

## DESCRIPTION

The Inverted Conical shade is a truncated cone providing a higher level of uplight illumination and a larger presence. The integrated LED light sources, available in 827, 830, 835 and 840 color choices, evenly illuminate the shade and bottom lens. Stem, canopy and finial finishes are available in many painted options. Shaper's Fabrique Collection is known for its high quality hand-tucked fabrics, heavy gauge steel frame, laminated styrene backing and minimal internal structure. 3 sizes of shade allow this design to be used in a range of applications. More than 8 standard fabrics, as well as the ability to customize, allow a designer to select a look to match any pallet.
