Introduction

A Note on the Organization of This Book

There are a few signals that will help you understand the organization of this book. Once you know them, you should be able to find your way around easily.

Like a newspaper, this book is formatted with columns of text and illustrations that run vertically.

Information wraps from one column to the next and continues for as many pages as it needs to.

Black bars are clues.

A black bar at the top of a page signals the start of information about a product.

This information is divided into two sections, each signaled by a black bar. Product Information includes a description, additional notes, and dimensional drawings. Specification Information, which always begins at the top of a column, includes a series of steps. Each step represents a decision you need to make in order to complete your product number. Steps must be followed sequentially. The number of pages needed to complete information on a product varies; some will be complete in one page; others may fill three or four pages. Just continue going through the steps until you run into the next product, signaled by the black bar at the top of the page.

Black tabs running along the outside edge of the page help you locate what section you are in or what section you want to go to. You can thumb forwards or backwards to find a section; tabs and text appear on both sides of the page.

The additional pages in the back of the book include the appendices and indices. They are signaled by a long black bar running along the outside edge of the page.

The index is presented two ways.

The first index is in alphabetical order by product name. It can be helpful if you are new to the products and numbering scheme or if you are looking for a type of product, such as work chair or round table. The second index is by product number. It lists, in alphanumeric order, the base product number, typically a five-digit number.

General Information

This book is effective April 3, 2017, subject to change without notice. Products may be purchased from authorized Herman Miller dealers who will quote prices upon request. For more information about our products and services or to see a list of dealers, visit www.HermanMiller.com.

All prices are list prices. Additional services, such as planning services, design, storage, and installation, are not included and must be added to these prices when the additional services are requested.

Illustrations, specifications, and prices are based on the latest information at the time of publication. The right is reserved to make changes at any time without notice in prices, fabrics, finishes, materials, specifications, and models, and also to discontinue models and finishes.

Dimensions shown in the drawings are engineering drawing dimensions rounded up to the nearest $1/8''$. Product is shipped set up or knocked down. Products that include "Shipped knocked down" in the description require some assembly. If this statement does not appear in the description, the product is shipped assembled.

Service problems are normally handled by a Herman Miller authorized dealer. Where this cannot be accomplished on a local level, service problems should be referred to the Customer Care Representative for your region, Herman Miller, Inc., Zeeland, Michigan 49464.

Ceiling Entry Support Panel   C1156.
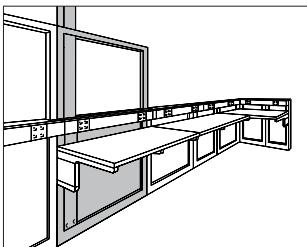

Product Information

Description

This panel has a vertical raceway for routing and concealing electrical wires and communication cables between the ceiling and a wire chase rail. It has a 48″-high recessed filler, hanger frames at 1″ intervals to support components, and 6 knockouts: 3 at the floor level and 3 at 47″ above floor level. It cannot accept the 3- or 4-circuit electrical system and cannot be used with an Action Office® Series 2 corner connector.

Notes

To carry different types of electrical power (e.g. regular and emergency power) or to carry electrical power and low-voltage cables, vertical raceway can be divided into separate internal raceways; contact local contractor.

To supply power from both sides of panel, order wire chase rail (C1313. or C1314.) separately and mount 48″ above floor.

For power feed to wire chase rail mounted at heights other than 48″, field cut removable cover on 1 side of vertical raceway.

Order draw rods (AO215.) or seismic draw rods (CO215.) separately.

To attach panels of unequal height, order change of height draw rods (AO219.) and change of height panel/panel finished ends (AO272.) separately.

To join 2 support panels of equal or unequal heights at a 90° angle, order 2-way 90° corner connector (C1221.) separately.

To join 3 support panels of equal or unequal heights at a 90° angle, order 3-way 90° corner connector (C1231.) separately.

Basic Work Table Base   C460G.

