How to Specify C.O.M. Upholstery

Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors. By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous vardage.

C.O.M., C.O.L. and C.O.V. Testing

KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

Attn: C.O.M. Specialist 1687 Westminster Drive, Gate 3 Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production

Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing For products shipped from Green Bay, WI facility, ship upholstery material to:

Attn: C.O.M. Storage 1687 Westminster Drive, Gate 3 Green Bay, WI 54302

For products shipped from Tupelo, MS facility ship material to:

> KI Tupelo Attn: C.O.M. Storage 2112 South Green Street Tupelo, MS 38801

For products shipped from Bonduel, WI facility, ship material to:

> Attn: C.O.M. Storage 204 West South Street Bonduel, WI 54107

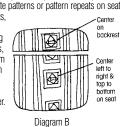

For products shipped from Ontario, CA facility, ship material to:

> Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot Attn: C.O.M. Storage 1110 S. Mildred Ave. Ontario, CA 91761

Intricate Patterns

In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests Center provide a

sketch noting requirements, as in Diagram B, along with materials for testing, and with the order.

Treated Materials

If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate vardage shipment.

Solit Orders

If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M., C.O.L. or C.O.V. material due to a change of unholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material

C.O.M., C.O.L and C.O.V. Information Form Please see information below and check the appropriate box. A copy of this form should accompany test ■ Submitted for testing. ■ Test approved. Ordering C.O.M., C.O.L., and C.O.V. Bonduel, Green Bay, Ontario, and Tupelo

Customer's Own Material ■

Specifications Form January 2017

All fabrics, including COM, COL, KOM and in grades will be applied at the factory's discretion. If a pattern or stripe is to be applied in a certain direction, the customer MUST specify this in writing on the P.O. and attach a sample of the fabric with it running in the application direction to the P.O. Specifying fabric direction may increase the amount of COM or KOM yardage required. Check with KI Customer Service to see if an increase in yardage is necessary BEFORE specifying, ordering and sending COM and COL to the factory or having KOM quoted.

ALL C.O.M AND C.O.L SHIPMENTS

MUST BE PREPAID TO:

217 Feld Avenue High Point, NC 27263

COM and COL must be identified as follows:

- I. Name and address
- 2. Your purchase order number
- 3. Our style number to which fabric is to be applied
- 4. Supplier name and fabric name, number, and color

COLLECT SHIPMENTS WILL BE REFUSED.

SHIPMENT SCHEDULE WILL BE GIVEN WHEN ALL FABRIC IS RECEIVED FOR ENTIRE ORDER

YARDAGE REQUIREMENTS LISTED IN PRICE LIST ARE BASED ON PLAIN GOODS 54" WIDE. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. CONSULT MATRIX BELOW FOR ADDITIONAL YARDAGE NEEDED.

C.O.M. INCREASE MATRIX (The yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or KOM upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7" REPEAT	8"-13" REPEAT	14"-21" REPEAT	22"-27" REPEAT	28"-33" REPEAT	34"-40" REPEAT	41"-48" REPEAT
54"	0	20%	25%	30%	45%	55%	70%	80%
51"-53"	15%	25%	30%	35%	50%	60%	80%	90%
48"-50"	20%	30%	35%	40%	55%	65%	85%	95%
45"-47"	30%	45%	50%	55%	60%	80%	90%	100%
36"-44"	50%	65%	70%	75%	80%	100%	110%	120%

FABRIC WITH DOUBLE REPEAT: IF USING A FABRIC WITH A DOUBLE REPEAT, PLEASE FOLLOW THIS FORMULA: TAKE THE TOTAL AMOUNT OF THE LARGER AND HALF OF THE SMALLER REPEAT; ADD TOGETHER TO FIND THE CORRECT OVERALL REPEAT. EXAMPLE: 10" VERTICAL WITH 14" HORIZONTAL WOULD BE 14+5=19.

IF FABRIC COMES IN ON MULTIPLE ROLLS, ONE ADDITIONAL YARD PER ROLL NEEDS TO BE ADDED TO THE YARDAGE REQUIREMENT.

SPECIAL NOTE: WE CAN ASSUME NO RESPONSIBILITY FOR THE DURABILITY OR TAILORING QUALITY OF CUSTOMER FURNISHED COVERINGS (C.O.M.) OR KOM. KOM: is fabric that KI will purchase for you at jobber's price (net) plus a nominal charge for handling, shipping, and managing.

