CARE AND MAINTENANCE WOOD FINISH

Although Krug's extensive finishing process ensures a durable finish on all our products, there are several steps that can be taken to protect and prolong the life and beauty of the finish. Protect the top by placing felt pads on the bottom of any accessories and mechanical equipment. Rubber and oil will permanently mark surfaces. Use a desk pad to prevent possible damage and imprinting caused by writing instruments and sharp objects. Dust only with a clean, dry cloth, going with the grain. Clean any marks with a damp cloth, using a small quantity of mild soap or detergent. Do not use any wax-based polish, spray or silicone. Eventually, a film will build up and discolor the top. Do not place your furniture in a position of permanent exposure to direct sunlight.

LAMINATES

Clean plastic laminate surfaces with mild soap and warm water. Do not use steel wool, hot water, or any abrasive cleaning product.

PAINTED GLASS

To clean simply wipe with an ammonia based cleaner using a microfibre cloth. Do not use a coarse cloth or an abrasive cleaning products on painted surfaces to avoid scratching.

FABRIC UPHOLSTERY

Professional upholstery cleaning is recommended.

CUSTOM CAPABILITIES

Over 15% of our orders involve some type of custom work, and we invite our customers to make use of our extensive capabilities.

These include:

- 1) Dimensional customization of standard size products.
- 2) Custom finishes
- 3) For larger orders, completely custom designed products, as well as non-standard wood species can be specified.

GRADED-IN UPHOLSTERY PROGRAMS

Krug has partnered with several textile brands to grade in their offerings, designed to provide a wide range of upholstery selections for our seating products.

Upholstery pricing and availability is subject to change without notice. We grade this upholstery according to the pricing of the fabric suppliers - when their pricing changes, the Krug grade may change.

When placing an order, a Krug customer must specify the complete upholstery number, along with the appropriate Krug model number and finish. Krug will supply the complete product at the prices listed. Orders specifying graded-in upholstery cannot be cancelled once the upholstery has been ordered.

Upholstery Grades

To determine the price of a product for graded-in upholstery, use the reference lists located on Krug's website under - Products - Textiles, to view the upholstery grade (1-9). Krug is not responsible for the discontinuation of this upholstery. Please contact Customer Service for information on upholstery not listed.

When two upholstery selections are specified for use on seating, the higher grade upholstery price will apply to the order.

High Performance upholstery; Polyurethane, Vinyl or Crypton, is particularly suitable for healthcare and other intensive-use environments.

Upholstery Samples

If you require additional samples or memos for presentation, please contact fabric supplier directly.

KRUGEXPRESS

PROGRAM DETAILS

KrugExpress orders are ready to ship by the date acknowledged. Delivery and shipping schedules may result in actual shipping of orders at a later date. Statutory holidays and scheduled factory vacations may add to acknowledged lead times of *KrugExpress* orders. Unless otherwise specified on the order, the customer's standard method of shipping Krug products will be utilized.

Available factory capacity for *KrugExpress* is filled by orders received on a "first come, first serve" basis. If the normal *KrugExpress* lead time is not available for your order because available capacity has been filled, you will be immediately advised of the earliest available ready-to-ship date. Please consult your Customer Service representative in advance if you wish to confirm the specific lead time availability for a *KrugExpress* order. Orders must be received by midnight of a given day for that day to be considered the official day the order is received. Order lead times are acknowledged from the date the order is received, but not including the date the order is received. *KrugExpress* orders must be "clean" when received in order to be considered officially received on a given day, and lead times will be acknowledged from the date orders are determined to be "clean". Changes to *KrugExpress* orders are not allowed under any circumstances. Orders for product on *KrugExpress* must clearly state: "*KrugExpress*".

***Some conditions apply. Please note PALETTE finishes are not available on *KrugExpress*.**

CASEGOODS PROGRAM

Orders for casegood products on the *KrugExpress* program may be subject to quantity maximums. Please contact Krug Customer Service for more information. Quantity maximums are dependent upon available capacity, in order to insure that we ship all orders on time. Only actual casegood pieces and conference tables tops and bases are considered "units". Items such as tasklights, tackboards, keyboard trays and drawers, electrical and wire management components, etc., are not considered under the quantity restrictions. For example, a typical office configuration that includes a desk, linking unit, credenza and hutch/overhead, equals a total of four units for the purposes of the quantity maximum. Only Krug In-stock panel fabric is available on the *KrugExpress* program. Only standard wood finishes are available for *KrugExpress* orders. Grommets can be specified in standard positions only. *KrugExpress* also includes all Krug seating and occasional tables as well as Krug conference products to complement this casegoods offering.

