

Means of Expression

## **CHAT BOARD® Means of Expression - to draw everyone's eyes and attention**

CHAT BOARD® by Focus Products A/S is a Danish family-owned company, founded in 1982. The whole product range is designed, developed and manufactured in Denmark.

CHAT BOARD® products are multi-functional magnetic glass writing, posting and drawing boards perfect for creative, learning, planning and brainstorming environments. These can be of use in any corporate or personal space where people have information to remember, share, express or illustrate. Whilst they are practical communication tools, CHAT BOARD® products are equally aesthetically pleasing, designed to blend with existing stylish interiors and colour schemes

CHAT BOARD® wants to give the solution to a challenge: The creation of a room that allows you to express yourself in the exact way you wish to and to perfectly match your own identity and your company's corporate design.

The distinct design, the great richness of colours and the elegant surface have made these products the preferred choice for architects, interior designers and private individuals all over the world. The unique and innovative products allow practical function and aesthetics to co-exist. This combination of decoration and design of modern corporate headquarters and stylish homes helped CHAT BOARD® to quickly become a very popular brand.

Incredibly versatile, the CHAT BOARD® products come in a variety of sizes, shapes and options. Today, the product range has been significantly expanded with manufacturing CHAT BOARD® Mobile, Wardrobe, Table, Planner, customer specific design solutions and printed glass. CHAT BOARD® has today grown into an international brand with worldwide exports. CHAT BOARD® represents the qualities and values that have made Danish design so famous and in strong demand globally.
