Porcelain Stone® | Natural Stone | Glass Tile | Wall Tile

Beauty is a
problem solved.

Welcome to Crossville, Inc.

When it comes to surface solutions, anyone can offer creative options. But at Crossville we specialize in creative solutions. Solutions that are rooted in technical mastery combined with relevant product advances that actually matter. All with a sophisticated level of creativity that gives design professionals the freedom to design the look they envision with the functionality end users must have. With Crossville, professionals are empowered to realize their vision.

Every project is unique. Every space is an opportunity. When Crossville's creative solutions are put to work, new heights of functional design are accomplished. These successful outcomes last for decades with endless visual appeal. Welcome to Crossville, where beauty is a problem solved.

Ready to answer your unique needs.

With over 30 years of experience in our industry, we're adept at answering the unique needs of customer groups. Our range of special programs and products (for example, learn about Porcelain Tile Panels in the first section of this catalog!) are thoughtfully developed to make life simpler for architects, contract designers, residential designers, retailers, and specifiers for national accounts. Whatever you need, we—alongside our distributors' sales teams—are ready to assist.

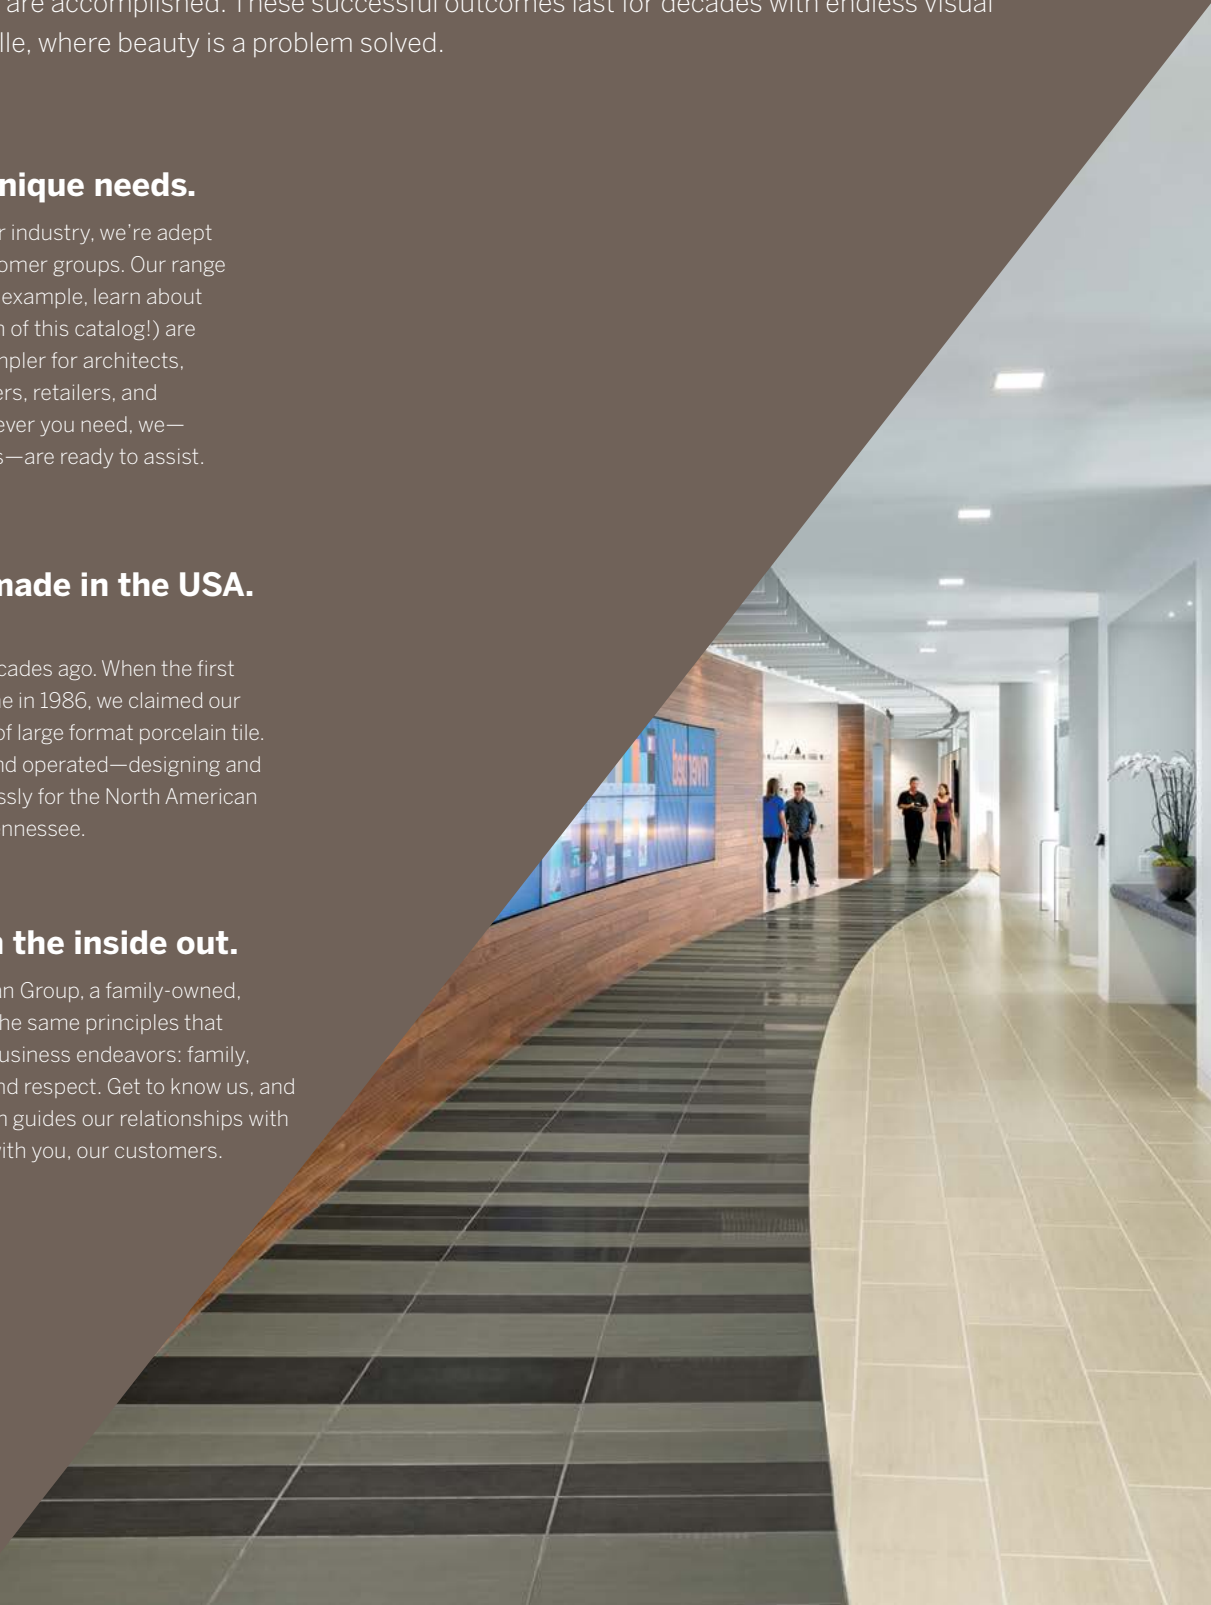

Designed and made in the USA.

We were born in the USA over three decades ago. When the first piece of tile rolled off our production line in 1986, we claimed our place as America's first manufacturer of large format porcelain tile. We've always been American owned and operated—designing and creating innovative porcelain tile expressly for the North American market from our plants in Crossville, Tennessee.

Highest standards from the inside out.

Crossville® is a subsidiary of The Curran Group, a family-owned, privately held corporation. We run on the same principles that the Currans are known for in all their business endeavors: family, partnership, integrity, improvement, and respect. Get to know us, and you'll find that our unique value system guides our relationships with employees, business associates and with you, our customers.

Sustainably green practices & products.

At Crossville, being green and environmentally responsible has been at our core since Day 1. With a solid commitment to the environment, we've led our industry in the creation of sustainable practices. The result is greener products for you and a healthier environment for us all. Here's a look at our green advancements.

Green Squared Products

We're the first manufacturer to earn TCNA's Green Squared certification across all U.S.-made porcelain tile product lines. That means our Crossville manufactured collections meet the most stringent industry standards in sustainability.

EcoCycle Tile Process™

Crossville recycles nearly 12 million pounds of previously discarded filtrate and fired tile waste. Every tile will meet our high standards of sustainability, every time.

Fired Porcelain Recycling

We're the first large-scale manufacturer to invent a method of recycling fired porcelain to create feed stock for new tile. This innovation has taken our company and our industry to unexpected levels of sustainability.

TOTO USA Partnership

We partner with sanitary ware maker TOTO USA to recycle that company's pre-consumer fired waste into powder to make tile. As a result, we've diverted millions of pounds of waste from being landfilled and are a net consumer of waste—meaning we recycle more waste than we produce in manufacturing.

Tile Take-Back™ Program

This program—the only one of its kind—takes in post-consumer fired tile that was previously installed and recycles it to make new tile.