CUSTOMER'S OWN MATERIAL - C.O.M.

Customer's Own Material (COM)

COM must be received three weeks prior to the acknowledged ship date. Orders with COM not received by the required deadline will be delayed.

A description of the fabric, including supplier name, fabric name and color number must be included with the purchase order.

When the COM fabric is received at Krug, it must be clearly identified with the fabric name and color, and tagged with name of the Krug customer and purchase order number. Krug will inspect all COM fabric when received to determine if it will be suitable for upholstery. Where Krug feels that the fabric or leather specified will compromise the quality or integrity of our products, customers will be contacted to direct these concerns. Further, Krug reserves the right to refuse to accept and use any COM fabrics or leathers that will compromise our products in any way that is unacceptable to Krug. Krug cannot assume responsibility for the durability or tailoring quality of customer's own material.

Yardage specified in this price guide is approximate. In the case of multiple product orders, multiply the number of items by the COM yardage specified to determine fabric required, unless otherwise indicated. Additional yardage may be needed if the material is less than 54" wide, or patterned or striped and requires matching. As fabric is applied horizontally, non-directional fabrics are recommended. COM fabrics are applied as they come off the roll unless otherwise specified. All striped fabrics will be applied vertically unless otherwise stated by the customer and after approval by Krug. It is the customer's responsibility to advise Krug if the upholstery is to be applied otherwise, and to advise Krug of any special upholstery instructions. Special instructions should be sent to Krug Customer Service, including a sample (or photocopy) of the fabric. Krug is not responsible for instructions sent with the fabric rolls, or for the method of upholstery if no instructions have been provided.

COM fabrics for tackboards may be specified in either Maharam or Momentum panel fabrics. Krug is not responsible for determining if a fabric is not ideal for tackboard application. Please contact Maharam at 1-800-645-3943 or Momentum at 1-800-366-6839 directly for more information about a specific fabric.

COM Shipping Procedures

For tackboard COM fabrics, please send fabrics to:

Krug Inc.
111 Ahrens Street
Kitchener, Ontario
Canada N2H 4C2

Attention: RECEIVER

All packages must be clearly marked "For Customs Clearance by Russell A. Farrow Custom Brokers". According to the North American Free Trade Agreement (NAFTA), goods shipped between the United States and Canada can qualify for exemption from all duties, or for a reduction in duties, if the goods can be proven to originate in either the United States, Canada or Mexico.

Canada Customs requires that a NAFTA Certificate of Origin and a Commercial Invoice be completed and sent with the fabric shipment. The Commercial Invoice must clearly state the description of the fabric, the selling price, the make-up or content, and the purchaser. The absence of these two documents will delay the shipments at the U.S./Canada border, thereby potentially delaying the customer order. If the total value of the shipment is less than \$1200 U.S., Customs will accept a Low Value Statement of Origin in place of the NAFTA Certificate of Origin. The Low Value Statement must be signed by a representative of the exporting company. This statement may either be included on the commercial invoice or attached to the invoice.

Krug is happy to answer any questions or concerns about COM shipping procedures and the required documents. Please contact our Customs Specialist at 1.888.578.5784.

Air Emissions

All Artemis products are supplied air emissions certified. Contact customer service for information and upcharges.

FSC®

In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It signifies that the growth, harvesting and production of goods are entirely achieved through responsible forestry, which guarantees a healthy supply of forest resources for generations to come. Artemis and other Krug products can be specified with one of two types of FSC® Certification:

(a) FSC®-certified (which includes FSC®-certified lumber, veneer and substrate material)

(b) FSC®-mix certified (which includes substrate material only, and is a lower cost option certification)

Both FSC® certification types may require upcharges, and often require additional lead time. Contact customer service for further information, pricing and leadtimes.

In addition, architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the U.S. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

Natural Characteristics of Wood

Wood is a natural product with inherent color variations that will never be fully mitigated by the finishing process. Please anticipate variation in colors within a single unit, from piece to piece, and from Krug wood finish samples. If a very close match is required, a sample must be provided with the order and an upcharge will apply. Exact color matches are not possible.

Custom Wood Finishes

Add 10% list to your order for special finishes, minimum upcharge is \$500 list per finish per order. (For example, on all orders up to \$5000 list, an upcharge of \$500 will apply, on orders \$5000 and up add 10% list to your order.)

For orders with special finishes, a sample that is a minimum 3" by 3" must be received with the order. Special finishes may add additional lead time to production schedules.

Since wood is a natural product, some variations in grain, color and stain acceptance will occur. In our finishing processes, we try to minimize variations, but some variation between samples and finished goods should be anticipated.

