

CARE & MAINTENANCE

Jury Base Seating

June 22, 2012

General Maintenance

KI Jury Base Seating requires minimal maintenance. Period inspection of the seat swivel collar, the seat shell to spider attachment and the floor anchor bolts for tightness should be performed every four to six months.

Seats and Backs

The plastic seats and backs can be kept clean with a soap and water solution.

Fabric Upholstery

Periodic light cleaning is all that is necessary. Be certain to vacuum upholstery frequently and thoroughly. Stains and spots may require a more thorough cleaning. Use a foam-type cleaner or a spot and stain remover designed specifically for upholstery fabrics. Always follow the manufacturer's directions for application and test areas.

CAUTION: Do not use dry cleaning agents on upholstery, or a coarse cloth when applying cleaning agents to smooth surface fabrics.