Recycled Content

All of our domestically produced products contain pre-consumer recycled content—up to 40% for some.

Water Conservation

We recycle water for re-use in manufacturing to lessen demands on our water supply.

Local Sourcing

From our clay and raw materials to our trucks, packaging and printing, we strive to acquire what we need to make and market our products from within 200 miles of operation.

Hydrotect™

Our Hydrotect coating can be applied to almost any of our porcelain collections to give tile easy cleaning and air purifying properties. Learn more on page 150 of this catalog.

BALANCE KITCHEN

Amarillo High School

Amarillo, TX

Public schools often go decades without renovations. When the opportunity for a redesign presents itself, it is especially important that the materials specified both hold up well to the wear and tear of the environment and look good for years to come.

CROSSVILLE®

Independence 

express elevators fl. 4, 9, 23 >

Independence Blue Cross

Philadelphia, PA

The renovation of Philadelphia's Independence Blue Cross (IBC) corporate headquarters, housed in the city's iconic Independence Tower, was significant in both its size and scope; the redesign of the 45 floors—accounting for a total of 840,000 square feet—was to not only create a dynamic workspace for employees but also launch the company's new brand identity.

Calce

Gauged Porcelain Tile Panels

Neutral colors and delicate nuances mark the face of Calce, a line inspired by wet plaster and concrete. The combination results in a soft, chalky visual that is both sophisticated and thoroughly contemporary. In sizes as large as 1mx3m, this soft whisper makes a bold statement.

I Metalli

Gauged Porcelain Tile Panels

I Metalli brings the look of aged metal, but with the ease of maintenance only porcelain can bring. With texture evoking diamond plate, the distressed, oxidized look is both industrial and luxurious thanks to tones of iron, brass, copper, and bronze. Changes in gloss refract light for a multidimensional surface sure to bring interest to any space.

Tile-Over-Tile

Gauged Porcelain Tile Panels

Holy Cross Hospital

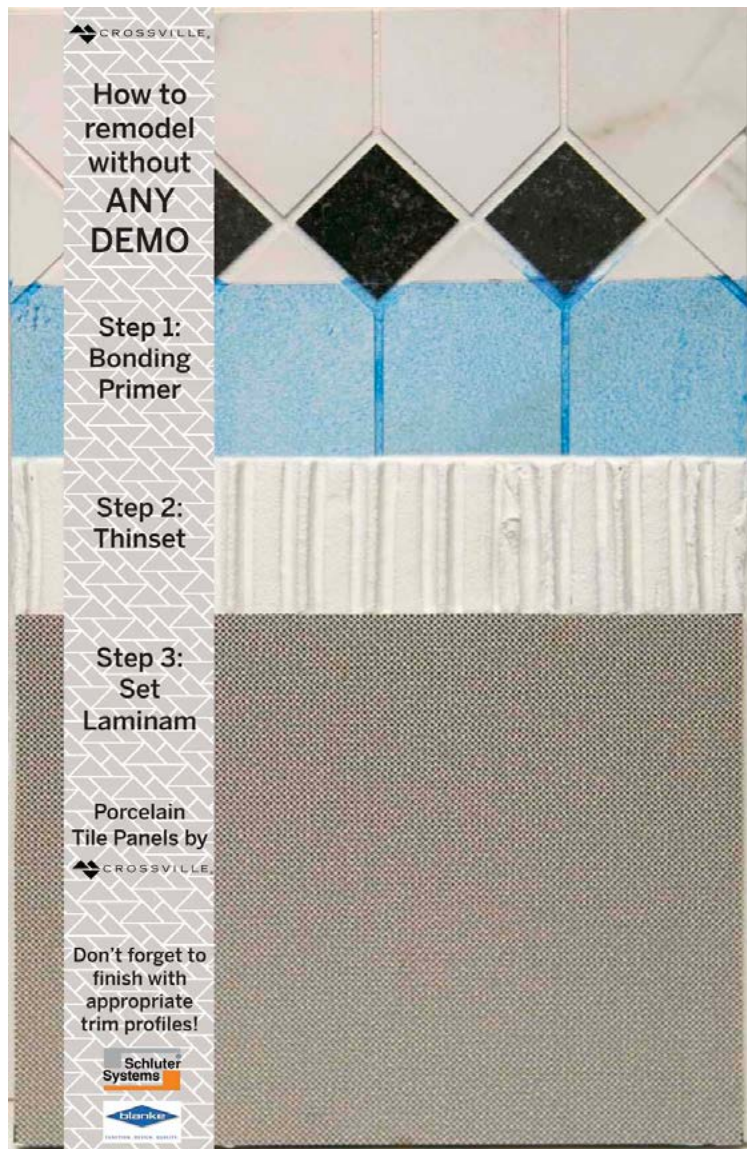

Fort Lauderdale, FL

These maternity unit bath remodels were birthed in record time, thanks to easy-to-install Laminam by Crossville, and use of Tile-Over-Tile installation.

[View this case study at CrossvilleInc.com](https://www.crossvilleinc.com/case-study/holy-cross-hospital)

Tile-Over-Tile

Gauged Porcelain Tile Panels

This panel depicts each step in the Tile-Over-Tile Process

TILE-OVER-TILE

Think Thin – Embrace Tile-Over-Tile Installations

Updating a space that has existing but dated tile is highly desirable. Demolition, downtime, and dollars may make a full remodel unattainable. Crossville's Laminam Porcelain Tile Panels offer many unique and highly functional features including a new approach to remodeling – Tile-Over- Tile.

Create a fresh and flawless space in a faster turnaround when you capture the benefits of a Tile-Over- Tile project:

TIME IS MONEY

- Faster room turnaround to quickly reestablish the function and usage of the space
- Lower material and labor costs
- Removing the tile added for tear out and replacement of substrates can significantly reduce the overall time for the remodel

NO OR REDUCED DEMOLITION

- Eliminate sound and health contamination
- Reduce waste to landfills
- Minimalize dirt and dust during installation
- Lower Volatile organic compounds (VOC)

LARGER, THIN TILE = BIG RESULTS

- Smaller and fewer grout joints reduces the opportunity for mold and bacteria
- Contemporary modern clean aesthetic
- Thin tile (3+mm and 5.6mm thickness) easily covers existing tile without adding bulk
- Easy to clean, simplified maintenance
- Lifecycle of porcelain ensures a lifetime of beauty and performance

Take a moment to consider when a Tile-Over-Tile project can add even more value to an installation.

Before

After

To the right, see Holy Cross Hospital's before and after shots of their Tile-Over-Tile project.

For more information on this project, view our Holy Cross Case Study at CrossvilleInc.com.

Technical Information

Gauged Porcelain Tile Panels

APPLICATIONS

Laminam® is suitable for many interior and exterior applications:

BUILDING SECTOR

Floor and wall coverings, partition and storage walls, false ceilings, surface finishes and restoration, insulated panels and tunnels.

INTERIOR DESIGN

Surfaces of kitchen and bathroom tops, cupboards, tables, desks, doors and furnishings in general.

SHIPBUILDING SECTOR

The lightness and high technical properties of Laminam make it suitable for walls of cruise ships and sports crafts.

COMPOSITE AND STRUCTURAL PANELS

The porcelain tile panels can be placed over other materials to create extremely light and particularly resistant composite and structural panels suitable in all those cases that require high resistance and reduced weight load on the surface.

TECHNICAL SPECIFICATIONS

LAMINAM 3+ & 5.6MM

Laminam porcelain obtained by wet grinding of clayish raw materials, granite and metamorphic, feldspar-containing rocks and ceramic pigments. Compacted by a special shaping in compactor and sintering at 1200°C, with controlled firing.

TECHNICAL INFO

LAMINAM 3+

Laminam 3+ is made up of the basic tile panel with the structure reinforced with fiberglass matting applied on the back using special adhesive.

Thickness: 3mm plus .5mm fiberglass mesh.

Use of Laminam 3+

- Interior and exterior wall coverings

LAMINAM 5.6MM

Laminam 5.6mm is the tile panel without reinforcing mesh.

Thickness: 5.6mm

Use of Laminam 5.6mm

- Interior floors below, and slab on interior floors above grade concrete and interior and exterior wall coverings. (See Laminam Technical Guide for more information).
- **Polished finishes require a penetrating sealer prior to grouting. Please Note: Due to DCOF value, these tile panels are not recommended for applications in wet areas or areas where standing water may occur.**

For your creative solutions walls, doors, and counter-tops, talk to your local fabricator for more information.

Information listed here is subject to change. Please refer to CrossvilleInc.com for the latest, most accurate information.

Third party certified, pre-consumer, recycled content certificates available on the website.

DISTINCTIVE VALUES

MAIN FEATURES

Dimensions 1000mm x 3000mm

Perfectly Flat

3+: 52 lbs / pc

5.6: 94 lbs / pc

CHEMICAL RESISTANCE

Laminam resists organic and inorganic solvents, disinfectants and detergents. It can be easily cleaned without affecting its surface characteristics; the only product that can attack the tile panels is hydrofluoric acid.

WEAR RESISTANCE

Laminam is highly scratch proof and resistant to deep abrasion. The properties of the tiles remain unchanged even after intensive use and frequent cleaning.

HIGH FLEXURAL STRENGTH

Laminam has a high modulus of rupture. 3+ and 5.6 are both 50 MOR which are high values. Typical porcelain value is 35-37.

