ICON KEY

Icons are used throughout the catalog to help you quickly identify key product with high level of performance.

High Acoustics

 Acoustical options available.

Product has NRC (Noise Reduction Coefficient) 0.70 or greater.

Fire Performance

Class A

High Durability

Washability

 Offers superior wash resistance without compromising panel finish integrity, using a washability tester as per ASTM D4828.

Scrubability

 Product is scrubable. See specific info on product page.

Impact Resistance

 Excellent resistance to surface impact as per Falling Ball Test.

Scratch Resistance

 Excellent resistance to surface scratching, scuffing, or chipping as per Hess Rake Test.

Soil Resistance

 Excellent resistance to dirt and/or grease for lasting value and performance.

Color Availability

 Available in color.

Recycle Program

 Product is recyclable through the Armstrong Recycling Program

Tectum® Direct-Attach Wall Panels in White and custom colors

Tectum® Direct-Attach wall panels provide durable, sustainable, acoustical options for a wide variety of applications.

KEY SELECTION ATTRIBUTES

- Durable for heavy use interiors
- Great retrofit solution for noise reduction
- Excellent noise absorption – NRC up to 0.85 (1" panel)
- Tectum® panels are part of the Sustain™ portfolio and meet the most stringent sustainability compliance standards today
- Can be field painted up to 6 times without impacting acoustic or fire performance
- Wide variety of color options available, including made-to-order Colorations® colors and Sherwin-Williams® colors
- Can be mechanically fastened to a wide variety of surfaces including masonry, drywall, wood, and more

TYPICAL APPLICATIONS

- Gymnasiums
- Auditoriums
- Multi-purpose Spaces
- Exposed Structures
- Acoustical Retrofits
- Education Spaces

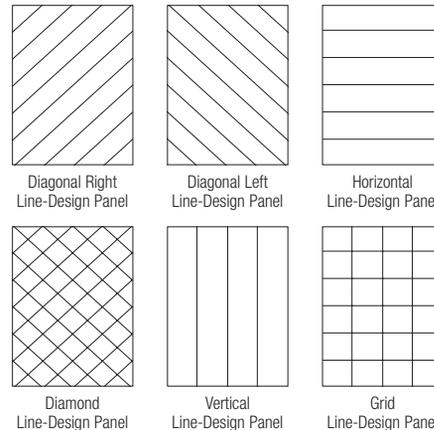

COLORS Due to printing limitations, shade may vary from actual product.

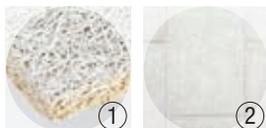

Note: Colorations® colors and panels greater than 1" thick are not included in Sustain™ portfolio.

LINE DESIGN CAPABILITIES

Available through special order.

DETAILS

1. Tectum® Direct-Attach Panel in White
 2. Tectum® Direct-Attach Panels in White

Consult installation instructions for fastener guidance.

ACOUSTICAL MOUNTING METHODS

PHYSICAL DATA

Material
FSC Certified panels available upon request.
Cementitious Wood Fiber; FSC®-certified (COC-003601).
For more information about FSC®-certified fire-retardant products, or to view our FSC®-certification letter, contact TechLine at 1 877 276 7876.

Surface Finish
Factory-applied latex paint with Silicate surface coating for abuse resistance. Natural is unpainted.

Fire Performance
Class A per IBC. Flame Spread Index 25 or less and Smoke Developed Index 50 or less when tested in accordance with ASTM E84.

CAN/ULC S102 surface burning characteristics. Flame Spread Index of 25 or less and Smoke Developed Index of 50 or less (painted, face only).

VOC Emissions
Third-party certified compliant with California Department of Public Health CDPH/EHLB/Standard Method Version 1.1, 2010. This standard is the guideline for low emissions in LEED, CalGreen Title 24, ANSI/ASHRAE/USGBC/IES Standard 189; ANSI/GBI Green Building Assessment Protocol.

Tectum® panels meet CDPH guidelines in enclosed office wall applications at 50% coverage. View certificate details at armstrongceilings.com/tectum.

Humidity/Sag Resistance
HumiGuard® Plus panels are recommended for areas subject to high humidity, up to, but not including, standing water and outdoor applications.

Mold/Mildew Protection
Ceiling panels with BioBlock® performance resist the growth of mold and mildew.

Installation Considerations
Panels must be mechanically attached to approved substrate per installation instructions. To achieve proper finished visual panels should be installed in an ashlar pattern. Four-sided beveled edge panels are recommended in adjoining panel installations.

Use caution and wear appropriate hand, eye, and dust mask protection when cutting and installing Tectum® panels. Refer to installation instructions for complete details and cutting recommendations.

Primary (Embodied) Energy
See all LCA information on our EPDs.

Application Considerations
Color variation among panels is common due to the natural characteristics of the wood on White and Natural panels.