Dual Finishes

Add 10% list per item if specifying dual finish.

All cases may be specified with one grommet in a standard position at no upcharge. A \$105 list upcharge will apply to additional grommets in standard positions and for grommets requested in non-standard positions a \$250 list upcharge will apply.

The grommet position must be indicated for each case on the order. Please specify location of grommet when ordering.

GROMMETS - Round

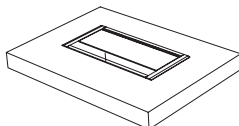

A round grommet in a satin metallic finish with an open and shut mouse hole serves to provide cable passage for areas not requiring a large opening. The grommet position must be indicated for each case on the order. Please specify location of grommet when ordering.

Grommets can be field installed with a power drill, 60 mm hole saw. Please keep in mind the location of the grommets when specifying paper managers or pier hutches for use with worksurfaces. For example, a paper manager on the left-hand side may be used with a "C", "BR" or "AR" grommet.

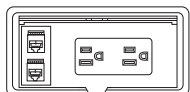

POWERPORT

A PowerPort is a unique worksurface mounted module that can be specified to a location that best serves the user's needs. It includes a UL approved electrical, voice and data power bar, containing two 115 - volt electrical simplex outlets which are accessible from the work surface, plus a utility outlet at the end for daisy chaining purposes. 3 data versions are available, please see page 595 for options.

76PDVM Power/ Data/ Voice Module

This unit is also an option in the worksurface. It is CSA/UL approved, and includes 2 - 115 volt electrical outlets, plus 1 - RJ11 communication port and one RJ45 data port. It features a flip door that retracts into the worksurface when open.

ARTEMIS | HPL LAMINATES FOR WORKSURFACES

Laminate Worksurfaces

Krug defines "HPL" as High-Pressure Laminate. Laminate worksurfaces are available for the Artemis product line with two options - Laminate Tops with Wood Edge or Laminate Tops with Polymer Edge. Krug will order and procure laminates. Purchase orders with a plastic laminate option must include:

Manufacturer's Name
Laminate Name
Laminate Number

When specifying laminate worksurfaces, the grain direction is such that the grain pattern runs as shown in the diagrams below. Please note, in veneer grain direction runs lengthwise on desks and credenzas and front to back on returns and linking units. In laminate the grain direction runs lengthwise on all components.

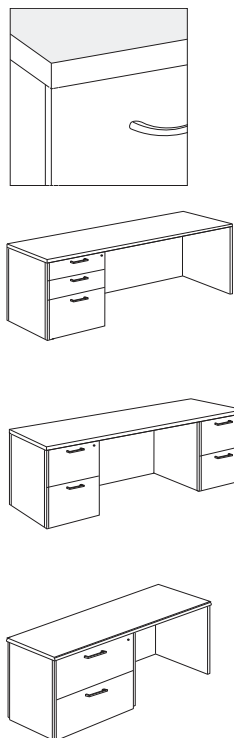

Please contact Krug Customer Service for questions pertaining to laminate grain direction. The diagram below illustrates the placement of laminate on Krug worksurfaces. The shaded areas represent laminate, while the non-shaded area indicates the profiled wood edge or polymer.

ARTEMIS | LPL LAMINATES FOR HEIGHT ADJUSTABLE WORKSURFACE MODESTY PANELS

CREDENZAS

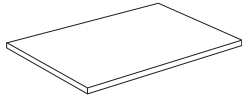

Credenzas
Artemis offers a wide variety of credenzas for use as stand alone storage pieces, part of a connected worksurface configuration, or behind a desk. Choose from single or double pedestal options, with fixed or hinged modesty panel.

Modesty Panels
Credenzas without hinged modesty panels provide easy access to wall mounted electrical sources. Credenzas with modesty panels have an added finished look, and all cases are available with a wiring grommet in a standard position for added cable management, please specify on your order. Wiring grommets can be specified above the pedestal location.

Pedestals
Artemis credenzas are available with single, lateral file, combination pedestals or bookcase pedestals.

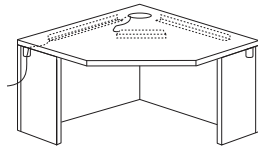

ARTEMIS | LINKING & CORNER UNITS

Artemis linking units and corner units are available in a range of sizes for ease of use in configuring a connected worksurface.

Linking Units

Linking Units are for use between desks and credenzas in creating a U-shaped configuration, and must be supported at both ends. They are available with or without modesty panels.

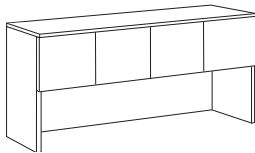

Corner Units

A corner unit can also be used on a U-shaped configuration, or it can be an integral part of a L-shaped work area with returns linked to either side.

