# Ordering C.O.M., C.O.L., and C.O.V.

## How to Specify C.O.M. Upholstery

Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.

## C.O.M., C.O.L. and C.O.V. Testing

KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

**KI**  
**Attn: C.O.M. Specialist**  
**1687 Westminster Drive, Gate 3**  
**Green Bay WI 54302**

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

## C.O.M., C.O.L. and C.O.V. Production

Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1" square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

## Treated Materials

If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

## Split Orders

If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

## Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

## Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

## Intricate Patterns

In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

Specifications Form

January 2017

All fabrics, including COM, COL, KOM and in grades will be applied at the factory's discretion. If a pattern or stripe is to be applied in a certain direction, the customer MUST specify this in writing on the P.O. and attach a sample of the fabric with it running in the application direction to the P.O. Specifying fabric direction may increase the amount of COM or KOM yardage required. Check with KI Customer Service to see if an increase in yardage is necessary BEFORE specifying, ordering and sending COM and COL to the factory or having KOM quoted.

ALL C.O.M AND C.O.L SHIPMENTS MUST BE PREPAID TO: KI  
217 Feld Avenue  
High Point, NC 27263

COM and COL must be identified as follows:

1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

COLLECT SHIPMENTS WILL BE REFUSED.

SHIPMENT SCHEDULE WILL BE GIVEN WHEN ALL FABRIC IS RECEIVED FOR ENTIRE ORDER

YARDAGE REQUIREMENTS LISTED IN PRICE LIST ARE BASED ON PLAIN GOODS 54" WIDE. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. CONSULT MATRIX BELOW FOR ADDITIONAL YARDAGE NEEDED.

C.O.M. INCREASE MATRIX (The yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or KOM upholsteries).

This table is a general guide.

IF FABRIC COMES IN ON MULTIPLE ROLLS, ONE ADDITIONAL YARD PER ROLL NEEDS TO BE ADDED TO THE YARDAGE REQUIREMENT.

SPECIAL NOTE: WE CAN ASSUME NO RESPONSIBILITY FOR THE DURABILITY OR TAILORING QUALITY OF CUSTOMER FURNISHED COVERINGS (C.O.M.) OR KOM. KOM: is fabric that KI will purchase for you at jobber's price (net) plus a nominal charge for handling, shipping, and managing.

### SPECIFICATIONS

#### Backrest, Seat and Shroud

Injection molded polypropylene.

#### Optional Upholstered Seat or Seat & Back

Urethane foam is attached to an injection-molded polypropylene liner board, then upholstered using a draw-string process. Seat foam is molded nominal 1" thickness and back foam is nominal 1/2" thickness. The flush-head fasteners that attach the back pad are color-matched to the polypropylene.

#### Underseat Structure

Support structure is die-drawn 12-gauge steel plate. Fixed backrest mechanism structures are made from 1/2" dia. steel wire and attached by welding. Structure is finished with baked-on electrostatically-applied 30 degree gloss epoxy.

#### Backrest Articulation Mechanism

Two outer backrest supports formed from

1" dia. tubular steel are inserted into sockets molded into the backrest and secured with screws. The backrest assembly moves over molded thermoplastic slide bushings and is supported by steel coil springs. This mechanism allows the backrest to move through 15 degrees of movement, about an axis of rotation that is through the hips of the occupant.

#### Tandem Base

Cast aluminum alloy leg section. 14-gauge 1" x 2" seamless steel column. Upright and base are painted monochromatic with beam and yoke. Columns are welded to a plate which clamps onto beam.

#### Tandem Arm

Oval tubular steel arm support with self-skinning urethane armrests measuring 10-1/4" long x 4" wide. The tubular arm support is welded to a yoke and then fastened to the beam via a coverplate.

#### In-Line Table

Solid core top is 20" x 20" x 7/8" with a vinyl bullnose edge.

#### Corner Table

Solid core top is 30" x 30" x 7/8" with a vinyl bullnose edge.

**UPHOLSTERY INFORMATION****C.O.M. Fabric**

For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yield as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can hold up the order. For each roll that is sent, one yard needs to be added and needs to be added to one of the rolls, not separately.

**Fabric Disclaimer**

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Special Cost Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Special Cost Request.

**FINISH INFORMATION****SPECIAL FINISH MATCHES**

KI can match special finish requests at an upcharge of \$68 List per item, up to 12 or a maximum charge of \$818 List per order per color. Special finish requests must be sent to your KI customer service representative.

Upon receipt from KI, the finishing department will prepare a "strike-off" which will be sent to the customer for approval.

