FABRIC 2B

Velvet has historically been a rich, expensive fabric, made on special looms most often from silk. It is plain on the back, thick and soft on the front, and its texture has led to the word's use as an adjective to describe something soft and smooth. Aside from being a super comfortable fabric, velvet can instantly raise the stakes in a room with its rich and luxurious feel. Even pieces that do see a little wear and tear can ultimately add unequivocal character to a room's overall look.
