The New Fabrique Conical LED Series Pendants

Shaper is introducing LED to its Fabrique family of products in conjunction with the release of 5 new Shade designs, 5 brilliant new fabric colors and 5 printed wood grains. Integral LED sources offered in four color temperatures are used to create a more energy efficient product with highly uniform illumination. LED is now offered in the new shade designs as well as the traditional 102 drum and 106 & 107 cylinder pendants. Our hand-tucked fabric shades offer a

refined look for the most discriminating customer. Our silk and linen, textured and vinyl-coated fabrics are the broadest standard fabric offering in the industry. Delicate finials and canopies are available in a wide variety of hand-crafted metals finishes only available through Shaper.

140-Furl-Three Overlapping Panel Conical Pendant
