

ARCONAS®

Innovative Leader in Seating

setz cluster™

Cluster units create inviting waiting areas, while offering increased personal space and table surface.

- Post and beam steel construction supports the central table while ensuring strength and stability of the seats.
- Clusters may be connected to form semi-circular seating arrangements suitable for families and small groups.
- Large central table provides sufficient space for all occupants to work or relax.
- Floating tabletop allows for easy floor maintenance and good security sightlines.
- Ergonomically contoured seat pans are perforated steel.
- Glides and end caps are nylon.
- Other Setz models include: 2 - 5 seat linear units and back-to-back units with end tables and benches.

Finishes

- Steel components are powder coated.
- Clear topcoat recommended over some metallic finishes.

Upholstery

- Options include: partial upholstery or perforated steel seat pans.
- Upholstered back and seat pads can be removed and replaced for easy maintenance.
- Upholstery options include: vinyl, faux leather, leather and woven textiles.
- Embroidery options on back pads include: sponsorship logos, corporate logos and accessibility symbols.
