F·T·N
Powering Business Worldwide

We make connections work *

Our vision is now your reality...

simplified connected lighting solutions for Buildings, Communities and Homes

Eaton's portfolio of connected lighting solutions leverages the real-estate of the physical light fixture to increase building, business and community operating efficiency through controls and data. With connected lighting solutions, we go beyond controlling light to solve higher complexity problems enabled by sensing and communication capabilities within the light fixture itself.

With innovation you can rely on, and connections you can build on; that's how Eaton makes connections work

- **Distributed Low-Voltage Power System (DLVP)**
- **Power over Ethernet (PoE)**
- **LumaWatt Pro Connected Lighting System**
- **WaveLinx Wireless Connected Lighting System**
- **ConnectWorks Connected Lighting System**
- **Halo Connected Home**

F·A·T·N
Powering Business Worldwide

Distributed Low-Voltage Power System (DLVP)

Line-voltage in. Low-voltage out. The low-voltage power system that's practically plug and play. No more struggling to find qualified electrical labor for your job site. No more waiting weeks for commissioning teams. No more compliance woes. Eliminate costly project delays with our groundbreaking Distributed Low-Voltage Power System, and save up to 20% on the total installed cost of your LED lighting and controls system.

**Fast Install.
Big Savings.**

Cut ties with complexity.

Low-voltage power module
Power modules create safe low-voltage circuits to power and control LED lighting fixtures

+

Lighting fixture with integrated sensor
Highly efficient low-voltage LED fixtures

+

Low-voltage lighting cable
Low-voltage lighting cables provide power and communications to DLVP LED lighting fixtures

=

up to
20%
REDUCTION
in total installed system cost

Power | **Light** | **Connect**

WaveLinx
Wireless Connected Lighting System

Wireless, code-compliant, and cost-effective for today. The WaveLinx Wireless Connected Lighting System has the most out-of-the-box functionality on the market. It's also one of the easiest connected lighting system to install and manage. It's simple: WaveLinx just works.

- Easy to install
- Easy to secure
- Easy to scale
- Easy to commission

● Simple. Secure.
Complete System.

It simply works.

Wireless area controller

Provides centralized coordination of multiple area control options

+

Wireless wall station/ receptacle

Provides wireless control of multiple and local areas

+

Lighting fixture with integrated sensor

Highly efficient LED fixtures

+

Mobile applications

Provides personalized, local control from a tablet or smartphone

=

up to
40%
SAVINGS
on lighting energy costs

Power	Light	Connect

LumaWatt Pro
Wireless Connected Lighting System
powered by Enlighted

Intuitive. Intelligent. Integrated. Lighting infrastructure exists everywhere. The LumaWatt Pro transforms a lighting system into an IoT infrastructure with limitless potential to keep up with the growing service demands of people, property and resources. LumaWatt Pro is a distributed network of smart LED lighting fixtures with integrated sensing and beacon technology that captures real-time data; making your facility smarter so you can make smarter decisions.

- User-friendly software to manage data
- Asset tracking and other value-added productivity tools
- Compatible with both indoor and outdoor LED fixtures
- Energy manager that optimizes savings; so the system pays for itself

● **Sensing and Beacon Technology. Indoor and Outdoor.**

Better data. Better decisions.

Energy manager

Leverages building data to help you optimize your savings

+

Wireless gateway

Stores and transmits real-time building usage data

+

Lighting fixture with integrated sensor

An LED light source that doubles as a data collection point

+

Energy manager software

Use your data in energy manager, SPACE, AIRE, and other popular building resource programs

=

up to
70%
SAVINGS
on lighting energy costs

Power	Light	Connect

ConnectWorks
Connected Lighting System
powered by CIMCON

Capabilities that connect communities. ConnectWorks centralized wireless outdoor lighting management system helps unlock solutions to today's complex challenges and rising energy costs facing communities, cities and campuses. ConnectWorks makes it simple to wirelessly program and control a network of outdoor lighting to unlock maximum energy efficiency and less lighting outages. That means that the lights are on exactly when you need them to be; delivering better community safety...better community connections.

- Scheduling
- Real-time reporting
- Security and alerts
- Enterprise SW or SaaS
- Energy code compliance
- Maintenance and asset management

● Take control
of your outdoor lighting.

Simplified system.

Wireless lighting controller	Wireless gateway	Lighting fixture	Software services
Intelligent, wireless lighting controller	Communicates with cloud-based system	Highly efficient LED fixtures	Full status and control from Google Maps

up to
30%
SAVINGS
on lighting energy costs

Power	Light	Connect

Connected Home
Smart solutions for a connected home

Eaton's **Connected Home** offers Bluetooth enabled lighting and controls products that can be easily configured by using a smartphone or tablet. The system allows the user to securely connect, automate and control a variety of lighting and controls products throughout the interior and exterior of the home.

• Connects the power of HALO
• Simple configuration by using a smartphone or tablet
• System is fully functional with or without the internet
• Flexible features that can provide true energy savings

Connect, automate and control
your homes lighting

Connect the power of HALO.