FROST RESISTANCE

Laminam's average water absorption is 0.1% therefore it is frost resistant and suitable for any weather condition.

FIRE RESISTANT

Laminam does not contain organic material therefore it is resistant to fire and high temperatures. In the event of fire it does not release smoke or toxic substances.

CHROMATIC PROPERTIES

Laminam does not contain organic pigments and is resistant to UV rays. Even if subjected to severe climate changes, the colors remain stable.

GRAFFITI

Laminam is a graffiti resistant ceramic surface; it is easy to clean and even the strongest paints can be removed.

Laminam by Crossville - I Naturali 5.6 Calacatta Oro Venato L6093 and Calacatta Venato Bookmatch L0318.1M3MBM

SUSTAINABLE

- The use of hybrid kilns that combine gas and electricity significantly reduces CO2 emissions in the atmosphere
- Laminam has led the way to a photovoltaic system being installed on the roofs of its two Fiorano Modenese plants
- Over a year, this photovoltaic system guarantees the production of around 1,050 GWh, thereby enabling the company to produce 10% of its energy requirements
- In terms of CO2 reduction, Laminam's photovoltaic roof system eliminates the release of 525 tons of CO2 into the atmosphere annually
- Member of the Green Building Council Italia, this Italian association of manufacturing leaders strive to transform the building market towards environmental sustainability and to build livable communities. Partners of GBC Italia promote environmental, economic and social responsibility by innovating the way in which buildings are designed, built and used.

ENVIRONMENTAL STATEMENT

Laminam by Crossville collections are excellent choices for those seeking green surfacing solutions for design projects. Laminam porcelain tile panels are responsibly made with natural raw materials in one of the most advanced, environmentally sound manufacturing facilities in the world, located in the heart of Italy's renowned tile production region. Reflecting global standards in sustainability, the Laminam manufacturing process uses leading edge technology and recycling practices and incorporates innovative methods to minimize waste and generate energy without depleting the earth's resources.

