

Lighting control panel power supply.
Voltage specific transformer. Specify 120VAC or 277VAC
for the transformer voltage.

Typical relay wiring: Standard relay information.
Qty 4 - 20 amp 120/277VAC single pole relays
Available normally open
Individual status LED manual overrides
10 AWG maximum wire size
10 million operations
3 year warranty

The Ethernet Interface Module (EIM) and
Wireless Ethernet Interface Module (WEIM)
may be connected to any lighting control pane
in the system using the RS-232 cable included
120VAC wall transformer included

End user computers
can program any lighting control
panel via the Wireless Ethernet Interface Module (WEIM)
using the Keeper Enterprise software.
