Ordering C.O.M., C.O.L., and C.O.V.

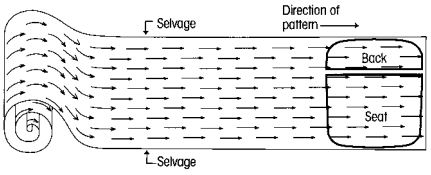
BONDUEL, GREEN BAY, ONTARIO, and TUPELO

How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.



C.O.M., C.O.L. and C.O.V. Testing
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI
Attn: C.O.M. Specialist
1687 Westminster Drive, Gate 3
Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production
Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing
For products shipped from Green Bay, WI facility, ship upholstery material to:

KI
Attn: C.O.M. Storage
1687 Westminster Drive, Gate 3
Green Bay, WI 54302

For products shipped from Tupelo, MS facility ship material to:

KI Tupelo
Attn: C.O.M. Storage
2112 South Green Street
Tupelo, MS 38801

For products shipped from Bonduel, WI facility, ship material to:

KI
Attn: C.O.M. Storage
204 West South Street
Bonduel, WI 54107

For products shipped from Ontario, CA facility, ship material to:

Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot
Attn: C.O.M. Storage
1110 S. Mildred Ave.
Ontario, CA 91761

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

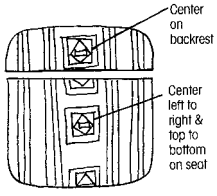


Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders
KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

Custom Color Matching Requirements

KI Custom Poly Color Matching Program

Whatever you imagine, whatever you require, KI's custom color-matching program lets you pick your color. Match an organization's brand colors. Match fabrics. Match surface materials. The choice is yours.

Custom Color Matching Requirements

- **Pantone Number or Color Samples**. To ensure we match your color exactly, we require either a Pantone color number or two color samples (chip, swatch, or paint sample). We do request that the size be substantial enough to allow for us to retain for our internal matching process (minimum 2.5" x 3.5").

- **Extended Lead Time**. Using the unique combinations of specialty bases and pigments, our Custom Color Matching and Manufacturing processes do add time to your production schedule.
    - The color match process (see steps below) on average will take 2-3 weeks to produce a match sample for your review and gain your written approval to proceed. *Starting this during the quoting process is encouraged to reduce overall lead time.*

    - Orders with custom colors will typically reflect standard lead time plus 15 additional days to source the appropriate raw materials and run the custom order.

- **Minimum Quantity**. No additional set-up fee is incurred if the quantity (per color, product line, and order) is 100 or more. A $500 set-up fee (per color, product line, and order) is applied if the quantity is 99 or less. You'll see a "Custom Color Set-Up Charge" note appear on your Custom Options Quote until the order is placed and quantity is determined.

  Note: The Doni Seating Collection, with its two-tone color capabilities, would require a single $500 set-up fee if one or both colors are custom. In addition, please note that reversing the inner/outer colors of Doni's two-tone standard color combinations would also be considered custom.

Custom Color Matching Process

When your purchase order is submitted, it is simply placed on hold until the color match is finalized. As soon as we receive your Pantone number or custom color samples, the process for color matching begins.

Note: *If the project requires a compressed manufacturing/shipping schedule, KI encourages you to process the color match during the quotation stage. This will accelerate the purchase order release into production.*

Step 1. Provide the Pantone color number to KI Customer Service by calling Customer Service at 1-800-424-2432 or emailing us at SalesOps@ki.com. Custom color samples can be mailed to KI at:

KI Customer Service (Provide specific contact name if known)
Attn: **Custom Color Match Required (Please reference the PO# or Project Name)**
1330 Bellevue Street
Green Bay, WI 54302

**In the event the color requested is a discontinued KI color or non-standard on the product requested, no color match is necessary (minimum quantities and extended lead time still apply). KI will use the custom options process to facilitate the quote/order.*

Step 2. KI begins the matching process which takes 5-10 days depending upon how quickly the exact color is matched, taking into account lighting, visual and spectrographic readings as compared to the originals.

Step 3. We then ship the color sample chip and a letter asking for you to sign the letter and fax it back to us within 24 to 48 hours.

Step 4. Upon receipt of your approval signature, we remove the hold status of your order and begin production, using standard production lead times plus 15 days.

