

# BAUX TRÄULLIT MOUNTING INSTRUCTIONS

## MOUNTING WITH GLUE

The easiest way to mount BAUX Träullit is by gluing them directly to the intended surface.

### Instructions

1. Make sure the wall surface is flat and free from dirt, dust and moisture.
2. Draw one or more vertical and horizontal lines on the wall to use as a reference, in this way you ensure that the installation will be straight. Approximate distance from the corners is 200mm. Avoid mounting the BAUX Träullit panels near the floor because of the risk of being damaged by kicks and cleaning equipment. The recommended distance from the floor is 200mm.
3. Apply glue to the BAUX Träullit panel. Start mounting from the bottom, following your horizontal line.
4. Mount the BAUX Träullit panels edge to edge sideways, thus you ensure that the installation is straight.

For glue mounting of Träullit Decor, we recommend Casco superfix