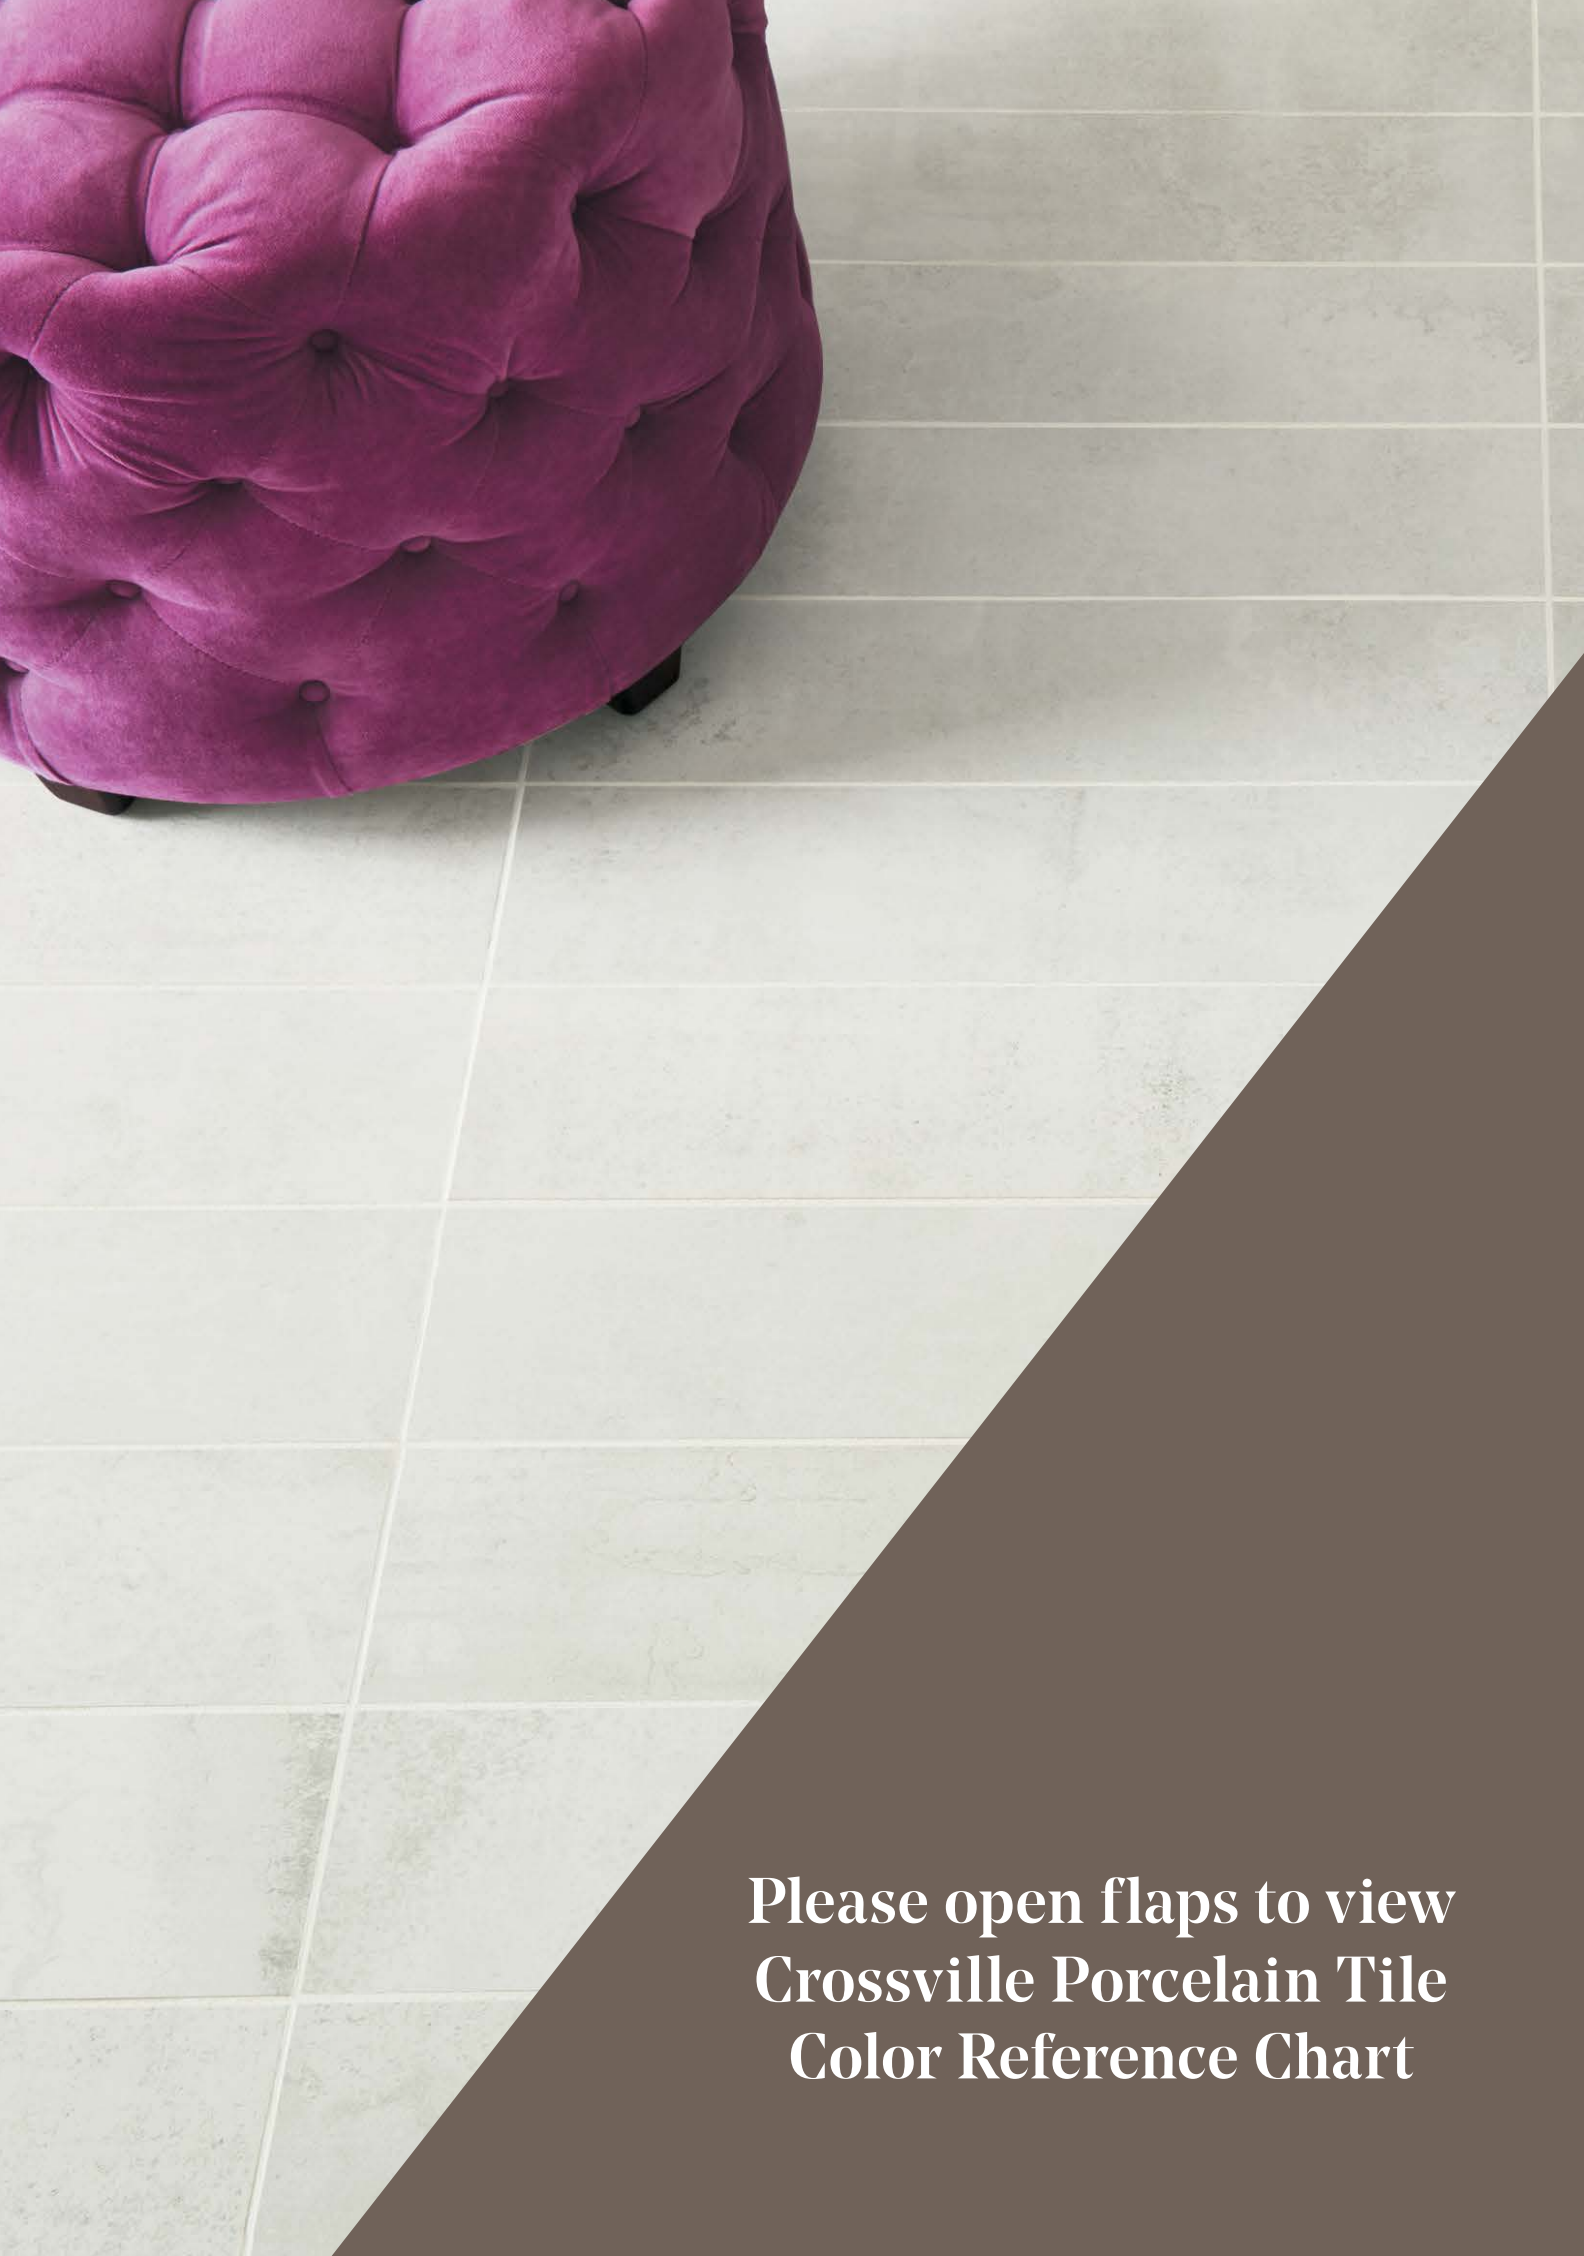

Laminam products, created to meet Green Building Council standards, support specifiers' goals for durable, healthy environments. The porcelain tile panels do not release emissions or substances into the environment and require minimal maintenance, contributing to indoor air quality and providing ease of cleaning long term. The panels' superior performance characteristics lead to long product lifecycles—reducing the need for replacement. However, should panels be removed, they can simply be separated from their mesh, milled, and recycled back into the tile production stream.

As porcelain tile panels' popularity grows, the green innovations at the Laminam manufacturing facility advance, as well. The plant's recently installed photovoltaic roof has already produced 1 GWh of energy and is capable of generating an estimated 1.387 GWh within a year, cutting the CO2 emission into the atmosphere by 617 tons and empowering the Laminam plant to self-generate 15% of its energy requirements.

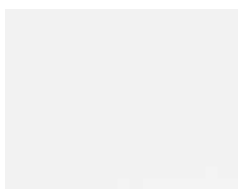

Distributed exclusively in the U.S. by Crossville, many Laminam porcelain tile panel collections are stocked on American soil. This not only allows for prompt order fulfillment, but it also aids in minimizing fuel and energy consumption related to international shipping and transportation.

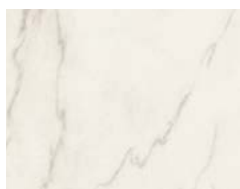

Laminam by Crossville
Beauty is beyond limitations.

Color Blox®/Color Blox® Mosaics

Porcelain Stone®

- Each color coordinates with at least 2-3 other colors
- Subtle variations in texture and shading add visual interest
- Cross-Sheen® finish for easy cleaning (available on UPS only)

A1104 It's a Boy! UPS, and A1113 Blue Suede Shoes 12 x 12 UPS

Sizes & Finishes

Nominal (in)	Actual (in)	Thickness (in)	Finish
3 x 3*	2-7/8 x 2-7/8	1/4	UPS
6 x 6†	5-13/16 x 5-13/16	3/8	UPS
6 x 12†	5-13/16 x 11-13/16	3/8	UPS
12 x 12	11-13/16 x 11-13/16	3/8	UPS
12 X 24	11-13/16 x 23-13/16	3/8	UPS
18 X 18	17-13/16 x 17-13/16	3/8	UPS

* 3 x 3 Mosaic Tile in 11-7/8 x 11-7/8 sheets with a 1/8 inch grout joint.

† The cut/bevel tile is cut from larger format tile and the edges are beveled to provide a factory appearance. Please allow two to eight weeks for delivery depending on Crossville's production schedule.

Crossville® recommends a grout joint of 3/16 to 1/4 inch.

Actual measurements stated in inches indicate tile is calibrated (non-rectified).

Actual measurements stated in mm indicate tile is rectified.

Recommended Use

Color Blox® is recommended for interior floors, walls, countertops, and exterior walls in both commercial and residential applications. Color Blox® is not recommended for exterior horizontal surfaces or exterior paving. If offset pattern is required for tiles 18 inches or longer, Crossville® recommends an offset of not greater than 33%. See CrossvilleInc.com for detailed installation instructions.

Finishes and Textures

Crossville® offers designers, architects, and builders the utilitarian textures to answer the specific needs of those areas with the highest exposure. These textures are an integral part of the tile and cannot be worn down. No matter how technical the specifications, we have a surface that is highly functional, yet able to blend beautifully with any design application. Please refer to the Tile Performance Data chart in the back of this catalog for actual tile performance details.

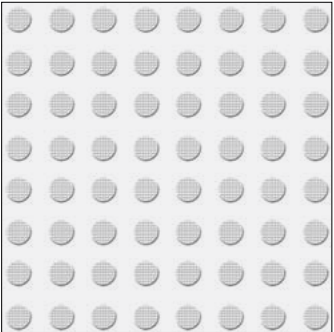

Unpolished (UPS)
Cross-Colors® unpolished (UPS) with the Cross-Sheen® finish imparts a subtle glow that enhances the color of the tile and also allows stains and scuff marks to be easily wiped off the surface. Cross-Colors unpolished is appropriate for most interior floors and walls and exterior walls, including high-traffic areas and areas where a low level of maintenance is desired. Cross-Colors unpolished is not recommended for exterior horizontal surfaces or exterior paving.

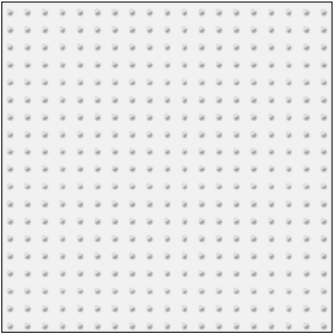

Polished (PO)
Polished Porcelain Stone® is an attractive and practical alternative to natural stone. Interplay with UPS Cross-Sheen® or other surface textures to increase visual interest. Polished finishes are recommended for most interior floors and walls and exterior walls, including areas where a look of elegance and sophistication is desired. Polished finish is not recommended for wet areas where standing water may occur. Polished finishes are not recommended for exterior horizontal surfaces or exterior paving.

