

# TrendWall<sup>®</sup> Flooring Solution

---

TrendWall Flooring Solution is the intelligent approach for cable management in today's commercial interiors. While traditional wiring systems are difficult to access when moves, adds and changes are required, TrendWall Floor simplifies the process all around. Modular TrendWall flooring makes reconfiguration easy, with power and data accessible from anywhere in the room by simply removing a floor access panel. The low 2½" profile and modular construction make it a practical and cost-effective cable management system, whether used in a new construction, renovations or integrated into existing spaces or individual rooms.
