Manufactured in the UK, Camira Wool is a totally natural, renewable and sustainable wool that gives task and soft seating a contemporary edge. Camira's most sustainable fabric ever is a unique blend of pure new wool and nettle fibre, creating an unrivalled environmental profile with inherent fire retardancy. The fibres are extracted using an environmentally preferable mechanical decortication process instead of separating them from the woody core by soaking them in chemicals or water. The Blazer range is made from 100% Lanev wool, sustainably produced and traceable right back to the individual farms in New Zealand. Totally natural and renewable this contemporary fabric has a great palette of both solid and melange shades.