Custom Color Matching Requirements

Doni®

Guest Chair General Information

Armless Fourstar Swivel Base Chair

Armless Tapered Steel Leg Chair

Armless Tapered Wood Leg Chair

Armless Wire Tower Base Chair

Overall Dimensions				
Width	27-1/2"	19-3/8"	19-3/8"	19-3/8"
Depth	21"	21"	21"	21"
Height	33-3/4"	33-3/4"	33-3/4"	33-3/4"

SPECIFICATIONS

Seat Shell and Backrest Articulation Mechanism

The backrest and seat are injection-molded polypropylene. The seat and backrest are joined by a pair of hidden articulation mechanisms, each consisting of a 14-gauge steel housing, twin 7-gauge levers, and steel coil springs. While maintaining a one-piece shell appearance, this mechanism allows the backrest to recline up to 17 degrees of motion.

Optional Upholstered Seat and Back

Urethane foam is attached to an injection-molded polypropylene liner board, then upholstered using a draw-string process. Seat foam is molded nominal 1" thickness, and back foam is nominal 1/2" thickness. The flush-head fasteners that attach the back pad are color-matched to the polypropylene.

Fourstar, Swivel Base

The under-seat support structure is a die-drawn 12-gauge steel plate. A 3/4" diameter steel pin is welded to the seat plate allowing the seat to swivel on a nylon bushing housed in the base. Seat structure is finished with baked-on, electrostatically-applied 30 degree gloss epoxy powder-coat paint. The fixed height base constructed of a polished die-cast aluminum fourstar base and a chrome-plated steel tube column.

Tapered Steel Legs

A seat ring is made of 1/2" diameter steel wire and attached to the seat with 14-gauge steel brackets. Inner leg wires are made of 1/2" diameter steel wire and are plug-welded to tapered tubular legs. All joints are welded and the frames are finished in either baked-on, electrostatically-applied 30 degree gloss epoxy powder-coat paint or bright nickel-chrome plating.

Tapered Wood Legs

A seat ring is made of 1/2" diameter steel wire and attached to the seat with 14-gauge steel brackets. Inner leg wires made of 1/2" diameter steel wire complete the subframe. All joints are welded and the subframes are finished with baked-on, electrostatically-applied 30 degree gloss epoxy powder-coat paint. Legs are turned from beech, stained, and clear-coat finished. Legs are drilled to accept subframe inner leg wires and fastened by means of two-part expoxy adhesive.

Wire Tower Base

A seat ring is made of 1/2" diameter steel wire and attached to the seat with 14-gauge steel brackets. Legs are 7/16" diameter steel wire, fully gusseted with 5/16" diameter wire. All joints are welded and frames are finished in bright nickel-chrome plating.

Glides

The tapered steel legs are equipped with swivel glides in a bright steel finish. The wire tower base, wood legs, and fourstar swivel base are equipped with black nylon glides.

KI Custom Poly Color Matching Program

Whatever you imagine, whatever you require. KI's custom color-matching program lets you pick your color.

No upcharge with a minimum quantity of 100 or more ($500 set-up charge if quantity is 99 or less). See "Custom Color Matching Requirements" page in the front of this book for ordering details.

INFORMATION

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

SPECIFICATIONS

Seat Shell and Backrest Articulation Mechanism

The backrest and seat are injection-molded polypropylene. The seat and backrest are joined by a pair of hidden articulation mechanisms, each consisting of a 14-gauge steel housing, twin 7-gauge levers, and steel coil springs. While maintaining a one-piece shell appearance, this mechanism allows the backrest to recline up to 17 degrees of motion.

Optional Upholstered Seat and Back

Urethane foam is attached to an injection-molded polypropylene liner board, then upholstered using a draw-string process. Seat foam is molded nominal 1" thickness, and back foam is nominal 1/2" thickness. The flush-head fasteners that attach the back pad are color-matched to the polypropylene.

4-Leg and Caster Frame

Legs are 7/8" o.d. x 13-gauge tubular steel. A single ring of 1/2" diameter steel wire forms the crossmember. All joints are welded. An optional wallsaver configuration is available. The wallsaver configuration maintains 1/2" gap between backrest and wall by locking the backrest mechanisms in the upright position.

Sled Frame

Sled side frames are made from 3/4" o.d. x 13-gauge tubular steel. A single ring of 1/2" diameter steel wire forms the crossmember. All joints are welded.

Stool Frame

A seat ring is made of 1/2" diameter steel wire and attached to the seat with 14-gauge steel brackets. Legs are 3/4" diameter steel tubing. A 3-sided footrest is made of 1/2" diameter steel wire. All joints are welded.

Frame Finish

Frames are finished in either baked-on, electrostatically-applied 30 degree gloss epoxy powder-coat paint or bright nickel-chrome plating.