Wood fibers may appear orange on Natural colored panels due to the characteristics of the wood.

Design Considerations
For walls that may experience condensation or moisture, such as uninsulated exterior walls, D- or C- mounting is required to create a gap between the structure and the panel.

Specification Consideration
FSC Certified panels available upon request.
Attention: For FSC®-certified wood products to maintain their CoC certification, products must be sold to a CoC-certified distributor or directly to the installing contractor. Failure to do so breaks the CoC.

Seismic Restraint
Tectum® Direct Attach panels are approved for application in all seismic areas when installed per Armstrong Ceilings Installation Instructions.

Warranty
30-Year Warranty. Details at armstrongceilings.com

Tectum® Finale™ high NRC wall panels provide durable, sustainable, acoustical options for a wide variety of applications.

KEY SELECTION ATTRIBUTES

- Composite panel design combines Tectum® panel and acoustical absorptive material in one for maximum sound control and efficient installation
- Excellent Noise Absorption NRC up to 1.0 for maximum sound absorption (1" panels)
- Panel sizes in 1", 1-1/2", and 2" thickness; widths: 23-3/4" to 47-3/4"; lengths: 48" to 144"
- Available in White, Natural, and made-to-order Colorations® Colors and Sherwin-Williams® Colors
- Abuse resistant for active spaces
- Long edges beveled, square ends
- Can be mechanically fastened to a wide variety of surfaces including masonry, drywall, wood, and more

COLORS Due to printing limitations, shade may vary from actual product.

armstrongceilings.com/photogallery

Tectum® Fabric Walls help control noise and are ideal in open-plan, mixed use spaces.

KEY SELECTION ATTRIBUTES

- Abuse-resistant, fabric wrapped panels attach directly to walls
- Excellent Noise Absorption – NRC up to 0.90
- Panel sizes in 1" or 1-1/2" thickness; widths: 23-3/4" to 47-3/4"; lengths: 48" to 120"
- Tackable panels can be used for bulletin/display boards
- Mounting is quick and easy using internal spline system
- Long lasting, durable fabric options available
- Fabric wrapped to kerf, edges unfinished

Tectum® Panel Art Wall Panels

armstrongceilings.com/capabilities
See more photos at:
armstrongceilings.com/photogallery

Tectum® Panel Art wall panels offer unlimited design flexibility and easy installation.

KEY SELECTION ATTRIBUTES

- Eight shapes and custom options available
- Available in White, Natural, and made-to-order Colorations® colors and Sherwin-Williams® colors
- Can be mechanically fastened to a wide variety of surfaces including masonry, drywall, wood, and more
- Choose from 1", 1.5", and 2" panel thickness: create your own custom shapes from panels up to 48" x 48"
- Abuse resistant for active spaces
- All panels have beveled edges
- Noise absorption – NRC 0.40 (1" panel)

COLORS Due to printing limitations, shade may vary from actual product.

SHAPES Examples of custom options

SOUND SOAK®

Standard and Custom Acoustical Wall Systems

Soundsoak® Wall System 24" x 72" panels in FR-701® Eucalyptus fabric

Easy-to-install wall system, available in a variety of fabric and vinyl colors, and a wide range of sizes and custom options.

KEY SELECTION ATTRIBUTES – STANDARD

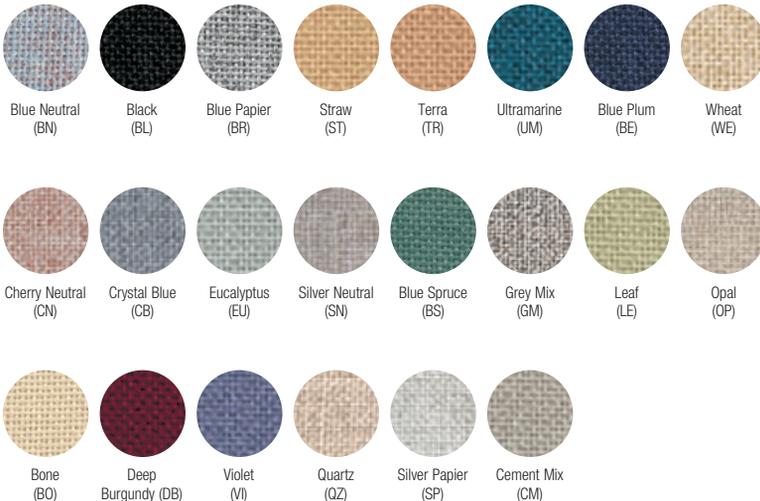

- Available in two substrates
- Acoustical Wall System with an inner core absorbs 50-90% of sound striking surface
- 3 to 6 times the sound absorption of fabric-covered gypsum
- Wide variety of chair rail accessories for design and durability
- Coordinate finishes for Soundsoak Baffles (Pg. 65)
- Full standard finish offering at armstrongceilings.com/soundsoak

KEY SELECTION ATTRIBUTES – CUSTOM

- Custom fiberglass panels up to 48" wide and 120" high on 1/2" – 4" fiberglass, in 1/2" increments
- Tackable options including 5/8" thick mineral fiber panels that will sit flush with door frames – perfect for offices and corporate environments
- Variety of impact resistant acoustical wall panels available for high-traffic and high-abuse areas
- Convex and concave curved panels in up to 48" x 120" sizes

STANDARD FABRICS

FR-701® (FR)

Fabrics are dye-lotted and should be segregated by dye lot. Do not mix.