The approval form accompanying the strike-off should be faxed to your KI customer service representative. Upon receipt of the signed approval form, KI will proceed with the order. Disapproved samples may be sent back to KI directly with an explanation of disapproval. A Special Finish Number (SFN) will be assigned to this finish sample for future reference or reorders

## INFORMATION

### C.O.M. Requirements

C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult COM/COL matrix for ordering additional

yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

Multiply number of seats, backs and arms required by yardage amount (e.g. 3 replacement seats required x 1 yard = 3 yards total).

### C.O.L. Requirements

Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq ft).

### Contrasting Upholstery

When contrasting fabric is chosen, price at highest in-grade.

### Minimum Fabric/Leather Quantity

Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

### Construction

Seat frame constructed of welded

structural steel. Back constructed from formed laminated plywood. (Loveseat from kiln-dried hardwood). Arms constructed from kiln-dried hardwood. Cushioning of multiple densities of polyurethane foam and Dacron fiber.

### California TB133 Fire Safety Code

The above seating products can be manufactured using the appropriate flame-retardant materials and fabric selections for compliance to California Technical Bulletin 133. Please contact KI customer service for fabric compliance. Not available with moisture barrier.

## SPECIFICATIONS

### Seat and Backrest

Seats and backrests are molded compound curved polypropylene with a textured finish. Seat is two-piece construction. Upholstered chairs have partially exposed polypropylene surfaces. Fabric is upholstered over 9/16" foam on the backrest and 15/16" on the seat. The seat attaches to the beam via a seat weldment which is bolted to the beam.

### Backrest Supports

Two die-cast aluminum backrest supports attach the backrest to the Torsion® mechanism. A steel tube is cast into each backrest support for added strength.

### Torsion® Mechanism

The back flex is achieved by the Torsion® mechanism. It consists of two flat torsion springs captured at both ends by steel bushings which in turn engage with the backrest supports. The Torsion® mechanism creates gradually increasing resistance over the full

12° of back flex.

### Tandem Base

Cast aluminum alloy leg section. 14-gauge, 1" x 2" seamless steel column. Upright and base are painted monochromatic with beam and yoke. Columns are welded to a yoke/plate which clamps onto beam.

### Tandem Arm

Oval tubular steel arm support with self-skinning urethane armrests measuring 10-1/4" long by 4" wide. The tubular arm support is welded to the seat. If an in-line table is included in the arrangement, a "fill-in" arm is supplied which is mechanically fastened to the beam using a yoke and coverplate. Arm is monochromatic with polypropylene shell.

### In-line Table

Solid core top is 20" x 20" x 7/8" with a vinyl bullnose edge.

### Corner Table

Solid core top is 30" x 30" x 7/8" with a vinyl bullnose edge.

### UPHOLSTERY INFORMATION

#### C.O.M. Fabric

For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements. Multiple rolls have shorter pieces of fabric on them and do not allow nesting and stacking of the fabric to achieve the best yield as is done with one large roll. This results in yardage shortages and requests for additional fabric from the client, which can hold up the order. For each roll that is sent, one yard needs to be added and needs to be added to one of the rolls, not separately.

#### Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Special Cost Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Special Cost Request.

### FINISH INFORMATION

#### SPECIAL FINISH MATCHES

KI can match special finish requests at an upcharge of \$68 List per item, up to 12 or a maximum charge of \$818 List per order per color. Special finish requests must be sent to your KI customer service representative.

Upon receipt from KI, the finishing department will prepare a "strike-off" which will be sent to the customer for approval.

The approval form accompanying the strike-off should be faxed to your KI customer service representative. Upon receipt of the

signed approval form, KI will proceed with the order. Disapproved samples may be sent back to KI directly with an explanation of disapproval. A Special Finish Number (SFN) will be assigned to this finish sample for future reference or reorders

## UPHOLSTERY INFORMATION

### C.O.M. Requirements

C.O.M. yardage requirements listed above are based on plain goods 54" wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

### C.O.L. Requirements

Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft).

### Contrasting Upholstery

When contrasting fabric is chosen, price at highest in-grade.

### Minimum Fabric/Leather Quantity

Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approximately 50 sq. ft).

### California TB133 Fire Safety Code

The above seating products can be manufactured using the appropriate flame-retardant materials and fabric selections for compliance to California Technical Bulletin 133. See pricing column for upcharge. Please contact KI customer service for fabric compliance. Not available with moisture barrier.

### Construction

Frames are constructed of kiln-dried lumber and laminated hardwood plywood. Express wood components finished with catalyzed varnish (specify finish when ordering). Tight seats and backs sprung with stretch strap webbing stapled into position. Multiple densities of polyurethane foam covered with a layer of .75 super soft foam. Seats, backs and arms are field-replaceable.
