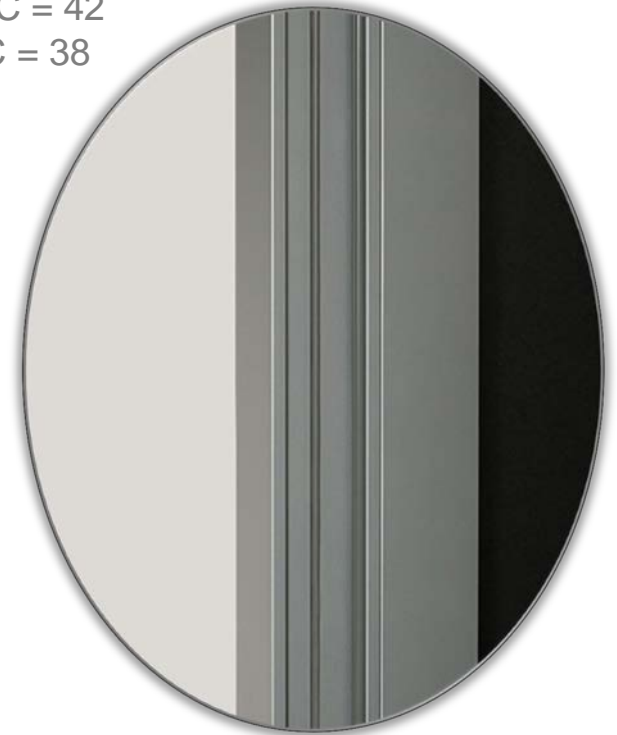

STC Ratings:

Outsert Side 1 / Insert Side 2: STC = 43

Outserts Both Sides: STC = 42

Inserts Both Sides: STC = 38

Door jam with acoustic seals provide increased acoustical privacy

Personalize Power/Data/Communications >

Data/Power/Communications can route through the walls' vertical elements to support power/data access at the standard 16" high for outlets, 44" high for switches, or any height when cut in the field

Power and data can be distributed and accessed horizontally with the 6" base option

Doors

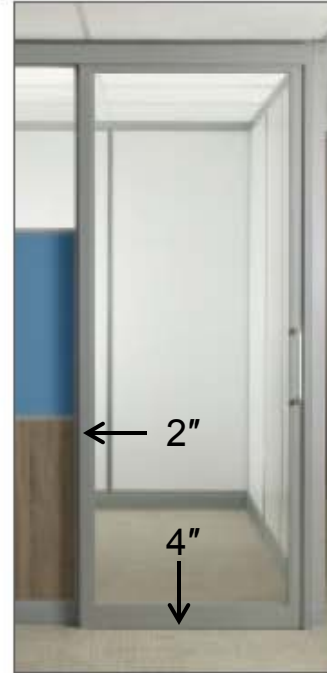

Flush

Veneer

Door Frames offered in 2" or 4" width, or 2" with a 4" base.

Personalize the Pulls

12" D Pull

17" Post Pull

36" Post Pull

72" Ladder Pull

Personalize Privacy

Shhhhhh

Volo™...

A Balanced Approach

Acoustical Privacy

- Balance in sound ratings & in solid and glass materials
- Well Designed Acoustic Seals

Visual Privacy

- Designed your way for the level of privacy required
- From fully private to completely transparent

Value

VoloTM ...

Speed & Convenience with Unitized Construction

Stand Out Or Blend In

Perform with Purpose

- Manufactured quickly
- Installs faster
- Accelerates schedule
- Reconfigures easily and fast
- Panels can be removed independently without concern for sequence

Effortlessly Adapt

Performs to Your Budget

- Range of options to support diverse budgets
- Can assume a custom/millwork appearance
- Glass Storefront applications
- Moderate dry wall aesthetic
- And so much more

Love

VoloTM ...

Complements Other Trendway Products

Integrate Effortlessly

- Seamlessly integrates with building architecture
- Connects to columns, mullions, ceilings, floors, bulkheads, etc.
- Doesn't mar floors, so reconfigurations mean carpet/floor is not damaged
- Integrate with other Trendway products
- Unify a space, divide a place, or define areas

