

Round or Square Type IC Adjustable Housing with Remote Transformer for Flangeless Trims

E3_L_-HAIR_

1.5

HALOGEN MR16 - ROUND/SQUARE FLANGELESS

GENERAL PRODUCT INFORMATION:

For insulation applications above R25, no branch circuits allowed.

This instruction shows a typical installation.

CAUTION - RISK OF FIRE

This product must be installed in accordance with the applicable installation code by a person familiar with the construction and operation of the product and the hazards involved.

Use minimum 90°C supply conductors.

Install the Housing with Adjustable Bars

NOTE: Skip this section if installing the housing with butterfly brackets.

- 1 Keep Tab for ceiling 1/2" to 3/4" thick.**
When using adjustable hanger bars with 1/2" to 3/4" thick ceilings, leave the tab of the hanger bars in place.
Break off Tab for ceiling 3/4" or thicker.
When using adjustable hanger bars with 3/4" or thicker ceilings, remove the tab by bending it at the perforation.

- 2** Slide the inner adjustable bar completely through the three housing clasps. Make sure the nail is on top.
- 3** Slide and push the outer adjustable bar completely onto the inner adjustable bar so that the tab clicks into place behind the stop point. This will prevent the adjustable bars from coming apart.
- 4** Repeat steps 2 & 3 for the other side of the housing.

NOTE: The adjustable bars can be mounted to joists that are spaced 16" - 24" apart.

- 5 Align the bottom of the end plates with the bottom of the ceiling joists.
- 6 Level the adjustable bars and, with a hammer, tap the nails completely into the joists to secure the adjustable bars in place.

- 7 Adjust the trim holder position (horizontal position) by sliding the housing on adjustable bars.
- 8 When the desired location is achieved, tighten the two #6 self tapping screws to lock the housing onto the adjustable bars.

NOTE: Notches in trim holder can be used to align multiple housings using a laser or string.

Install the Housing with Butterfly Brackets

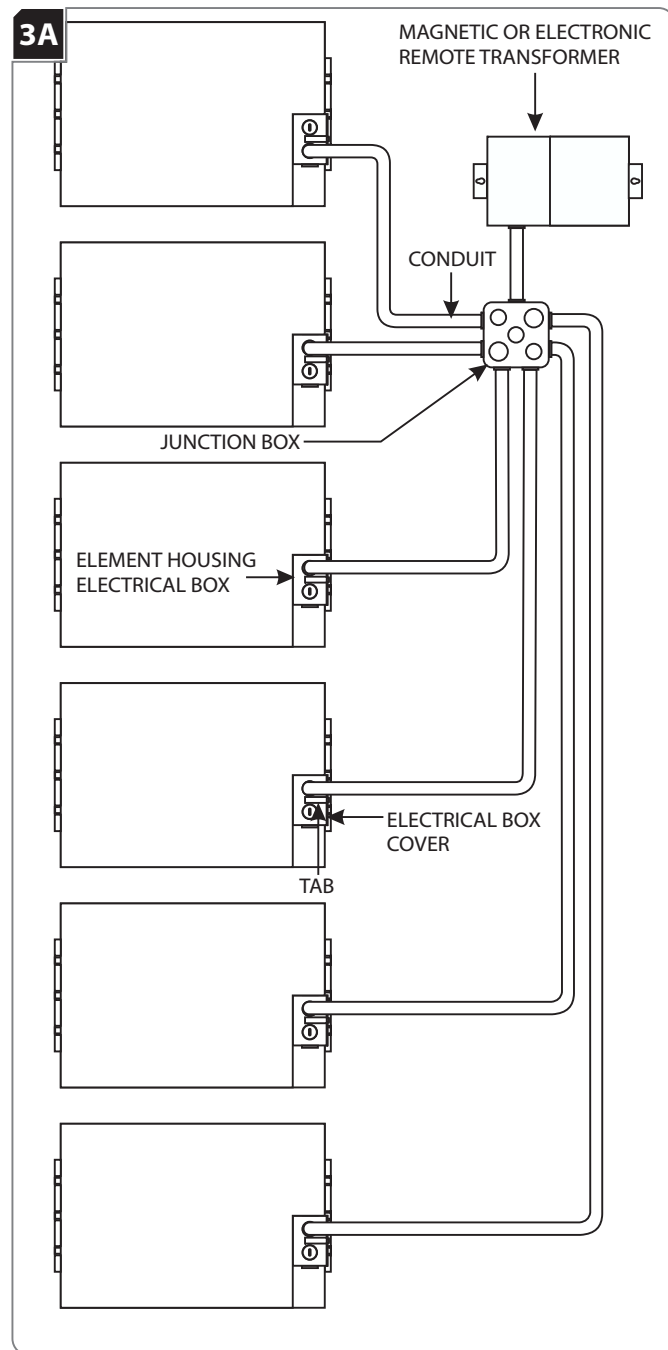

NOTE: Skip this section if installing the housing with adjustable bars.

