

## BOSCO

BOSCO stands above other wood porcelains with a superior aesthetic, unique texture, and nuanced color. We searched the market to find the most interesting material and when our Founder and CEO, Nancy Epstein, found BOSCO she knew she had an exceptional product.

While natural wood has real beauty, its applications come with real limitations. Why limit yourself? BOSCO porcelain offers the best solution to enhance any environment. Nothing is more perfect than having the look and feel of real wood with the durability and ease of maintenance of porcelain. Unlike wood, porcelain is perfect for high-traffic and wet areas. Let it stand out in your home or commercial project.