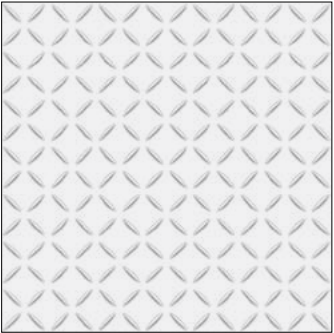

Cross-Slate® (CS)
The Cross-Slate® finish combines the rustic and textured feel of slate with the through-body color and durability of Porcelain Stone®. Through-body color, unglazed structured surface, and a variety of sizes provide a strong commercial value where enhanced traction is needed for high traffic interior and exterior spaces. Cross-Slate is recommended for interior floors and walls, as well as **exterior walls and exterior walking surfaces** in both residential and commercial environments.

Crossdot® (CD)
The raised-dot pattern, with a “roughened” surface atop each dot, provides increased coefficient of friction. It is suitable for most commercial kitchens, food prep areas, service stations, as well as **exterior walking surfaces**.

Cross-Grip® (CGS)
Developed in conjunction with restaurant owners, Cross-Grip® is a possible solution for those areas where slips and falls are of greatest concern. The patented raised-point texture has earned Cross-Grip the highest possible performance rating in the National Restaurant Association’s testing for slip resistance. **It is suitable for areas where grease, food, oil, and other residue tend to accumulate.**

Cross-Tread® (CTS)
Increased slip resistance and ease of maintenance make this tile a suitable choice for wet and greasy floor areas, as well as for **exterior walking surfaces**. The Cross-Tread® surface pattern is eye-catching, making it a great option for transitional areas and for use as an accent tile.

Wet DCOF			
Unpolished (UPS)	Crossdot® (CD)*		
0.50 – 0.60	0.50 – 0.60		
Polished (PO)	Cross-Grip® (CGS)†		
0.31 – 0.41	NA – NA†		
Cross-Slate® (CS)	Cross-Tread® (CTS)*		
0.50 – 0.60	0.50 – 0.60		

*The increased real world traction of these types of surfaces cannot be fully realized by any current DCOF testing methodologies due to their exaggerated facial structure.

† Due to the heavily textured surface DCOF value is not able to be measured by testing device.

NOTE: Wet area use for Crossville Mosaics

Crossville® produces these products with the Cross-Sheen® finish. They deliver a wet dynamic coefficient of friction equal to or greater than 0.50 on the surface of the tile. Their small 3 x 3 size ensures frequent grout joints which provides traction and drainage.

Crossville cannot control situations involving incorrect installation, improper slope to the drain for elimination of standing water, and poor surface cleaning.

This information is provided so that customers may make a realistic and informed decision when comparing Crossville Mosaics to other tile products in wet area environments, such as residential commercial bathrooms, showers, and interior pool decks.

The defining threshold value 0.42 is for level interior spaces expected to be walked upon when wet, a wet DCOF of less than 0.42 shall only be installed when the surface will be kept dry when walked upon and proper safety procedures will be applied when cleaning the tiles.

Finishes

Unpolished (UPS) – Cross-Colors® Unpolished (UPS) with the Cross-Sheen® finish imparts a subtle glow that enhances the color of the tile and also allows stains and scuff marks to be easily wiped off the surface. Cross-Colors Unpolished (UPS) is appropriate for most interior floors and walls and exterior walls, including high-traffic areas, and areas where a low level of maintenance is desired. Cross-Colors Unpolished (UPS) is not recommended for exterior horizontal surfaces or exterior paving.

Cross-Tread® (CTS)* – Increased slip resistance and ease of maintenance make this tile a suitable choice for wet and greasy floor areas, as well as for exterior walking surfaces. The Cross-Tread® surface pattern is eye-catching, making it a great option for transitional areas and for use as an accent tile.

*Not available in AV90, AV91, or AV92

Care and Maintenance

Regular cleaning is the best way to keep Crossville Mosaics tile looking good for years to come. Use clean, hot water (combined with a household cleaner for more aggressive cleaning). Rinse thoroughly and dry with a soft cloth to prevent water spots. No waxes or sealers are needed. More information regarding the care and maintenance of Crossville products is available at CrossvilleInc.com.

Virtue AV261

Example Sizes

Hydrotect™

Virtue tiles are treated with Hydrotect™. Should exterior Hydrotect be desired, please call for lead times. Crossville's revolutionary invisible coating harnesses the power of light, water and oxygen to create the best defense against dirt and pollution. Whether indoors or out, floors and walls stay cleaner, providing a superior experience in any space. For complete details check our website at CrossvilleInc.com.

Recommended Use

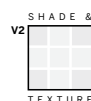

Virtue UHT is recommended for interior floors, walls, countertops, and exterior walls in both residential and commercial applications. The satin finish is recommended for residential and light commercial use only. Virtue is not recommended for exterior horizontal surfaces or exterior paving. **The satin finish is not recommended for wet areas where standing water may occur.** If offset pattern is required for tiles 18 inches or longer, Crossville® recommended an offset of not greater than 33%. See CrossvilleInc.com for detailed installation instructions.

†Virtue satin requires a grout release prior to grouting. DO NOT use a penetrating sealer, as it will diminish or render ineffective the Hydrotect benefits.

Wet DCOF

(UHT) **0.42 – 0.52**

(SHT) **0.31 – 0.41**

 ** Sold as loose pieces
 + Linear Mosaic consists of 15 x 98, 23 x 148, and 38 x 148 tiles

Recommended Use

Yin + Yang natural stone is recommended for interior and exterior walls. It is recommended for interior floors except where standing water may occur. Yin + Yang is not suitable for the lining of pools, fountains, or spas.

This natural stone displays a wide variation in colors. Please refer to CrossvilleInc.com for photos. Always work from at least four cartons to ensure optimum installation.

Care and Maintenance

For complete care and maintenance information of stone products, the Marble Institute of America provides extensive information on their website, marbleinstitute.com/consumers/care.cfm. Phone (440) 250-9222.

1/2 x 6	9/16 x 5-7/8	1/4

1/8 inch grout joint on all mosaic sheets
 *Actual size of mounted sheet is 11-3/4 x 11-3/4
 ** Actual size of mounted sheet is 11-3/4 x 13

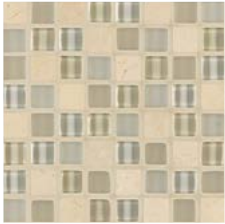

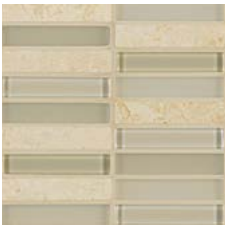

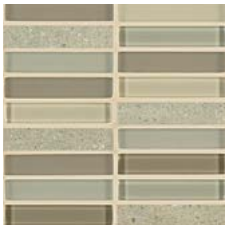

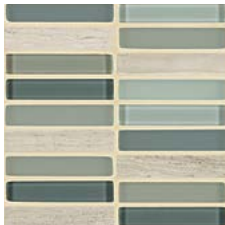

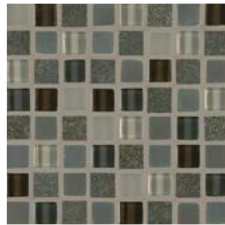

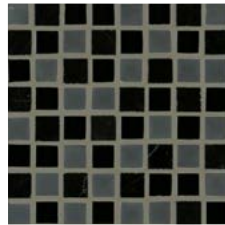

Recommended Use

Crossville's Ebb & Flow mosaics can be used for interior walls and covered exterior wall applications. In wall applications exposed to regular moisture (such as shower walls) the application of a penetrating sealer, such as Miracle 511 Impregnator, is required. See detailed installation instructions at CrossvilleInc.com.

Recommended Use

Origins Glass® tile can be used for interior walls in wet or dry applications.

Due to the nature of our glass tile, there will be a certain amount of variation in color, shade, tone, texture, and size. Frequently you may notice bubbles, wrinkles and folds in the glass. These are consistent with a cast glass product. Please open and inspect each box of glass tile upon delivery. Buyer is responsible for both inspection and acceptance of the material prior to installation.

 **Actual size 28mm x 150mm. Available in all colors and finishes.

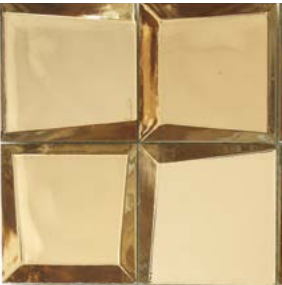

Recommended Use

Sideview Glass tile can be used for interior walls in wet or dry applications.

Cleaning

Regular cleaning is the best way to keep Sideview Glass tile looking good for years to come. Use clean, hot water (combined with a household cleaner for more aggressive cleaning). Rinse thoroughly and dry with a soft cloth. No waxes are needed. More information regarding the care and maintenance of Crossville® products is available at CrossvilleInc.com.

THE COLOR STORY

Part of a complete design solution, Color By Numbers® wall tile was created to work in tandem with other elements in your design scheme. Within the Color By Numbers wall tile palette are six colors created to correspond with bestsellers from the popular Crossville® Color Blox floor tile collection. To further expand your design possibilities, Crossville is pleased to join with Benjamin Moore® to offer paint selected with Color By Numbers in mind.

For more information visit

CrossvilleInc.com/colorbynumberspaint.