Product Information

Description

This freestanding table base is available at seated height (29″ high) and standing height (36″ high), has 2 C-legs, a steel modesty panel, and 1″ adjustable glides. Base finishes come in both metallic and standard healthcare finishes. Work table surface and available reagent shelf are ordered separately. The table has a load capacity of 500 pounds when weight is evenly distributed. Shipped knocked down.

Notes

If casters are desired at initial purchase, Options is recommended as a solution to maintain 29″ and 36″ heights. Casters are also available as a service part if replacing glides with casters is desired in the future.

At lowest glide adjustment, actual height of table with glides and work surface is $28^3/_4$″ for a 29″ seated-height table base and $35^3/_4$″ for a 36″ standing-height table base. Actual height of table with casters and work surface is 31.4″ for a 29″ seated-height table base and 38.4″ for a 36″ standing-height table base. Order casters as a service part.

Clearance from front of table to modesty panel is $24^1/_4$″ for a 30″-deep work surface and $18^1/_4$″ for a 24″-deep work surface.

Order work table surface (C4700.) separately:
• 24″ and 30″ depths, and 48″, 51″ (left and right), and 60″ widths are compatible with table bases 24″ deep × 48″ wide.
• 60″ wide work table surface overhangs on center of a 48″-wide table base.
• 51″ wide (left and right) work table surfaces overhang left or right of a 48″-wide table base.
• Order drawer bearers separately, with work table surface.

Order separately:
• Work table reagent shelf (C4900.).
• Cord cleat (G1331.).
• Cable management trough (AO382.).

To accommodate a refrigerator, a 36″-high table base is recommended. Refrigerators 21.34″ wide or less can be used with 1 set of adjacent drawer bearers for a 3″ or 6″ drawer (CO207, CO208) only.

Due to the nature of the paint for metallic finishes (CN, MS), the end finish is more prone to show a light blemish or texture change on the top of the table foot when light hits it directly. This is normal as a result of the metal transition from the weld underneath.

Packaging/Keyed-Alike
Information — Co/Struc® System

Packaging

Packaging varies according to individual product. A surcharge may be added for special packaging requests. Contact Customer Care for specific information.

Keyed-Alike Locks

All components with locks may be specified keyed alike.

Keyed-alike Co/Struc® components with a "CO" or "CV" prefix will be shipped with lock plugs installed. Mobile Technology Support products (CO600, CO601, and CO606) cannot be ordered keyed alike.

Keyed-alike Co/Struc components with a "C" prefix will be shipped with lock chassis installed. Lock plugs will be shipped separately, tagged for product and location as specified. Installation of lock plugs will be on-site according to instructions provided. Herman Miller, Inc., will not be responsible for lock plug installation.

To order keyed-alike locks for "C" prefix components, specify keyed alike. Then place a separate order for plugs and locks:

1. List plug part number and key number (232092-XXX); select a key number (or numbers) between 226 and 324.
2. List quantity of locks per key number.
3. Indicate this is a no charge order.

Keyed-alike locks are field installed.

A Medeco master key can be used to open any lock on Co/Struc components with a "CO" or "CV" prefix, except for Mobile Technology Support products CO600, CO601, and CO606. Customers interested in ordering master keys should contact Customer Care with a written request. To remove lock plugs from existing components, loosen the hex nut inside the product and remove the plug. These locks are available in key numbers 01 through 99. To remove lock plugs from locker with electronic lock, remove the cover from the e-lock mounting plate (be careful not to separate battery wires from unit). Next, loosen the hex nut inside the cover and remove the plug.

A Hudson master key can be used to open any lock on Co/Struc components with a "C" prefix. To remove lock plugs from existing components, a removal key or lock change tool is required. Customers interested in ordering master keys, removal keys, or lock change tools should contact Customer Care with a written request. Locks for "C" prefix components are available in key numbers 226 through 324 but are ordered as key numbers 01 through 99. Use the following chart to cross-reference the number selection.