Conforms to Any Space

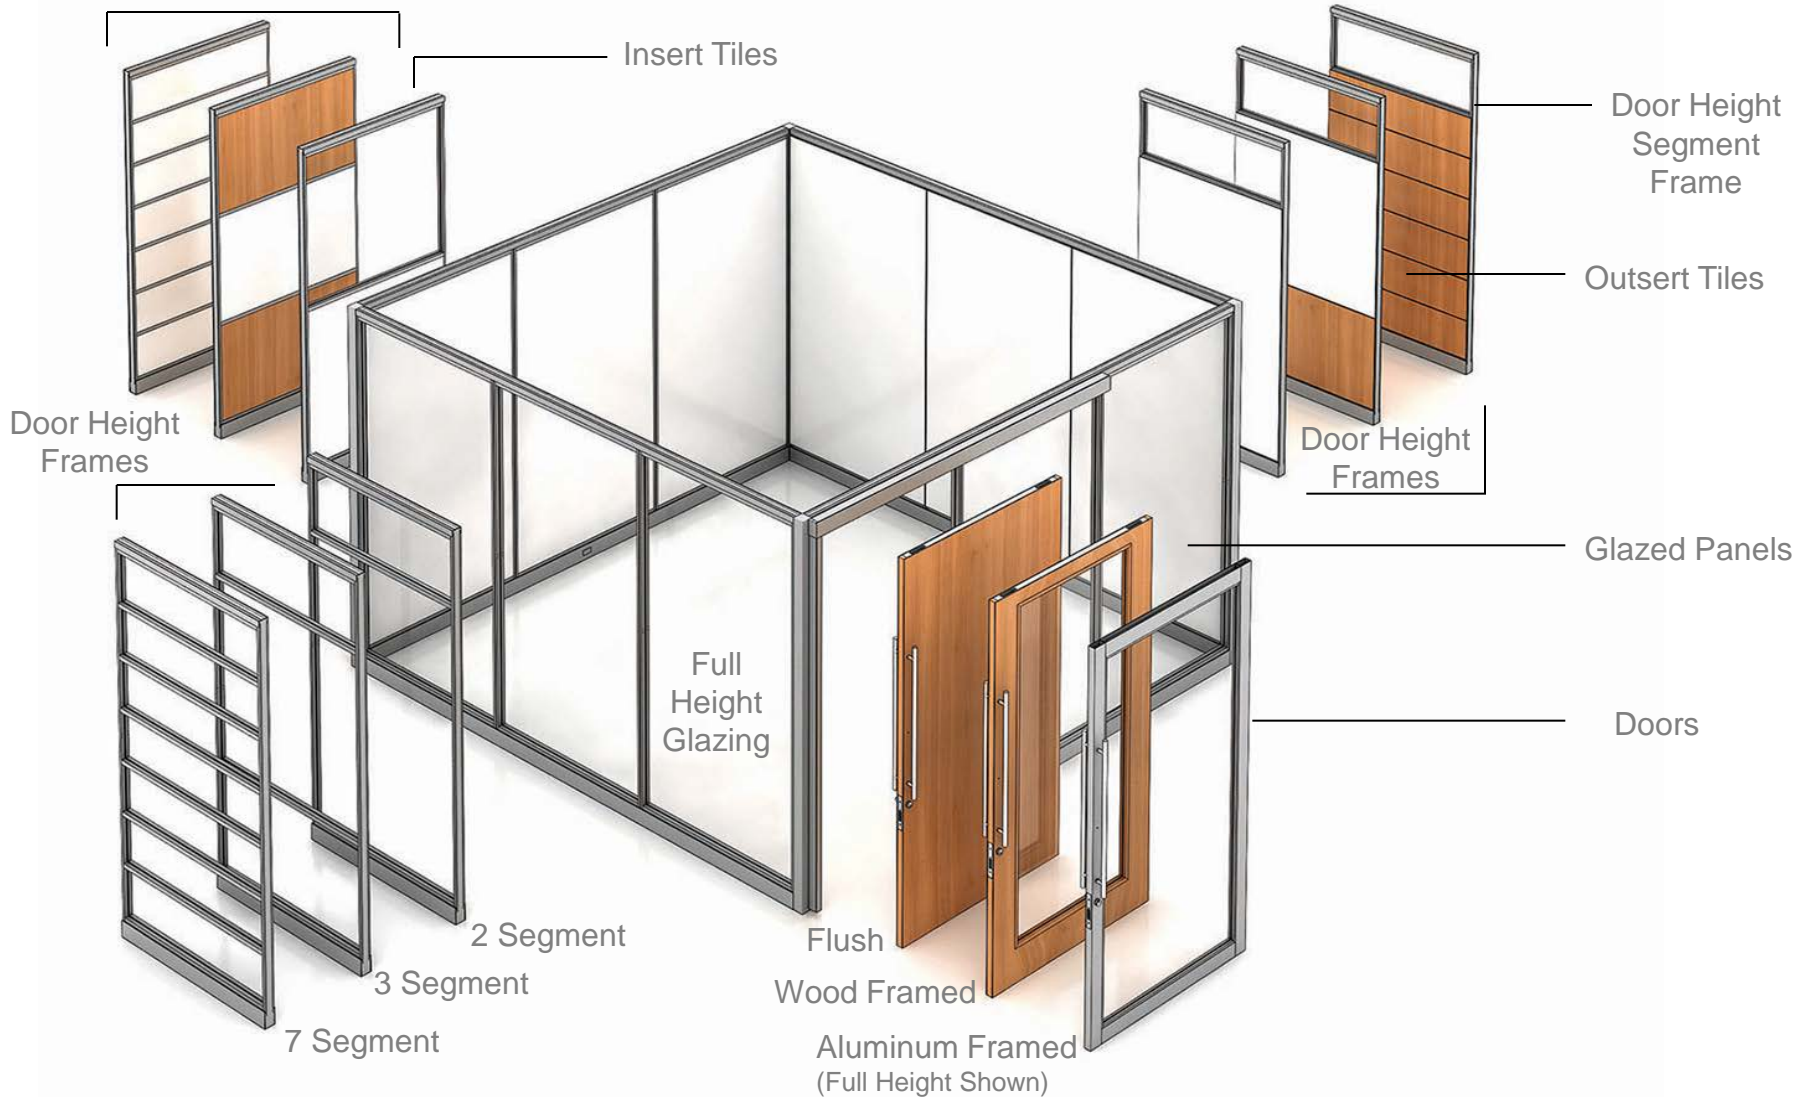

Create Beautiful Environments

Extensive Statement of Line

Variable Height Frames
