

MOD1-H21

MOD1-M12

What is unique about this chair is that even with the emphasis on an ergonomically-correct design and posture, Modena provides a rich comfort experience. One that far outshines that provided by plastic, mesh and other low-cost approaches. The art and science of creating beautifully-upholstered seating is a hallmark of Krug design.

The modern workplace needs increasingly sophisticated solutions. Utilizing the latest design and manufacturing technologies, we've created an ergonomically advanced seating design – yet one that also provides a luxurious level of comfort and detailing.

With extensive consideration of anthropometric principles, the contoured form of Modena has been painstakingly created. This process involved both virtual and physical modeling systems, with human subjects of various sizes and shapes. Support of the body's thoracic and lumbar regions is particularly emphasized with this design. The result is an incredibly comfortable and supportive chair, for both short and long-term seated activity.

Modena has purposeful lightness of scale and weight, accommodating the trend to smaller workspaces, and allowing effortless movement by the user. For these same reasons it is the perfect conference and meeting room chair with its slim width and optional swivel-tilt mechanism.

The unique, slender arm profile is both an aesthetic and functional complement. Its forward slope considers the need to fit underneath worksurfaces and tables, and to ensure correct sitting posture. Options include beautifully detailed leather-wrapped arms fully-upholstered closed arms, tactile soft urethane arms, and urethane arms with an upholstered pad.

Modena is available with a knee-tilt mechanism, both with tilt tension adjustment and height adjustment. Two sizes – mid-back and high-back – complete an extensive range of options.