Printed colors can only approximate the color of a coated paint chip. For true color accuracy, please use actual Benjamin Moore® Aura® paint chips when making a color selection. © 2011 Benjamin Moore & Co. Recommended Use

Crossville® recommends Handwritten tile for interior vertical surfaces in all residential and light commercial applications. Applications may include light-duty bathroom walls, vanity tops, kitchen backsplashes, and light-duty kitchen countertops.

**Handcrafted Variation

Handwritten tiles are manufactured to appear handmade. Due to this handmade appearance, variations in size, thickness, flatness and color are to be expected. Therefore, blending the tile before and during installation is recommended.

- Beautiful, elegant, and classically inspired
- Subtle variations result in handmade appearance
- Thick glaze exudes quality and richness
- Exquisite patterns multiply design options

Exterior Cladding

Porcelain Stone®

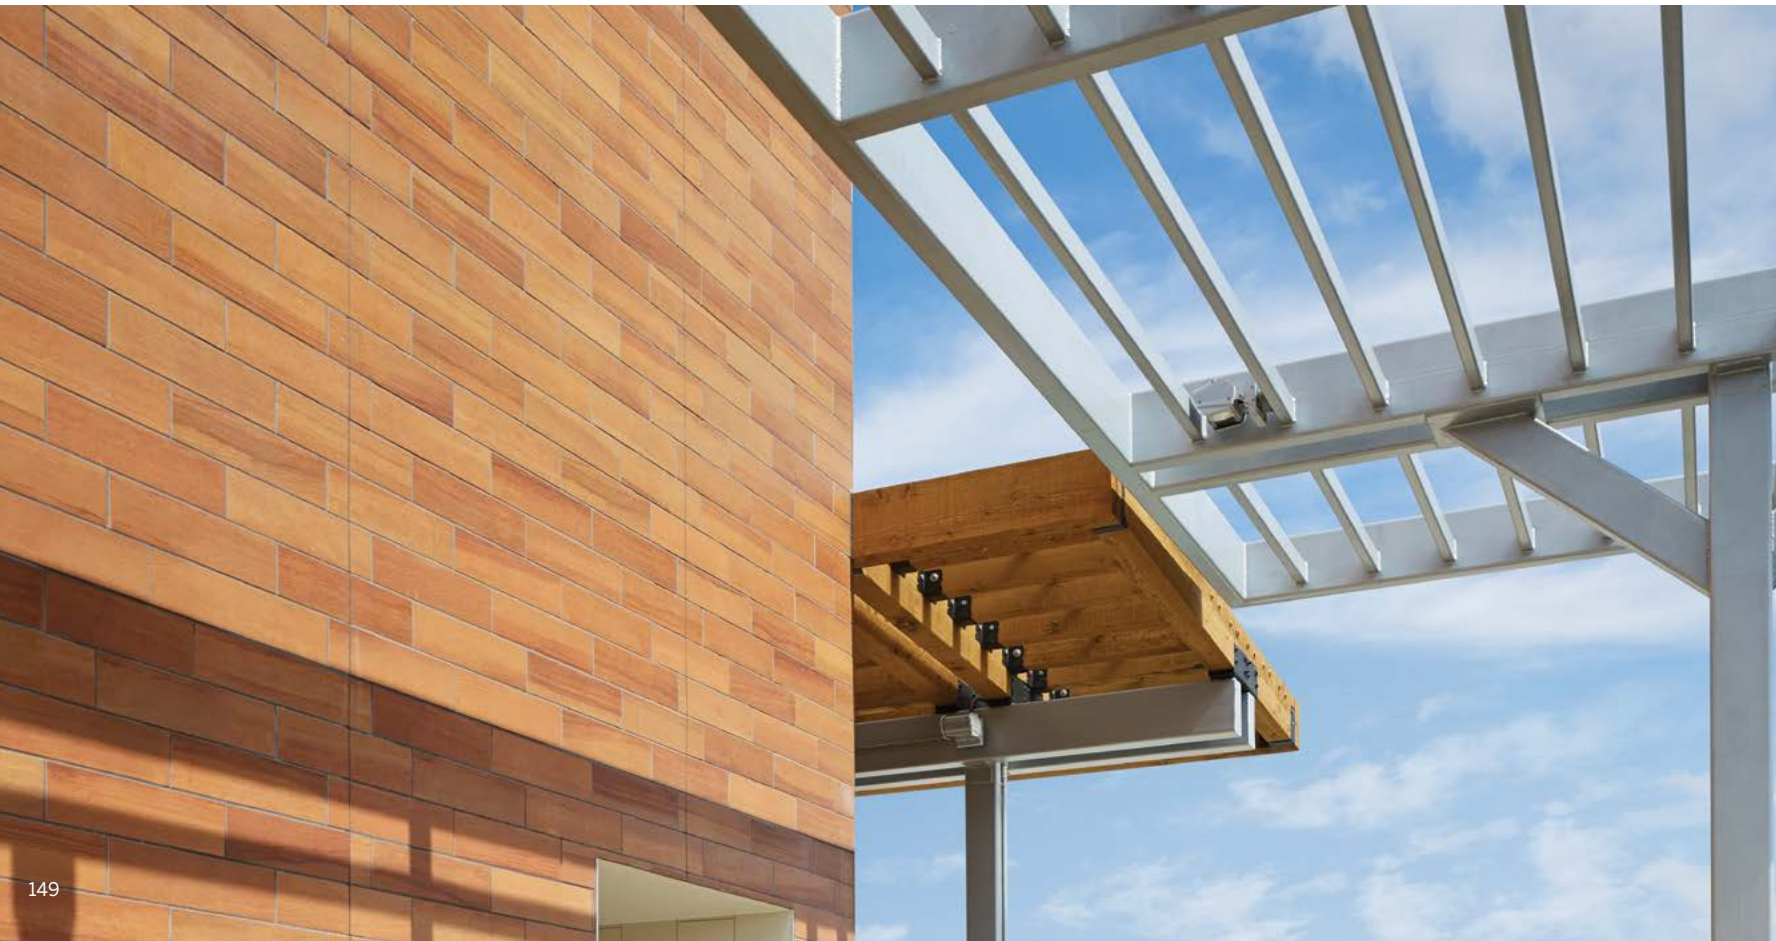

Archer Hotel

EXTERIOR CLADDING

Using Crossville's Porcelain Stone® for cladding offers both aesthetic appeal and structural functionality. Appropriate for seismic zone usage, graffiti resistant, and engineered for utility savings due to thermal mass advantages, Porcelain Stone® tile is a perfect solution.

Field Applied

Timeless, tried, and true, tile has been used for centuries as a field applied exterior covering. With Crossville's American-made Porcelain Stone®, you now have the advantage of Cross-Sheen®. This graffiti-resistant finish protects your structure from the elements as well as spray paint and marker. Recent projects include the Los Gatos Library, DeAnza High School, and Ashland Youth Center. Log on to CrossvilleInc.com to read their stories. Contact us at Crossc@CrossvilleInc.com.

CROSS-SHEEN®

Protect your Crossville tile from stains, scuffs and graffiti

Cross-Sheen®, exclusively from Crossville, is an invisible, integrated finish that protects the look of nearly any Crossville tile from the defacing effects of scuffs, stains, even permanent marker, and graffiti. By creating an advanced, easier-to-clean tile surface, Cross-Sheen allows for fast removal of unsightly marks using only mild cleaner, resulting in truly hassle-free installation, cleaning and long-term maintenance of your Crossville tile.

Unlike expensively applied, non-permanent anti-graffiti coatings, Cross-Sheen is incorporated directly into the surface of the tile, so it will never scrape off or wear off. Made in the USA to stringent specifications, Cross-Sheen is a beautifully advanced solution for exterior and interior walls and interior flooring in residential or commercial applications.

<http://crossvilleinc.com/solutions/cross-sheen/>

*Excluding Polished (PO), Honed (HON) and Satin (SAT) finish tiles

Cross-Sheen® is recommended for interior floors and walls and exterior walls.

HYDROTECT™ COATING

Our porcelain tiles are available with Hydrotect. Crossville's revolutionary invisible coating harnesses the power of light, water, and oxygen to create the best defense against dirt and pollution. Whether indoors or out, floors and walls stay cleaner, providing a superior experience in any space. For complete details check our website at CrossvilleInc.com.

Self Cleaning.

Imagine an exterior facade that cleans naturally with just water, saving you maintenance costs and keeping your design looking great. Unlike most surfaces, tiles coated with Hydrotect™ by Crossville® attract water to the surface. With rain, water is able to get under dirt and grime and wash it away, naturally. And better yet, everyday exterior humidity causes a fine film of water to build on the tile, preventing the adhesion of dust and oily dirt. Even algae is no match for Hydrotect. The photocatalytic process degrades it naturally, so no toxic chemicals are needed to keep your building looking sharp.

Air Purifying.

Hydrotect™ by Crossville® purifies exterior air by reducing greenhouse gases, environmental pollutants and volatile organic compounds. When exterior walls coated with Hydrotect by Crossville are exposed to light, nitrogen oxides produced by exhaust fumes and smoke break down into harmless nitrates. In fact, a 10,000-square-foot area of tiles can clean the air as effectively as 70 poplar trees or green space the size of four tennis courts.

