

LINEAR LIGHT STRIP

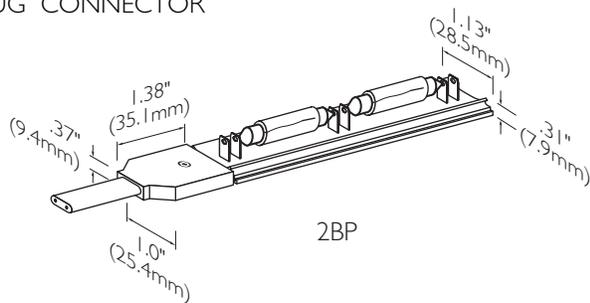

SERIES 2000-3000

PRODUCT SPECIFICATION

Product	Cat. No.	Finish	Lamp Options
Series 2000	2BP, 2BC, 2BJ	White	Incandescent 12v/24v 3w, 5w, 10w
Series 3000	3BP, 3BC, 3BJ	Black	Xenon 12v/24v 3w, 5w, 10w Halogen 12v/24v 5w, 10w, 20w Bi-pin Xenon 12v/24v 5w, 10w

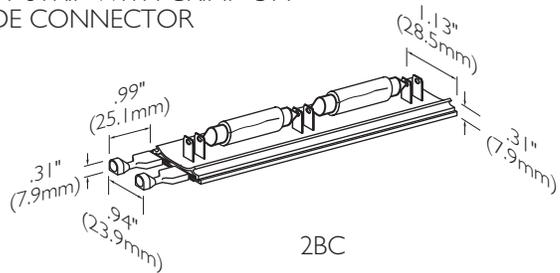

U.L. Class I Listed

LIGHT STRIP WITH MOLDED PLUG CONNECTOR

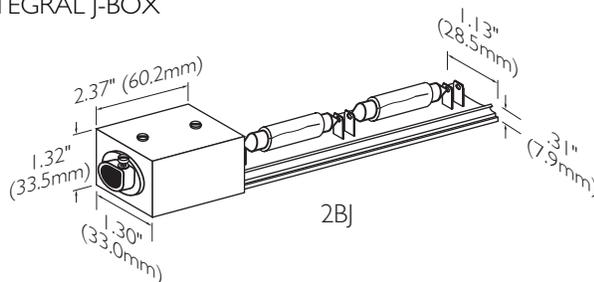

E.T.L. Class I Listed

LIGHT STRIP WITH CRIMP-ON SPADE CONNECTOR

LIGHT STRIP WITH INTEGRAL J-BOX

GENERAL DESCRIPTION

Miniature linear lighting system for low voltage applications. 3/4 inch high with lamp by 1 1/8 inches wide. Series 2000 is gloss white for high and even reflectance. Series 3000 is black for color integration. Both series are sold in lengths up to a maximum of 16 feet (4.9m) at 24v or 8 ft. (2.45m) at 12v (See Electrical for specifics). Fixture comes complete with power connector which must be specified. Light Strip utilizes 12v or 24v incandescent and xenon festoon lamps which may be mounted 2 inches (51mm) or 4 inches (102mm) on center. Refer to lamp table on reverse side for festoon lamp options. Halogen and bi-pin xenon lamp options also available. Remote 12v or 24v transformer required. (order separately)

MOUNTING

Light Strips come with double-sided foam tape. Peel away tape liner and press strip onto clean, dry mounting surface. Additional attachment must be made with #4 screws installed through pilot holes provided.

When installing Light Strip in curved applications, lamp contacts must be aligned to hold lamps in place. Light Strip may be mounted in concave/convex applications, 12 inch minimum bending radius. Light Strips may be easily cut to required field dimensions with saw or nippers. Burrs should be removed after cutting product. Light Strip requires adequate ventilation to dissipate heat generated during operation. Care should be taken to avoid placing Light Strip in confined areas. Allow 4" to 6" set back from combustible and heat sensitive materials.

MATERIAL

Light Strip made of polyethersulfone thermoplastic with solid brass conductors. Thermal deflection temperature of plastic is 397°F (203°C) at 264 PSI.

LABEL

U.L. Class I listed when used with Molded Plug or J-Box connectors

LINEAR LIGHT STRIP

SERIES 2000-3000

along with U.L. Class I listed isolation remote transformers. (File No. E71480) E.T.L. Class I listed when used with Crimp-on Spade connector along with U.L. Class I listed isolation remote transformers.

ELECTRICAL

Light Strip rated at 20 amps. Fixture must be ordered with one of three connectors: Molded Plug Connector (2BP/3BP), Integral J-box (2BJ/3BJ) or Crimp-on Spade Connectors (2BC/3BC). All connectors are UL Class I listed with exception of spade connectors, which is E.T.L. Class I listed. Molded Plug Connector (2BP) comes pre-wired with 12 AWG 2 conductor Romex type wire in 4 foot pig-tails as standard. **Total wattage on Light Strip cannot exceed 240w on a 12v system or 480w on a 24v system. The lamp's voltage, watts, and spacing combination will determine maximum length allowed on Light Strip.**

OPTIONS

Snap-on horizontal (10w max) and rotatable halogen sockets (20w max) may be incorporated on fixture. Polished brass and chrome housings are offered in right-angle and round profiles for recess of Light Strip in glass shelving, display case and decorative applications. Remote magnetic transformers are U.L. Class I listed and come in 120v or 240v primary, 12v or 24v secondary. Magnetic transformers must be fused with the appropriate sized amp per load for short circuit protection. Remote electronic transformers also available.

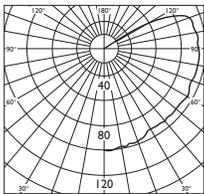

WARRANTY

Manufacturer's one year warranty of product is conditioned on use of manufacturer supplied remote transformers.

PATENTS

U.S. and other foreign patents.
