

Description

Polytec Gloss is a premium plus, single component, high performance architectural and light industrial coating, which is uniquely formulated with a combination of high performance self-crosslinking acrylic and polyurethane polymers fused with proprietary resin technologies. This product was developed for use over a wide variety of surfaces which include ferrous and non-ferrous metal, wood, concrete, masonry, aged alkyds and various plastics. It has a wide application window, can be used under extreme environmental conditions and as a direct to metal (DTM). It offers excellent flash rust/early rust and long term corrosion resistance as well as resistance to abrasions, stains, moisture and both household & industrial chemicals. It has excellent color & gloss retention and does not yellow, is fast dry and suitable for use in USDA inspected facilities. It is environmentally responsible with a VOC of <50 g/l with very low odor making it an excellent product choice for interior applications.

Recommended Uses

Interior and exterior architectural and light industrial applications including application over metal doors & frames and wrought iron surfaces of all types. It can also be used over properly prepared concrete/masonry, wood, many commercially available plastics and ceramic surfaces.

Colors

White and Black

Bases: P, D and A

Packaging

One and five gallon containers

Finish

Gloss, sheen @ 60° = 75.0% (+/-5.0%)

Surface Preparation

Surfaces must be clean, dry and free from all contaminants that may impair adhesion. Some metal surfaces such as galvanized metal may need to be acid-etched and cleaned of acid residue. Glossy or slick surfaces must be scuff sanded prior to application of paint coatings and may require priming.

Primer

Concrete/Masonry:	4600 Uniprime II
Wood:	6600 Aqua Lac
Ferrous/Non-Ferrous Metal:	9600 Protec Metal Prime White
	9610 Protec Metal Prime Red Oxide
Galvanized:	4800 Metal Pro White
	4810 Metal Pro Red Oxide

Application

Brush, roll or spray. Ambient and surface temperatures must be above 55°F and relative humidity below 80%. Clean tools with soap and water.

Drying Time

Touch:	1 hour
Recoat:	6 hours

Coverage

300 - 350 sq. ft. per gallon, depending on surface.

Mill Thickness

Wet = 5.0	Dry = 2.0
-----------	-----------

Thinning

Use water sparingly.

Composition

Titanium Dioxide	14.7%
TOTAL PIGMENT	14.7%
Proprietary Resin	27.0%
Additives	4.7%
Water	53.6%
TOTAL VEHICLE	85.3%

Weights & Measurements +/-3.0%

Solids by Volume:	35.0%
Solids by Weight:	44.5%
VOC:	<50 g/l
Weight Per Gal:	9.72 lbs.
Viscosity:	100 - 110 KU

Testing

Adhesion (ASTM D 3359-97)	
on steel panel	0% removal
Prohesion (ASTM D 5894-96)	
on steel panel (1000 hours)	No Corrosion
Humidity Resistance (ASTM D 4587-91)	
on steel panel (100 hours)	10 (no effect)

Conformance

SCAQMD - complies with Rule 1113, Architectural Coatings
LEED - complies with LEED 2009
