

Model 1854-PH Snowball 2, Phlebotomy Midsize

Dimensions

Seat Height	18	Depth	26.75
Seat Width	22	Width	29.25
Overall Height	33	Arm Height	23-35

COM Yardage

Based on pattern repeats less than 5 in. x 5 in.

Unit	2
Seat Yardage	1
Back Yardage	1
Stacking	No

Options:

Wall saving	No
Connected	Yes
Tablet	No
Cal 133	Yes
Dolly	No

Frame construction

Constructed of high carbon content cold rolled seam welded flash controlled steel tubing free of crimping on all bends. Offered in 7/8" O.D. 14 Gauge tube. Stretcher bars are welded to the frame to provide seat support. All connections are metal to metal. The back to back sled is made of cast aluminum and is attached to the chair leg ends using a 5/16 in. threaded glide.

Seat

The upholstered seat foundation is made with 100% recycled plastic with upholstery covers form fitted and stapled over 1 inch thick hi-resiliency polyurethane slab cut foam. The 100% recycled plastic platform covers the staples, making the seat tamperproof, easy to clean.

Back

The upholstered back foundation is based on a 3/8 in. thick, 6 ply laminated contoured plywood core platform with upholstery covers form fitted and stapled over 1 inch thick hi-resiliency polyurethane slab cut foam.

Foam

Open cell cut foam is formulated displacing 25% of the existing non-renewable petroleum material with a sustainable plant based substitute. The foam performs as regular based cut foam and provides a 1.8 PCF density with no changes to the physical properties, comfort, and longevity of the foam.

Flame retardancy

Foam provided is compounded to meet specifications of the Federal Motor Vehicle Standard MVSS302 and California Bulletin No. 117 (TB117).

Glides

Frame feet are finished with durable injection molded plastic glides.

Sled Base Foot

An optional mechanically fastened die cast steel sled is available. The sled base foot is not available for stools or bariatric seating. The sled may be ordered for factory prepared frames or field installed. The sled foot can be painted any colour shown on our colour card.

Arm Panel

The Phlebotomy arm panel is comprised of 1/2" cut foam that is made with 25% renewable plant based material. Foam is upholstered and attached to 1/2" plywood panel. The arm panel is attached to an adjustable chrome column, with a quick release that allows the user to adjust both height and pivot.

Load Test

Exceeds BIFMA Seating Durability Test to 500 lbs