Corner units have a standard grommet included in the back corner for ease of cable management, and have additional wire management access grommets in the half gables so that cable can be run to other areas of the connected worksurface. This can be assisted by a cut length of wire management cover.

HUTCHES, OVERHEADS, & TACKBOARDS

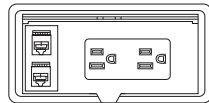

Hutches and Overheads

Artemis offers hutch and overhead options for use in a work area configuration.

All hutches and overheads include tasklights that are factory installed and require no field adjustment. Tasklights are mounted beneath the cabinet and hidden from view.

Selected hutches and overheads are available with silver metallic framed frosted glass doors.

Doors

Doors are equipped with fully adjustable European style hinges. Locks are optional and can be specified at time of order for an upcharge of \$105 per set of (2) doors. If an uneven amount of doors require locks, the lock on the single door is \$56. Locks are not available on glass doors.

Hutch Power/ Data/ Voice Module

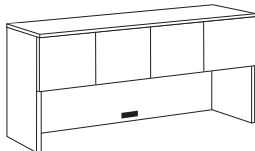

Access to power and data is made simple by using a hutch with a power/data/voice module built right into the tackboard. The module is fully installed at the factory but can be removed to connect data links on site. It features a flip door that retracts into the case of the unit when open.

Tackboards

Please note, not all fabrics are suitable for tackboard application. Tackboard fabric selections should be supplied with the order information.

Tackboards are not included with overheads, see page 584 for pricing. Overhead tackboards include wall mounting hardware and instructions. Tackboards for hutches are installed at the factory and require no additional set up on site.

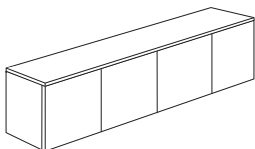

Only hutches and overhead tackboards in Krug panel fabrics are available on *KrugExpress*.

Tasklights

Tasklights are included with hutches and overheads. On hutches, the tasklight cord is threaded behind the hutch through a standard access grommet on the upper right hand side of the back panel.

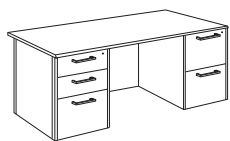

Tasklights are installed on the underside of overhead units. Cords run down the right hand side of the tasklight to the worksurface where they can be routed behind the worksurface top. The use of a wall mounted Overhead tackboard conceals the cord from view.

Installation

Hutch and overhead installation instructions are included with every case or can be found in this guide on page 517. All mounting hardware required is included with the product.

ARTEMIS | FILING INSTRUCTIONS

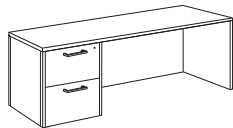

Drawers will be offered for letter and legal size filing. All units are equipped with file bars that are fixed in place for shipping.

16" pedestal drawer depths allow only one row of side to side files.

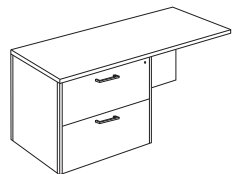

Weight capacity of pedestal file drawers is 90 lbs.

Credenza, Return or Storage Lateral File Drawers

Filing Capacity:

30" WIDE DRAWERS:
30" letter filing front to back, or 25" legal filing
side to side 15" or legal filing front to back.

When filing front to back, 30" lateral file drawer widths allow two rows of letter filing, but only one row of legal file width.

Filing capacity:

36" WIDE DRAWERS:
30" letter filing front to back, or
36" legal filing side to side, or 30"
legal filing front to back.

Weight capacity of lateral file drawers is 135 lbs.

Linking Units, Tops and Returns

It is important that the main units (desk, credenza) to which the linking unit or return is being attached be in their final position and leveled.

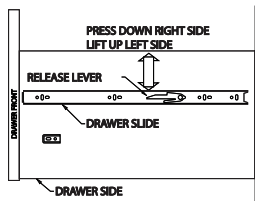

Units are connected with mending plates under the work surface and from the modesty and to the end panel off the connecting units. Attach the mending plates under the work surface, level cases if necessary by adjusting the glides to achieve flush and firm joints before installation of mending plates to modesty and end panels.

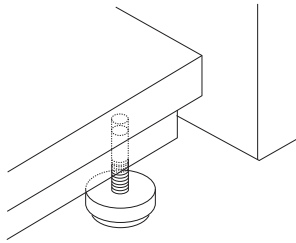

Drawer Removal

Pull drawer and slide out to the full extension position. With index finger, lift up the release lever on the left and press down the release lever on the right side of the drawer (as shown).

