

DESCRIPTION

SLX Series LED exit is a steel unit suitable for commercial, institutional, and multi-housing applications. With the new advanced standard features and industry leading innovations, they are now the most universal, energy friendly, easiest to stock and install, and safest Exits in their class.

SPECIFICATION FEATURES

Electrical

- General Features

- Field selected red and green sign capability standard on all units (units shipped red, field convert to green with supplied parts)

- Dual Voltage Input 120/277 VAC, 60Hz

- AC Only

- Optional 2C (Two circuit, FTBR) available in 120/277 VAC in standard and emergency operation

- Self Powered

- Sure-Lites EZ Key patented external battery disconnect feature

- prevents unnecessary battery drainage, saves on installation time

- Solid-state Voltage Limited Charger

- Brownout Circuit

- Low-Voltage Disconnect

- Test Switch/Power Indicator Light

- Standard 24 hour recharge time (max)

- Eagle Eye™ Self-Diagnostic Standard

Housing Construction

- 20-gauge steel housing

- Universal pattern knockouts on rear for direct mounting to junction box

- Knockouts for chevron directional indicators

- Canopy allows ceiling or end Mounting

- Universal styles offer complete installation flexibility with canopy, backplate, and two stencil faces

Battery (Self Powered Only)

- Sealed Nickel Cadmium

- Maintenance-Free, Long-Life

- Full Recharge Time, 24 hrs. (max)

Code Compliance

- UL 924 Listed

- UL Damp Location (0-40C)

- Life Safety NFPA 101

- NEC/OSHA

- Most State and Local Codes

- NOM Certified

- UL Listed for 2C (FTBR)

Warranty

- Exit – 1 year

- Battery: 5-Year pro-rata

Lamp Data

- AC LED: Red and green LED lamps provide uniform diffused illumination

- DC: Red and green LED DC lamps (Brighter in emergency mode)

ORDERING INFORMATION

Sample Number: SLX7, SLX7SD90, SLX6SR2, SLX7SD23050

[Options for non-EXIT signs]	
Family SLX=Steel Exit, LED	Face Options Blank =Single and Double S =Open Face for Signage (single face, White housing only) Housing Finish Blank =White BK =Black
Series 6 =AC Only 7 =Self Powered	Features Blank =No additional options 2C =Two Circuit Option (SLX6 only) SD =Self Diagnostics Standard (SLX7 only) SD90 =Self Diagnostics with Fire Alarm Interface Capability (SLX7 Only)
Signage Options (Color) Blank =EXIT sign R =Red letter, Red LED G =Green letter, Green LED B =Blue letter, White LED	Signage Options (Common Signs) Blank =EXIT sign 1 ="AREA OF RESCUE" 2 ="SALIDA" 3 ="STAIRS" 4 ="AREA OF REFUGE" 5 ="IN USE" 6 ="NOT AN EXIT" 7 =(WHEEL CHAIR SYMBOL) 8 ="X-RAY ON" 9 ="LASER IN USE" 10 ="DO NOT ENTER"

Notes:

- Consult factory for additional custom signage options.
- Blue Letters, White LED does not have the "SD" option.
- Units ordered with "Salida" signage (e.g., SLX6SR2) will use a steel stencil that outlines the word "Salida", while all other signage options will be open-face.

TECHNICAL DATA

Lamps

SLX Series Exits use energy efficient, long life LED's to provide uniform diffuse illumination of the exit face. These red and green LEDs require no maintenance and consume less than one watt, on average.

Housing Construction

Exit housing is constructed of durable 20-gauge cold rolled steel with corrosion resistant polyester powder coat paint finish. All exits can be mounted and wired through knockouts located on the top and side. Surface mount back panel has knockouts for direct mounting to junction box. The mounting canopy is made of impact resistant thermoplastic with complementary finish. Stencil face exits are supplied with knockout chevron directional indicators for easy conversion to directional exits. Exit stencil and backplate install in channels in the exit housing to eliminate light leaks.

Lenses

Lenses for the SLX Series Exits are made from durable, impact resistant polycarbonate. All exit faces are designed with full 3/4" stroke snap-out or snap-in chevron directional indicators to insure maximum visibility and compliance with the latest codes. Units come with red lenses installed and green lenses included for field selectable red or green signs.

Sure-Lites EZ Key External Battery Disconnect (Self Powered Only)

Patented technology that allows installers to externally control the battery connection. Better than line latching, allows installers to choose when the battery is connected so that it stays fresh longer. Allows battery to be disconnected after installation but before building is occupied, enabling emergency circuit to be shut down for power savings.

Brownout Circuit (Self Powered Only)

The brownout circuit on Sure-Lites' exits monitors the flow of AC current to the exit and activates the emergency lighting system when a predetermined reduction of AC power occurs. This dip in voltage will cause most ballasted fixtures to extinguish causing loss of normal lighting even though a total power failure has not occurred.

Solid-State Transfer (Self Powered Only)

The SLX Series Exit incorporates solid-state switching which eliminates corroded and pitted contacts or mechanical failures associated with relays. The switching circuit is designed to detect a loss of AC voltage and automatically energizes the lamps using DC power. Upon restoration of AC power, the DC power will be disconnected and the charger will automatically recharge the battery.

Low Voltage Disconnect (Self Powered Only)

When the battery's terminal voltage falls, the low-voltage circuitry disconnects the lighting load. The disconnect remains in effect until normal utility power is restored, preventing deep battery discharge.

Test Switch/Power Indicator Light (Self Powered Only)

A test switch located on the side of the exit permits the activation of the emergency circuit for a complete operational systems check. The Power Indicator Light provides visual assurance that the AC power is on.

Sealed Nickel Cadmium Battery (Self Powered Only)

Sure-Lites sealed nickel cadmium batteries are maintenance-free with a life expectancy of 15 years. The sealed rechargeable nickel cadmium battery offers high discharge rates and stable

performance over a wide range of temperatures, from 0-40° C. The specially designed re-sealable vent automatically controls cell pressure, assuring safety and reliability. This battery is best suited for harsh ambient temperatures because the electrolyte is not active in the electrochemical process.

"2C" (AC Only)

The "2C" Option enables the Exits to operate per the requirements of UL 924 when connected simultaneously to both normal and emergency power circuits (two circuit operation-UL Category FTBR-Emergency Lighting and Power Equipment). The "2C" Option is a factory assembly change which alters the standard Exit such that it complies with and is UL Listed under the FTBR Category. This option should only be used for exits which are intended to be connected simultaneously to normal and emergency power circuits. Both circuits have universal 120/277 VAC standard.

Eagle Eye™ Self Diagnostics Standard on SLX7

The self-diagnostic unit will automatically perform all tests required by UL924, and NFPA 101. The system indicates the status of the exit at all times using the LED indicator near the test switch on the side of the unit. A 90 minute battery power (emergency mode) simulation test will occur randomly once every 12 months. A 30 second battery power simulation test will occur every 30 days.

Warranty

All Sure-Lites' products are backed by a firm one-year warranty against defects in material and workmanship. Maintenance-free, long-life, sealed nickel cadmium batteries carry a fifteenyear pro-rata warranty.