From corporate to healthcare and hospitality, to retail, architects and designers, count on Crossville to deliver the distinctly American, uniquely Crossville design aesthetic with American-made ingenuity.

Visit CrossvilleInc.com or contact our technical support staff to learn more.

Get Planked® Program

AV261 3 x 12 planks.

NEED IT IN PLANKS?

Found the perfect tile, but need it in planks?

Crossville® now offers each of its Porcelain Stone® products in popular plank shapes. With no minimum order and quick order fulfillment, you'll be seeing planks in no time.

Depending on the product selected, there are 4 possible widths and 7 possible lengths, which add up to more than 2,596 shape combinations.

Many of Crossville's tiles are now available in the much-requested Half-Plank size (square tile cut in half). For the latest information about half-planked tile, please visit CrossvilleInc.com or phone: 931.484.2110.

Recycled Content

At Crossville®, we put our name behind every product we sell. That's why we have developed the EcoCycle Tile Process™ logo, which will be shown in conjunction with products containing recycled content. Tile containing a specified minimum amount of recycled content will be designated with a percentage shown in the logo. In addition, this logo will specify the nature of the recycled content, such as pre-consumer or post-consumer.

Recycled Products

Crossville® recycles nearly 12 million pounds of previously discarded filtrate and fired tile waste. In addition to its own fired waste recycling, Crossville also accepts and recycles reclaimed, previously installed tile through its Tile Take-Back™ Program. For more information, visit CrossvilleInc.com/green.

TILE TAKE-BACK

Tile Take-Back® Program

With our Tile Take-Back Program, Crossville®, the tile industry's leader in sustainable initiatives, has solved the major environmental problem facing the tile industry today: recycling fired tile.

Until now, pre and post-consumer tile has been considered non-recyclable. While many tile manufacturers, including Crossville, have successfully reused scrap powders and unfired tile, hundreds of millions of pounds of damaged or otherwise unsellable fired tile (tile in its finished state), have gone to landfills each year. Additionally, there has been no environmentally friendly manner to dispose of previously installed tile.

We have developed a proprietary system of processing porcelain tile back into powder used in manufacturing new tile. The resulting new products will have a verifiable recycled content, and more than 4 million pounds of tile that Crossville has previously sent to local landfills will be recycled. This is in addition to any tile Crossville will receive through our ground-breaking Tile Take-Back program.

Not only will the new process allow Crossville to re-purpose its own scrap tile, but will allow the company to take back samples and previously installed tile, always a concern for environmentally-minded designers and building owners.

Crossville is now incorporating powder produced from recycled tile in its manufacturing and has begun implementing its Take-Back program for samples and installed tile.

LEED

Leed Information

For information on Crossville's recycled products and their relation to LEED Information, please visit CrossvilleInc.com.

PRACTICES

Green Squaredsm Certification

The Standard in Sustainability for the Tile Industry in North America ANSI A138.1. Green Squared is the stringent and powerful new measure for tile industry sustainability developed by Tile Council of North America under the American National Standards Institute (ANSI) process.

Green Squaredsm

- Evaluates products and processes in five key environmental and social categories:
 - product characteristics
 - manufacturing operations
 - corporate governance
 - innovation
 - end-of-life product management

- Recognizes manufacturers for leadership in environmental stewardship and corporate responsibility
- Serves as the standard bearer to ensure transparent, full disclosure of sustainability product by product, manufacturer by manufacturer - industry wide

EcoCycle Tile Process[™]

Crossville has two primary means of recycling waste that would otherwise be sent to local landfills. Crossville recycles nearly 12 million pounds annually of previously discarded filtrate and fired waste.

Crossville: First Among the First

Crossville[®] was the first manufacturer to achieve Green Squared certification for its entire U.S. manufactured porcelain tile product line-up, which is manufactured in Crossville, TN, as well as its production processes.

PARTNERSHIPS

Sustainable Partnerships

In our efforts to preserve the environment, Crossville[®] has partnered with TOTO USA, the world's largest plumbing products manufacturer to recycle pre-consumer waste. Crossville has developed a proprietary system of processing TOTO's sanitary ware waste back into powder used in manufacturing new tile.

In March 2011, Crossville became a net consumer of waste, meaning we recycle more waste into new products than we generate through our manufacturing processes.

This recycling conserves resources; the volume of finished goods Crossville ships now exceeds the amount of raw material it extracts from the earth for use in manufacturing.

Sustainable Operational Procedures

In order to minimize our impact on the environment, Crossville[®] goes beyond offering recycled products. Crossville's sustainable operational procedures include:

- Printing of marketing materials at Forestry Stewardship Council certified facilities; use of soy inks and recycled paper whenever possible.
- Packaging of samples, merchandising materials and piece goods with recycled/recyclable wrapping and cushioning.
- Company-wide recycling program for all office and production facility paper waste.

DESIGN TOOLS

Planning and visualization tools for designers and architects at CrossvilleInc.com.

Mosaic Builder

Choose from nearly endless combinations of Crossville glass tile colors and sizes to design custom mosaics for walls, floors and more.

Cross-Vision®

Create, save and print visualizations of paint and flooring combinations, either within stock Crossville environments or via your own uploaded images.

Floor Patterns

Explore nearly 100 floor tile patterns with suggested tile sizes and collections for each.

Selecting a Grout

Find the best grout types and colors to complete your tile design.

Get Planked

Request your favorite tile in popular plank sizing (most Crossville collections are eligible).

GSA ADVANTAGE

Quality Crossville® products are available at GSA pricing

Designing for government projects? You'll be glad to know that Crossville's extensive line of award-winning Porcelain Stone floor and wall tile and our line of accent tiles are available to government customers at GSA pricing.

Fast delivery

Centrally located in Crossville, Tennessee, we have an industry-leading logistics system to ensure you get your tile when and where you need it, on time and on budget.

On contract

Available on GSA contract number GS-07F-0429 and TXMAS Contract No. TXMAS-5-0560, Crossville® products may also be purchased on many State contracts.

NATIONAL ACCOUNTS

Clients working on a national basis face unique challenges and a need partner with the ability to meet their requirements across large geographical areas to ensure that every site consistently receives high quality material on time. That's where the Crossville National Account Team steps in. With extensive experience in the retail, automotive, quick-serve restaurant, convenience, and hospitality segments, our in-house National Accounts Team has what it takes to manage supply-chain needs. They provide expert materials forecasting, sales support, order processing and inventory management. What's more, our special pricing programs assist our customers with their cost-control performance.

Contact a National Accounts representative at (931) 484-2110 to learn more about the following:

- Dedicated customer focus with more than 26 years of service to commercial development
- State of the art logistics to ensure major market delivery 2-3 times per week
- Controlled pricing and inventory management
- In-house Technical Services department to assist with installation specification and maintenance recommendations
- Extended product warranties
- Custom design

* Wet areas consist of surfaces that are either soaked, saturated, or subjected to moisture (such as gang showers, tub enclosures, laundry rooms).

** 2 x 2 only.

*** Comes standard with Hydrotect™ technology.

NOTE: Trim applications will differ from field tile applications for the same series.
† 2 x 2 or 3 x 3 UPS mosaics only, see Tile Performance Data Chart for additional information on wet area use for mosaic tiles.

†† Recommended for light-duty horizontal use in residential applications only.

††† 4 x 4 hex for light-duty horizontal use in residential applications only.

Suggested Cleaners For Problem Stains

In keeping with Crossville's long-standing position on sustainability, we highly recommend the use of low VOC, non-hazardous, and non-polluting products for cleaning and maintaining tile and grout (for specific problem stains, please use the following stain removal chart).

These products are used by tile and maintenance professionals and may not be readily available in all areas. Most household cleaners are sufficient to clean common stains as long as they conform to the standards set forth in the Daily Maintenance Section. In the case where stain removal becomes a problem, contact a cleaning and maintenance product supplier or your local tile distributor for professional suggestions.

In keeping with its commitment to quality, Crossville® will offer its Technical Service Department for individualized assistance. This department can assist you in the proper installation and maintenance of all Crossville® Porcelain Stone® tiles. Contact Crossville Technical Services at 931.484.2110.

Crossville® recommends the use of professional cleaning and maintenance products. If additional information or assistance is required on a contaminant not listed, or if you need to find out where the products are sold, please call us, or contact one of the following:

*For problem stains, it may be necessary to use an abrasive powder compound in conjunction with the above cleaners: With Heavy-Duty Tile & Grout Cleaner or Grout Haze Clean-Up, use Aqua Mix Poultice. Please be careful to follow manufacturers recommended procedures when using any cleaning product. To download a copy of "How to Care for Porcelain Stone® tile," be sure to visit our web site at CrossvilleInc.com.

Special Services

Loose samples for Architects and Designers. See back cover for details.

Chip Kits are available through your local distributor.

Custom patterns using 3 x 3 Color Blox Mosaics® and Crossville® Mosaics may be ordered through your local distributor; please allow adequate lead time.

Water jet cutting service offers infinite design possibilities from company logos to the most intricate of murals. Contact your local distributor for more details.

Crosstyle® provides custom cutting any of Crossville® Porcelain Stone® tile into any geometric, straight-edged piece 2 x 2 or larger.

Crossville® now offers each of its Porcelain Stone® products in popular plank shapes, with no minimum order and quick order fulfillment (most Crossville® collections are eligible).

