KIRKOS...striking form with more variety

Kirkos now offers more variety to its one-piece plywood shell with five new base introductions. These additions have increased the chair models to twenty unique offerings.

From stylish side chairs with pedestal bases...to functional seating with casters...Kirkos offers just the right combination of base, veneer or laminate, and base design to suit many areas of the contract market.

KIRKOS...six base selections

Kirkos now offers more variety with five new bases. In addition to the original four-leg base the option of a pedestal, five-prong glide, five-prong caster, swivel, and cross base is now available in all veneer, laminate and upholstery options.

The four-leg base gives the option of stacking whether the style is upholstered or all wood. A white seat pan is added to the bottom of an upholstered chair seat to protect the upholstery from getting damaged. The all veneer chairs have translucent stacking bumpers to protect the finish from scratching. The all veneer shell has the ability to stack six high and upholstered shell can stack four high.

The convenience of a Transport Trolley is offered that stacks chairs 4 high in upholstery and 6 high in veneer or laminate.

KI-Trolley-TB holds 6 Veneer or 4 Upholstered Chairs

below - left to right:: KI-7840-BB-CH Fully Upholstered Insert with Cross Base / 3000 Maple, KI-7130-OA-CH Upholstered Seat & Back with Pedestal Base / 8100 Oak, KI-7010-WW-CH All Veneer with Four Legs / 9000 Walnut / Chrome, KI-7510-OA-CH All Veneer with Four-Leg Swivel Base / 8100 Oak, KI-7620-BB-CH Upholstered Seat Pad with Five-Prong Glide Base / 2100 Beech, KI-7710-OA-CH All Veneer with Five-Prong Caster Base / 8100 Oak. All in Chrome.

KIRKOS...pushing the limits in bent-plywood technology

The extraordinary design of the Kirkos shell takes one piece of plywood and molds it into an encircling shape and is then pressed together and connected on the seat bottom. This compression of the shell must be controlled by the quality of the veneer and uniqueness of the mold that shapes this chair. Kirkos employs a unique bent-plywood technology that allows for the shell to form a complete circle when arms are attached. The chair is available in four variations — all wood, wood with seat pad, wood with seat and back pad, and fully upholstered insert.

To emphasize this unique shape, the name given to this chair — KIRKOS — is the Greek word that means to encircle, which is exactly what the chair does to the user.

Single shell offers open handle area to move chair in cafeteria environment.

One-piece shell is offered in KI-White and KI- Grey laminates.

front to back: KI-7010-MM-CH / 7000 Maple, KI-7010-OA-CH / 8100 Oak, KI-7010-BB-CH / 1000 Beech, KI-7010-OA-CH / 8000 Oak, KI-7010-BB-CH / 2100 Beech, KI-7010-BB-CH / 2200 Beech. All in Chrome.

KIRKOS...three upholstery techniques

In addition to an all veneer shell Kirkos is offered in three different upholstery treatments. The three styles offered are upholstered seat pad, upholstered seat and back, and a fully upholstered insert. The fully upholstered insert requires very tight craftsmanship of upholstering an interior shell that is matched with the exterior shell to form a smooth connection.

Thick fabric with heavy woven textures, tapestries, or very thick leathers are not recommended for the interior upholstery technique.

KIRKOS...tables for dining or meeting

To enhance the Kikos Chair Series, Davis has introduced a table collection with a unique textured stainless steel wrapped base. Tops are available in three sizes as a round or a square. Several veneers and laminates are available.
