

New and Improved Emergency Battery Packs

- Extended linear fluorescent lamp life with sinusoidal AC lamp current and low voltage disconnect
- Increased compatibility with low mercury lamps
- Improved fixture compatibility with reduced size and profile
- Terminal block design
- Available in three lumen packages: 450, 700 and 1400

EBP – Emergency Battery Pack

Fluorescent Battery Back-Up

Features + Benefits

Sinusoidal Output - The lamp-friendly EBP product line provides a very clean sinusoidal lamp current with a high current crest factor, which extends lamp life versus the older distorted current pulsed DC output models.

Compatibility - Provides compatibility with low mercury lamps, including T5 lamps. Sinusoidal AC output provides more even illumination of the entire length of fluorescent lamp, when compared to pulse DC mode, and enhances mercury migration and lamp rectification.

Reduced Size - Canister has a reduced profile across all EBP product types (now approximately 9 inches in length), which enable more mounting flexibility, including most 2' x 2' fixtures. Wire bundle covers are included for external mounting.

Terminal Block Connections - Terminal block design provides easier, faster and better connections versus the old industry standard. Enable a more efficient wire usage and reduce cross-talk potential across a bundle of wires.

Battery - High-temperature nickel cadmium battery pack standard on all EBP450X and EBP700X products. High-temperature nickel metal hydride battery pack standard on all EBP1400X products.

Warranty - Backed by a full five-year warranty against defects in material and workmanship (excluding lamps).