Given the extreme hardness and durability of Crossville® Porcelain Stone®, cutting the tile or drilling holes requires specific blades and drill bits. Go to CrossvilleInc.com, and visit the Literature and Catalog/Installation Guide section for our cutting and core drilling guides.

Crossville® offers a booklet of pattern layout designs called the "Pattern Book". Contact your local distributor or visit Crossville's website at CrossvilleInc.com.

Crossville offers custom color service. Minimum order requirement and special set-up fees apply.

Crossville offers Cross-Grid®, a process that grinds all four sides of our Porcelain Stone® tiles. This squaring is also called rectified, and it allows the tile to be installed with narrower grout joints.

Crossville's website offers a variety of additional tools and information valuable to both professionals and homeowners.

SAMPLE MATERIALS

Sample Materials are available from your local representative. For single samples, please contact our Sample Express Hotline at 1.800.221.9093 or samples@crossvilleinc.com.

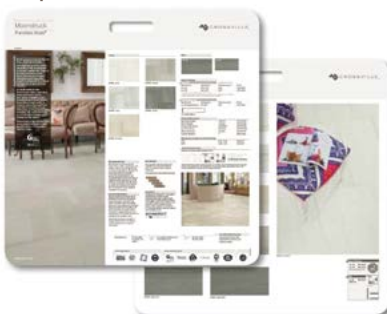

You can also order your samples online at CrossvilleInc.com. Simply pick the color you like and add to your sample cart. Samples are shipped ground services to the address you provide.

Color reproduction in the photography in this catalog is representative only. Slight variation is inherent in fired porcelain and natural stone. Before selecting a color, contact your local representative for live samples or call Sample Express at 1.800.221.9093.

Wet DCOF/Safety Considerations

DCOF ACUTESTSM

The Wet DCOF AcuTestSM is the new standard for accurately determining the actual slip potential on a tile surface. Developed by the Tile Council of North America (TCNA), the Wet DCOF (Dynamic Coefficient of Friction) AcuTest is a repeatable, reproducible method of measuring slip potential. This method uses a specifically engineered device to perform the required testing, ensuring the most precise results. The Wet DCOF AcuTest is included in the latest version of ANSI A137.1 Specifications for Ceramic Tile.

The Tile Council of North America (TCNA), established in 1945, has a leadership role in promoting the use of ceramic tile and in developing North American and international industry standards. To learn more about TCNA, please go to www.tcnatile.com.

The defining threshold value is 0.42 for level interior spaces expected to be walked upon when wet, a wet DCOF of less than 0.42 shall only be installed when the surface will be kept dry when walked upon and proper safety procedures will be applied when cleaning the tiles.

SAFETY CONSIDERATIONS FOR TILE

- In areas where standing water may occur, selected tile should have an elevated DCOF rating. Please refer to the "Tile Performance Data" page for additional information.
- Polished tile should not be used in areas where standing water, oil, or grease may be present due to the tile's low coefficient of friction.
- Pool deck tiles, whether interior or exterior, should have a surface texture that provides an elevated DCOF rating. Please refer to the "Tile Performance Data" page for additional information.
- Ramps or inclines should have an increased DCOF.
- There are no tiles that are slip proof, only slip resistant.

Test results available on request.

Like any material, Crossville® tile can become slippery when wet. We recommend that care be taken to keep the surface dry.

Color reproduction in the photography in this catalog is representative only. Slight variation is inherent in fired porcelain and natural stone. Before selecting a color, contact your local representative for live samples or call Sample Express at 1.800.221.9093.

*The increased real world traction of these types of surfaces cannot be fully realized by any current DCOF testing methodology due to their exaggerated facial structures.

**Due to heavily textured surface, DCOF value is not able to be measured by testing device.

Wet Area Use For Mosaic Tiles

Crossville® produces mosaic tiles with the Cross-Sheen® finish. The AcuTest™ Wet Dynamic COF is ≥ 0.42. Their small sizes ensure frequent grout joints which provides traction and drainage.

Crossville cannot control situations involving incorrect installation, improper slope to the drain for elimination of standing water, and poor surface cleaning.

This information is provided so that customers may make a realistic and informed decision when comparing Crossville's mosaics to other tile products in wet area environments, such as residential/commercial bathrooms, showers, and interior pool decks.

Shade & Texture Index

V1 = Uniform Appearance	Differences among pieces from the same production run are minimal.
V2 = Slight Variation	Clearly distinguishable differences in texture and/or pattern within similar colors.
V3 = Moderate Variation	While the colors and/or textures present on a single piece of tile will be indicative of the colors and/or textures to be expected on the other tiles, the amount of colors and/or texture on each piece may vary significantly. It is recommended that the range be viewed before selection.
V4 = Substantial Variation	Random color and/or texture differences from tile to tile, so that one tile may have totally different colors and/or textures from that on other tiles. Thus, the final installation will be unique. It is recommended that the range be viewed before selection.

Inspect products upon delivery and for best results, blend tile from several cartons during installation.

DEFINITIONS

Bullnose* – Rounded convex trim used to provide a smooth, rounded edge for countertops, stair steps and building corners. This is the most used trim shape for wall tile installations. Wall tile bullnose is sometimes referred to as surface cap. It has one rounded finished edge on the tile and can be used horizontally or vertically. Left Bullnose Corner & Right Bullnose Corner also referred to as Double Bullnose.

Calibrated Tile – Tiles that have been sorted to meet a pre-determined acceptance of variable range in size. Crossville® recommends a grout joint of 3/16 to 1/4 inch.

Crossdot® (CD) – each dot, provides increased slip resistance.

Cross-Grip® (CGS) – The patented raised-point texture is suitable for areas where grease, food, oil and other residue tend to accumulate.

Cross-Sheen® (UPS) – An invisible, integrated finish that protects the look of nearly any Crossville tile from the defacing effects of scuffs, stains, even permanent marker, and graffiti.

Cross-Slate® (CS) – This finish combines the rustic and textured feel of slate with the throughbody color and durability of Porcelain Stone®.

Cross-Tread® (CTS) – The raised pattern surface increases slip resistance and ease of maintenance making this tile a suitable choice for wet and greasy floor areas, as well as for exterior walking surfaces.

Cove Base (Standard, round top)* – This cove base has a rounded finished top like bullnose and is used as a cove base in areas that will not have wall tile installed above it.

Cove Base (Universal, flat top)* – This Cove Base has a finished, flat top. It can be used alone or with tile stacked on top. Exception: Color By Numbers® Cove Base has an unglazed, flat top.

Dynamic Coefficient of Friction (DCOF) – Sometimes called kinetic coefficient of friction. This is the ratio of the force necessary to keep a surface already in motion sliding over another divided by the weight (or normal force) of an object. This force is a materials property of the two surfaces. DCOF is usually less than SCOF for the same materials. Contaminants such as dirt, water, soap, oil, or grease can change this value.

Honed – Tile that has had the surface mechanically altered to a uniform, semi-polished finish.

Modular – Tiles of various dimensions are sized so that they may be installed together in patterns with a common specified joint width. The difference between Actual and Nominal is the grout joint.

Polished (PO) – An aggressive grinding process on the surface of the tile resulting in an integral mirror like finish on the face of the tiles.

Rectified/Cross-Grid® – A tile that has had all edges mechanically finished to achieve a more precise facial dimension. 3-4mm grout joint recommended.

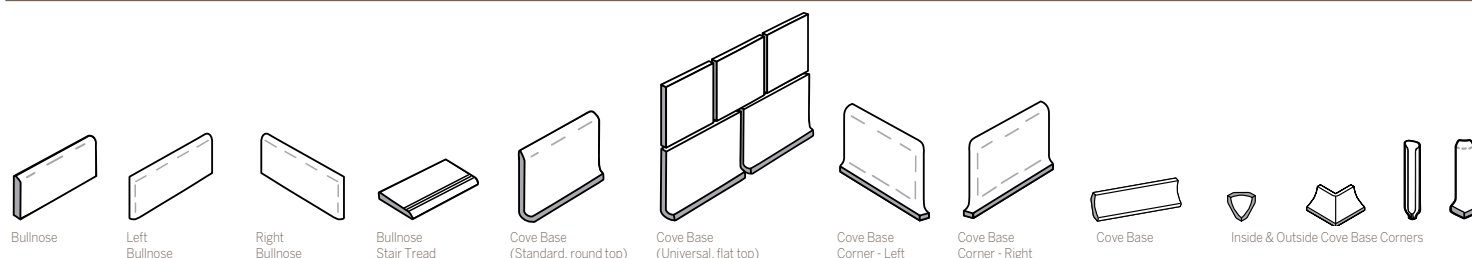

Satin – Tile that has had the surface mechanically altered to produce a smooth, semi-matte finish.

Textured (TX) – The appearance and rustic look of natural slate.

Through-body Color – The color is the same through and through the tile.

Unpolished (UPS) – With Cross-Sheen® finish imparts a subtle glow that enhances the color of the tile and also allows stains and scuff marks to be easily wiped off the surface.

Cool Springs Galleria

Franklin, TN

When a designer for a large shopping mall wanted a unique flooring solution, Crossville worked with them to develop an additional gray from our Shades lineup to create an ombré effect. Not only did we give them the look they wanted, we also created a special run to get the tile they needed quickly.
