

noraplan<sup>®</sup> **valua**

INSPIRED BY NATURE.  
PERFECTED FOR HEALTHCARE.

**nora<sup>®</sup>**

Imagine a floor that brings  
the beauty and serenity of  
nature indoors.

A healing environment that exudes warmth, quiet and a sense  
of place for health and wellness.

Imagine noraplan<sup>®</sup> valua.

The embodiment of nature-inspired texture and detail, noraplan valua carries the soothing outside elements of nature indoors while meeting the combined values of ultra-durable performance and well-being for today's patient-centered spaces.

# Inspired by nature ...

## Perfected for healing

The best healing environments encompass the emotional needs of patients and families. Let the healing power of nature transform your hospital with noraplan® valua. Rooted in the Finnish word for “flow,” ‘valua’ perfectly conveys the natural movement of rubber as it flows from the tree. Exuding the elements, shades and surfaces found in the great outdoors, it supports curative design that reduces noise levels and increases ergonomic comfort while eliminating PVC and plasticizers (phthalates) to further contribute to a healthy atmosphere.

## Perfected for you

Through a series of architect and designer workshops held worldwide, we collected the valued opinions of our client partners. We realized the very real demand for a product line that felt welcoming and organic while still meeting the stringent safety and maintenance requirements of healthcare environments, specifically occupied patient spaces. The resulting collaboration was a product inspired by nature and perfected for today’s healthcare demands. Available in sheet and plank format as well as two design options offering varying degrees of contrast, noraplan valua offers the versatility to be used in any number of healthcare applications including patient and public settings.

## Perfected for patients

Patient healing requires spaces that support comfort and recovery. The tranquil, acoustic and ergonomic qualities of noraplan valua improve patient well-being and support every aspect of the healing process. Dramatically reduced maintenance eliminates the need for harsh chemicals, additional coatings and disruptive cleaning processes to support healthy indoor air quality and provide uninterrupted rest to patients. Inherent bacteriostatic and fungistatic properties make the flooring optimally suited to aid in infection control.

## Perfected for first impressions

A patient-centered healing experience starts the moment you first step into a healthcare facility. Invoke a feeling of safety and comfort from the start by implementing noraplan valua into your reception areas, waiting areas and open spaces. Ideal for high-volume use, noraplan® valua floor coverings are designed to maintain their appearance for decades. A calmingly tranquil color palette of 32 nature-inspired hues allows for seamless integration into your existing hospital blueprint. A harmonious blend of natural impressions and high performance, noraplan valua exceeds today's healthcare demands.

# Color spectrum

Choose from two unique design options that offer varying degrees of contrast combined with a seamless natural texture. Heat welding is not required.

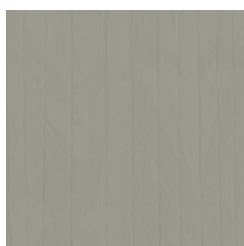

Rejuvenate any environment with a range of nature-inspired hues: 24 marbled, eight complementary accents and six plank colors available in three sizes for maximum design flexibility.