- 1 Slightly loosen the wing nut to slide the butterfly bracket up or down.
- 2 After achieving the proper location, tighten the wing nut to secure the butterfly bracket in place.
- 3 Repeat steps 1 and 2 on for the other butterfly bracket.
- 4 Utilize the butterfly brackets to install the housing in accordance with local electrical codes.

NOTE: Notches in trim holder can be used to align multiple housings using a laser or string.

Connect Power to the Housings

- 1 For each Element housing, push the tab on the housing electrical box up and remove the electrical box cover.
- 2 Run conduits from remote transformer (via a junction box) to the each Element housing electrical box.
- 3 Branch the low voltage wires from the remote transformer (via junction box) to Element housings. For proper low voltage wire size, refer to the "Low Voltage Wire Size Table" provided in the remote transformer instruction.

WARNING: RISK OF FIRE: When using the housing electrical box for power feed through, use **MAX** 4 - #12 AWG, or 6 - #14 AWG branch circuit wires.

Install Drywall and Plaster Ring

- 3 Run the power line wires into the housing electrical box.
- 4 Connect the neutral power line wire to the white transformer wire with a wire nut.
- 5a If using a dimmer, connect the hot power line wire to the yellow transformer wire with a wire nut. **Make sure that the black transformer wire is disconnected, capped with a wire nut.**
- 5b If using a switch, connect the hot power line wire to the black transformer wire with a wire nut. **Make sure that the yellow transformer wire is disconnected, capped with a wire nut.**
- 6 Make sure that housing is grounded in accordance with local electrical codes.
- 7 Replace the electrical box cover. Make sure that the top edge of the cover snaps under the tab.

- 1 For round trims, mark a 3-7/8" diameter circle on drywall. Cut out the marked section.
For square trims, mark a 3-7/8" square on drywall. Cut out the marked section.

- 2 Align the cut out section of drywall with the trim holder and install the drywall.

- 3 Line up the two tabs in back of the plaster ring with the two cut out sections of the trim holder inside edge.
- 4 Push the plaster ring tabs into the cut out sections of the trim holder edge.

- 5 Secure the plaster ring in place with the two provided flat head #8-32 screws. Make sure that the screws penetrate through the drywall into the housing screw holes.

NOTE: Do not overtighten the screws! Overtightening may bend the plaster ring, causing the plaster surface to come away from the drywall.

- 6 Plug the trim holder with the provided dust shield.
- 7 Properly plaster onto the plaster ring and drywall.

- 8 Finish around the trim to match drywall.

Install the Lamp & Lens Accessories

5A

- 1 To release the lamp cartridge, rotate it counter clockwise and gently pull out the assembly.

5B

- 2 To install a lens accessory (optional), unscrew the snoot from the lamp cartridge.
- 3 Place a maximum of three accessories into the lamp cartridge.
- 4 Replace and tighten the snoot completely to the lamp cartridge.

5C

Use **MAX 50 Watt** Type MR16 Halogen Lamp.

- 5 Unscrew the lamp cartridge base from the lamp cartridge.
- 6 Pull out the socket from the lamp housing and feed it through the lamp base.
- 7 Push the lamp pins completely into the socket holes.
- 8 Place the lamp into the lamp cartridge and reinstall the lamp cartridge base and firmly tighten.

5D

- 9 Feed the socket wire sleeve back into the lamp housing and align the lamp assembly with the keyed slots on the lamp housing.
- 10 Place the lamp assembly into the lamp housing and rotate it until it locks into place.

Adjust the Lamp Housing

NOTE: The location of the height adjustment screw is indicated with the words Low and Hi.

- 1** To adjust the height rotate the height adjustment screw. Adjust upward to minimize glare and flash on the trim or downward for maximum light output and efficiency.

NOTE: Lamp housing can tilt 40° vertically. Lines on lamp housing are 5° apart.

- 2** To tilt the lamp housing vertically, rotate the tilt adjustment screw until the desired angle is reached.

NOTE: Lamp housing can rotate 361° horizontally.

- 3** Pull the rotation lock down to unlock the lamp housing.
- 4** Rotate the lamp housing horizontally. When the desired position is achieved push the rotation lock up to lock the lamp housing in place.
