

Spinneybeck

Magnetic Leather

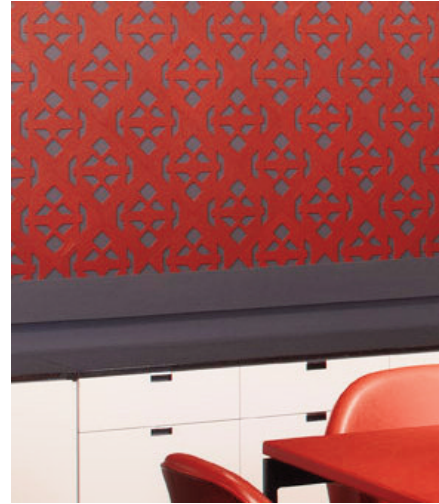

Fact Sheet

3" x 6" Hand Tipped 1526 subway pattern on file cabinet

12" x 12" Portofino 2301 with custom Laser Engraved pattern by Emanuela Frattini Magnusson vertically installed

8" x 8" Cervo 41 in custom die-cut pattern vertically installed

Spinneybeck Magnetic Leather creates striking visual interest for a wide range of vertical and horizontal surfaces such as walls, headboards and metal cabinetry.

With its sleek, flat profile, Magnetic Leather provides an architectural alternative and affordable design option to other interior surface materials. Select your upholstery leather from over 1,000 colors and 30 leather styles and Spinneybeck will produce your Magnetic Leather. Choose a single color for a more formal elegant look or select multiple textures, sizes and colors to create a truly custom mosaic for your wall or headboard.

The natural characteristics of our full grain aniline dyed leather make every installation unique. Each shape will exhibit the distinctiveness of grain texture and natural markings of the hide area from which it is cut. Spinneybeck Magnetic Leather is offered in various shapes and sizes and is appropriate for contract, corporate, education, healthcare, hospitality, residential and retail environments.

Spinneybeck Magnetic Leather is quickly adhered to any existing metal surface, such as metal shelving and vertical files. Magnetic Leather quickly transforms a bank of lateral files, metal bookcase or storage tower into a wall of color from pale neutrals to brighter palettes or even corporate colors. For installation on non-metal surfaces, magnetic latex primer will be included with your order.

Magnetic Leather can be trimmed and adjusted for size in the field with a straight edge and a commercial grade utility blade.

Please call your Spinneybeck Sales Representative or Customer Sales Service for samples, pricing and additional information.