W5	yes	no
W6	yes	no

ACCESSORIES

For corners, splines, Z-Clips, and infill panel options, see pages 461-462.

PHYSICAL DATA

Material

FSC® certified fire retardant particle board with face-cut veneers (SW-COC-003601). For more information about FSC-certified products, or to view our FSC certification letter, visit armstrongceilings.com/woodworksfs

Surface Finish

Clear or tinted semigloss coating

Fire Performance

Class A ASTM E84 surface burning characteristics, HPVA Certified with audit program per ASTM E84. Flame Spread Index 25 or less. Smoke Developed Index 50 or less.

CAN/ULC S102 surface burning characteristics. Flame Spread Rating 25 or less. Smoke Developed Classification 50 or less.

Application Considerations

Variation among panels may occur due to the natural characteristics of the wood and grain (special order panels available).

It is very important that WoodWorks® panels are climatized prior to installation. Relative humidity between 25% and 55% and temperatures between 50°F and 86°F must be maintained throughout the life of the product.

Design Considerations

The reveal width on WoodWorks Tegular panels and WoodWorks Walls is different. For an application with the same size reveal in the ceiling and on the wall, order custom-cut panels or use Vector® ceiling panels Z-clipped to the wall.

Specification Consideration

Attention: For FSC-certified wood products to maintain their CoC certification, products must be sold to a CoC-certified distributor or directly to the installing contractor. Failure to do so breaks the CoC.

Warranty

WoodWorks® Channeled Wall System with W7 Perforation in Natural Variations™ Light Cherry with finish molding

Perforated wall panels with acoustical backing that improves sound quality and reduces reverberation time.

KEY SELECTION ATTRIBUTES

- Install in the ceiling, on the wall, or create 90° angled ceiling-to-wall transitions
- Two plank lengths available as standard products
- California Air Resources Board (CARB) compliant
- USDA-Certified Biobased Product 100% (preferred for government projects)
- Shorter lead times and lower cost than custom millwork

VENEERS

Due to printing limitations, shade may vary from actual product.

 * See wall construction in physical data below for test wall construction.

ACCESSORIES

For installation splines, corners, chair rails, etc., see pages 461-462 in catalog, Woodworks Ekos Brochure, or armstrongceilings.com/ekos

PHYSICAL DATA

Panel Material
Mineral fiber with real wood veneers. Face veneers are quarter-cut, random-matched Anigre or Makore veneers stained to the Ekos® finishes.

Panel Surface Finish
Tinted, no-solvent coatings on face veneers.

Accessory Material
Milled solid wood stained to coordinate with Ekos finishes. Extruded aluminum.

Wall Construction
Wall construction is one layer 5/8" drywall each side of 3-5/8" metal stud, with Ekos panels attached on one or both sides.

Fire Performance
Class B fire performance per IBC. Flame Spread Rating of 50 or less and Smoke Developed Classification of 100 or less when tested per ASTM E84 or CAN/ULC S102.

Application Considerations
Due to the natural characteristics of veneers, variations in color and grain can be expected. Do not mix panels from different lots. Veneered panels may also darken over time.
It is very important that WoodWorks® Ekos panels are climatized prior to installation. Relative humidity between 25% and 55% and temperatures between 50°F and 86°F must be maintained.

Ekos wall panels are not recommended for use in high-traffic or high-impact areas. For these areas, contact TechLine at 1 877 276-7876 to explore WoodWorks custom wall systems.

Ekos wall panels may be installed horizontally. For more details, see armstrongceilings.com/walls.

Fire Performance

Infusions® panels have been tested according to NFPA 286 and are equivalent to Class A Interior Finish as defined by the International Building Code.
Contact TechLine at 1 877 ARMSTRONG for specific U.S. and Canadian fire performance data.

Installation and Design Considerations

Do not allow panel edges to get wet. Infusions panels are not approved for exterior application.

Panel kits include ceiling hanging kit and floor mounting kit hardware. Floor mounting hardware is optional, but recommended. Floor mounting hardware requires field drilling pilot holes in panels.

Linking kits must be ordered separately.

Panels can be damaged by exposure to high temperatures. Panel temperature should not be permitted to exceed 100°F.
