# FASCIA WASH

## 400 SERIES

**GENERAL DESCRIPTION:** The Gardco Fascia Wash is a wall mounted luminaire utilizing high intensity discharge lamps. The contemporary soft form housing is available in a variety of architectural finishes assuring compatibility with the building. A precision refractor optical system provides dramatic illumination on vertical surfaces. Fascia Wash is suitable for outdoor applications and features rugged die cast construction, silicone seals and gaskets, and polyester powdercoat finishes.

# FASCIA WASH

## 400 SERIES

### SPECIFICATIONS

**GENERAL:** Gardco Fascia Wash wall mounted, outdoor luminaires utilize high intensity discharge lamps. Housing and door frame are die cast aluminum. Precision refractor optical system provides high light levels on the wall.

**HOUSINGS:** Housings are single-piece aluminum die castings. Integral cooling ribs on back and top section dissipate heat from electrical components extending ballast and lamp life. Memory retentive gasket seals housing with door frame to exclude moisture, dust, insects, and pollutants.

**DOOR FRAME:** Single piece die cast aluminum door frame is hinged closed and secured to housing with (2) captive stainless steel fasteners. Refractor lens is mechanically secured to door frame and permanently sealed with silicone gaskets.

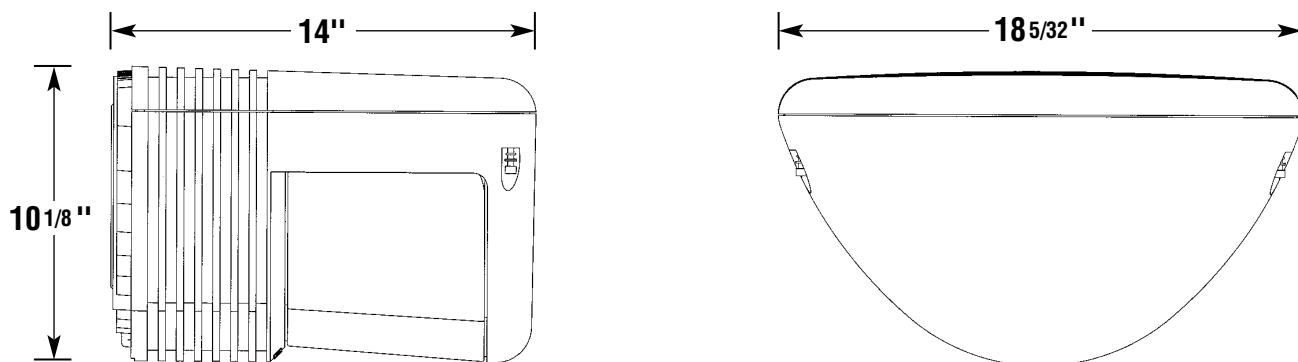

**OPTICAL SYSTEM:** Borosilicate glass refractor features prismatic elements precisely molded to refract light at critical angles providing required illumination on the vertical surface.

**ELECTRICAL:** All luminaires utilize magnetic HID ballasts that are high power factor and designed for reliable lamp starting to -20°F. Standard metal halide systems are pulse start for increased system efficiency, light output, and lamp life. Mogul base pulse rated sockets are glazed porcelain with nickel plated screw shells.

**FINISH:** Each luminaire receives a fade and abrasion resistant electrostatically applied, thermally cured, (TGIC) polyester powder coat finish. Special colors may vary.

**LABELS:** All luminaires UL or CUL (where applicable) Wet Location labels. Luminaires are Wet Location listed for mounting in any position, including downlight or uplight configurations.
