

DESCRIPTION

The Galleria luminaires beauty and versatility make it an excellent choice for roadway and general area lighting applications. An aesthetic reveal in the formed aluminum housing gives the Galleria luminaire a distinctive look while a variety of mounting options and lamp wattages provide maximum flexibility.

The Galleria luminaires superior light distributions makes it the optimum choice for almost any small, medium or large area lighting application.

SPECIFICATION FEATURES

Construction

HOUSING: Formed aluminum housing with stamped reveal has interior-welded seams for structural integrity and is finished in premium TGIC polyester powder coat. U.L. listed and CSA certified for wet locations. **DOOR:** Formed aluminum door has heavy-duty hinges, captive retaining screws and is finished in premium TGIC polyester powder coat. (Spider mount unit has steel door.)

Electrical

BALLAST TRAY: Ballast tray is hard-mounted to housing interior for cooler operation.

Optics

REFLECTOR: Choice of fourteen high efficiency optical systems utilizing horizontal and vertical lamp orientations. Optional high efficiency segmented optical systems constructed of premium 95% reflective anodized aluminum sheet. Optical segments are rigidly mounted inside a thick gauge aluminum housing for superior protection. All segment faces are clean of rivet heads, tabs or other means of attachment which may cause streaking in the light distribution. Standard with mogul-base socket. All optical modules feature quick disconnect wiring plugs and are field rotatable in 90° increments. **LENS:** Convex tempered glass lens or flat glass.

Mounting

Extruded aluminum arm includes internal bolt guides allowing for easy positioning of fixture during assembly. Specify arm-included mounting for contractor-friendly single carton packaging of housing and arm.

Efficiency Standards Notice

Select luminaires are manufactured to USA and California efficiency regulations.

NOTES:

- Customer is responsible for engineering analysis to confirm pole and fixture compatibility for all applications. Refer to our white paper WP513001EN for additional support information.
- Arm not included. See Accessories.
- Arm length varies based on housing size: 11-1/2" for GSM and 14" for GSL.
- Standard with mogul-base lamp sockets. Wattage availability varies by housing size, see wattage table.
- Requires reduced envelope ED-28 lamp when used with GSM housing and flat glass vertically lamped optics.
- Requires reduced envelope BT-37 lamp when used with GSM housing.
- Consult an Eaton representative for lamp/ballast type/voltage compatibility.
- Pulse start metal halide 150W 480V requires high reactance to meet EISA requirements.
- Multi-Tap ballast is 120/208/240/277V wired 277V. Triple-Tap ballast is 120/277/347V wired to 347V.
- Medium housing fixture only.
- Require reduced envelope lamps.
- Not available in 1000W or large housings.
- Must use reduced envelope lamp, not available in GSL housing.
- RW optic not available with flat glass.
- 1000W available only in reduced envelope. Not available in "RW" distribution.
- Other finish colors available, including a full line of RAL color matches. Consult your lighting representative at Eaton for more information.
- Quartz options not available with SL optics.
- House side shield not available with 5S, RW, AS, AR, SL and CA optics.
- Arm mount only, 400W maximum.
- Replace XX with color suffix.
- Use for mounting fixtures at 90° increments.
- Compatible with sag lens vertical optics only.