Pull out the drawer with the attached drawer channel from the cabinet member.

To re-assemble, insert the drawer through the guide.

Glide Adjustment

Raise one corner of the unit at a time and adjust the glide to the desired height by turning the glide to the hole. Make sure unit is level after adjusting the glides.

Please note that the maximum adjustment range of the glides is 1 1/4".

When moving units after glides have been inserted, dial the glides to the lowest position to prevent damage.

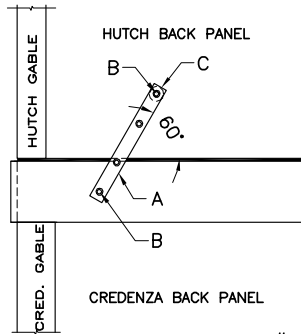

FIGURE #1

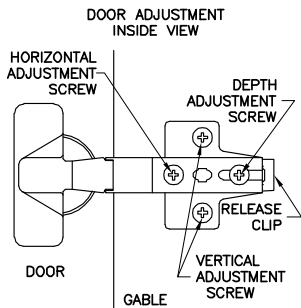

Hutch Installation

Before installing the hutch, insure that the worksurface has been placed in the final position and leveled. The worksurface should then be moved out a sufficient distance to allow access to the back. It is recommended that the minimum amount of movement be used with the leveling glides extended to prevent damage to the glides.

The hutch comes with self-adhesive foam strips that must be applied to the bottom edge prior to placing the hutch on the credenza. The foam is best applied with the hutch lying on its back. Do not leave any gaps in the foam strip, in order to prevent scratches to the credenza top while placing the hutch.

Place the hutch securely on the worksurface. Try to minimize any movement of the hutch to prevent scratching. Use of a blanket on the front portion of the credenza is recommended.

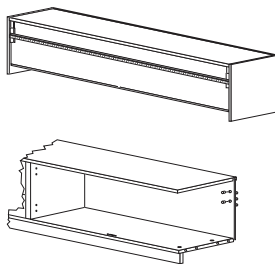

Using the supplied hardware, screw the 90° bracket (A) to the top of the credenza at each end, using the 3/4" screws (B). Swing the bracket up to approximately 60° and place the supplied washer (C) behind the top hole in the bracket. Screw through the bracket and washer into the hutch back with the 3/4" screws (B). Tighten all screws. Move combined hutch and credenza back to final location. Check for level again and adjust as required.

Door Adjustments

Hinges on all bookcase, overhead and hutch doors are designed to be adjusted for depth, horizontal and vertical alignment. This is easily done by adjusting the appropriate screw. See drawing.

To remove a door, pull the release clip and pull out the door, disconnecting hinges.

Overhead Unit

The wall mount overhead units must be installed on wall studs. The first step for installation is to locate the studs in the wall where the overhead is to be mounted.

Position the overhead hanger rail on the wall to insure studs line up with pre-drilled holes in the hanger rail and mark the location on the wall.

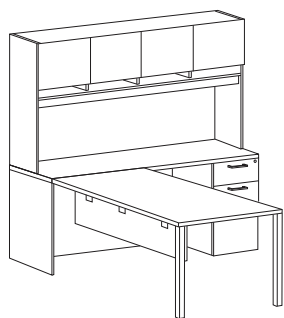

Drill holes at the marked hole locations. Fasteners are to be provided by the installer, so hole size will be determined by size of fastener chosen. If studs cannot be accessed, then appropriate drywall plugs or butterfly bolts should be used. If the end of the wall rail is further than 3" from a stud, toggle bolts must be fastened through holes 1 and 3. Fasten the mounting rail to the wall insuring that it is level.

Remove the black plugs located on the inside face of the back panel to gain access to the adjusting screws on the hanging brackets. Hang the overhead on the mounting rail. The hanging brackets provide vertical and plumb adjusting screws. Level the cabinet by using these screws. All brackets must be adjusted so that they all support the cabinet.

When leveling of the overhead is complete, insert the black plugs in the holes to cover the adjusting screws.

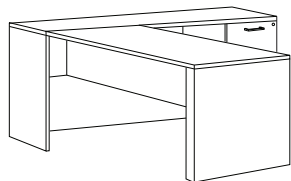

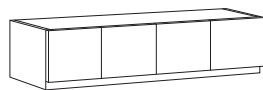

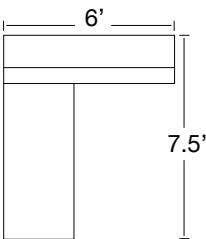

Installation instructions included with each case must be followed exactly.