Arms

Optional armrests are available. When equipped with arms, the support structure is a continuation of the rear leg finished to match the frame color. The armrests are injection-molded, glass-reinforced polypropylene. Arm color matches the frame finish (except for chrome, hammertone, and metallic finishes which match the outer shell poly color). The steel frame tube is inserted into a socket molded into the armrest and secured with a screw.

Glides

The bottom ends of the 4-leg chair tubes are formed to be vertical where they meet the floor. The leg tubes are capped with poly-proplyene end caps matching the leg color (except chrome, hammertone, and metallic finishes which use black caps). Optional glides for the leg chairs have a bright steel surface or plastic glides. Optional glides for the sled base are co-extruded to provide a softer, non-skid surface to protect the floor, but do not glide.

Sled base chairs are also available with black nylon (plastic), stainless steel, or non-marring (clear nylon) glides.

Stools are equipped with swivel glides in a bright steel finish. The floor contact surface is either steel or neutral color nylon.

Casters

4-leg chairs may be ordered with casters instead of glides. Casters are 50mm o.d. double-wheel, high-impact thermoplastic available with hard or soft wheel surface, in black only.

Gangers
Optional gangers are available on armless 4-leg and sled base chairs only. Gangers are made of chrome-plated 3/16" diameter steel wire mounted to the chair with an injection-molded nylon hub.

Transport Dolly
Frame construction is welded tubular steel with a black powder-coated finish and 5" wheels (two swivel and two fixed). The dolly fits 4-leg and sled base chairs and has a capacity of 12 poly chairs or 6 upholstered.

Stacking Vinyl Upholstered Chairs
It is recommended that chairs to be stacked be covered in material other than vinyl as an impression in the seat may result. KI does not warrant the effects of stacking on stock or C.O.M. vinyl upholstery.

KI Custom Poly Color Matching Program
Whatever you imagine, whatever you require. KI's custom color-matching program lets you pick your color.

No upcharge with a minimum quantity of 100 or more ($500 set-up charge if quantity is 99 or less). See "Custom Color Matching Requirements" page in the front of this book for ordering details.

C.O.M. Testing and Production Requirements
Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

SPECIFICATIONS

Seat Shell and Backrest Articulation Mechanism

The backrest and seat are injection-molded polypropylene. The seat and backrest are joined by a pair of hidden articulation mechanisms, each consisting of a 14-gauge steel housing, twin 7-gauge levers, and steel coil springs. While maintaining a one-piece shell appearance, this mechanism allows the backrest to recline up to 17 degrees of motion.

Optional Upholstered Seat and Back

Urethane foam is attached to an injection-molded polypropylene liner board, then upholstered using a draw-string process. Seat foam is molded nominal 1" thickness, and back foam is nominal 1/2" thickness. The flush-head fasteners that attach the back pad are color-matched to the polypropylene.

Underseat Structure

Support structure is die-drawn, 12-gauge steel plate. Structure is finished with baked-on, electrostatically-applied, 30-degree gloss epoxy powder-coat paint coordinated with base selection.

Arms

Optional armrests are available. When equipped with arms, a support structure is 7/8" o.d. x 13-gauge tubular steel welded directly to the seat structure plate. The steel support tube is inserted into a socket molded into the armrest and secured with a screw. Armrests are molded from glass-reinforced polypropylene. Structure and armrests are warm grey when warm grey base is selected or black when black or aluminum is selected.

Casters

Casters are 60mm o.d. double-wheel, high-impact thermoplastic and are available with hard (warm grey or black) or soft (black only) wheel surface.

Base

The base is a 26" injection-molded, glass-reinforced nylon 5-blade base. A single paddle under the seat operates the height-adjusting pneumatic cylinder. Standard chair and stool base available in black, wam grey or polished aluminum (upcharge for polished aluminum).

Base color selection for black includes; black base, black cylinder and black carpet or hard floor casters.

Base color selection for warm grey includes; warm grey base, warm grey cylinder and warm grey carpet casters (hard floor casters not available in warm grey). Stool cylinder is always black.

Base color selection for polished aluminum includes; polished aluminum base, black cylinder and black carpet or hard floor casters.

Foot Ring

Task stools are equipped with an adjustable-height foot ring made with black die-cast aluminum hub and spokes with an 18" diameter chrome-plated tubluar steel ring.

KI Custom Poly Color Matching Program

Whatever you imagine, whatever you require. KI's custom color-matching program lets you pick your color.

No upcharge with a minimum quantity of 100 or more ($500 set-up charge if quantity is 99 or less). See "Custom Color Matching Requirements" page in the front of this book for ordering details.