Customer's Own Material ■

Specifications Form January 2017

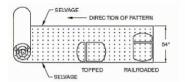

ADDITIONAL NOTES:

- Orders cannot go into production without the information listed at right.
- Attach memo sample to this approval sheet.
- If your order has been placed, list PO#
- The cost of the COM sample will be paid by the client.
- Even after preliminary approval, KI reserves the right to reject COM/COL if necessary when the quality is not satisfactory for the product to be upholstered. KI assumes no responsibility for its overall appearance, flammability, durability, color fastness or any other quality after upholstered on a KI product.

ALL COM MUST BE APPROVED.

Photocopy this form and submit with COM fabric for approval:

(This fabric approval is for the purpose of advising how to apply your COM fabric, verify yardage required, and suitability.)

Base diameter	24"	26"	26"

SPECIFICATIONS

Mechanism (Fabric and Mesh Task Chair)

Reinforced plastic base on cast aluminum housing with three control levers. One lever activates the pneumatic cylinder for a range in seat height. The second lever controls the back tilt angle, which has four settings. The third lever adjusts the tilt force and is located at the side of the chair for ease of use.

Mechanism (Conference Chair)

Swivel tilt mechanism is a stamped steel dual housing which includes swivel and tilt tension. Steel handle with molded urethane paddle controls seat height adjustments along with single lock-out or free-float action. Standard seat height range adjusts from 16-1/4" to 19-1/2". An auto height/auto return pneumatic cylinder option is available which returns the chair to its original frontfacing and highest position.

Backrest (Conference and Mesh Task Chair)

A black reinforced plastic frame with mesh insert

Backrest (Fabric Task Chair)

Flannel plastic back liner with polyurethane foam and a replaceable fabric slip cover attached to a black reinforced plastic frame. A plastic strip sewn to the edge of the fabric slip cover slides into a channel in the back liner.

Seat (Fabric and Mesh Task Chair)

Plastic seat liner and polyurethane foam covered with a replaceable fabric slip cover. The fabric slip cover is attached to the seat with Velcro.

Seat (Conference Chair)

Seat foam, upholstery, and underseat plastic liner are one unit which is field-replaceable.

Seat Slide (Fabric and Mesh Task Chair)

Seat depth is adjustable to one of five settings.

Adjustable Lumbar (Mesh Task Chair)

Optional clear adjustable lumbar has two control levers. One adjusts the lumbar height and the other adjusts the lumbar depth. Levers telescope and retract for ease of use.

Headrest

Upholstered in black faux leather. The headrest pad rotates forward or backward (Mesh Task Chair) or adjusts vertically and forward or backward (Fabric Task Chair). The Fabric Task Chair headrest automatically maintains a supportive position as the user tilts back. Headrests are field-installed.

Adjustable Arm (Fabric Task Chair)

Black molded arm cap is mounted to a reinforced black plastic arm post. The arm cap is made of TPU (thermal polyurethane), a non-irritating, recyclable material which is soft to the touch. It has 2" of depth adjustment and 3" of height adjustment. The arm caps pivot to provide a 4" range between the arm caps from 17 - 21".

Adjustable Arm (Mesh Task Chair)

Black molded polyurethane arm cap is mounted to a reinforced black plastic arm post. It has 2" of depth adjustment and 2" of height adjustment. The arm caps pivot to provide a 5-3/4" range between the arm caps from 16-3/4 - 22-1/2".

Fixed T-Arm and Loop Arm

Black reinforced plastic arm.

Base

Two 26" five-blade base options are available: a reinforced black nylon base or a polished aluminum base.

Casters

Double wheel black carpet or hard surface casters are molded of reinforced plastic. A reinforced plastic glide option is available on the Conference Chair.

INFORMATION

C.O.M. Testing and Production Requirements

Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test sample must be sent to:

ΚI

Attn: C.O.M. Specialist 2112 South Green Street Tupelo, MS 38801

C.O.M. Availabilty

C.O.M. is only offered on the Mesh Task Chair.

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Special Cost Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Special Cost Request.

24/7

Altus Fabric Task and Mesh Task chairs can be used in 24/7 applications.

Height	32-1/2" - 37-1/2"	35-1/2" - 43"

SPECIFICATIONS

Shell

One-piece contoured wood shell is constructed of formed plywood, .460"-.480" thick, 7-ply maple and poplar construction. The mold-formed seat and back provide for comfort and strength. Top/ bottom and front/back surfaces are vertical grade postforming, product type 335, high-pressure laminate thickness of .028", standard finish is #38 or #60 with a sanded edge with tung oil finish. The wood shell is supported by four plywood circular disks and 1/4 -20 T-nuts bonded with construction grade adhesive and fastened to a variety of base structures with four 1/4 -20x1/2" thread-locking screws. The chair perimeter is designed such that it provides a feature to support backpacks or courier bags. Shells are available in wood grain laminates or solid laminates.

Underseat Structure

The shell is attached to an 11-gauge steel seat spider and cast aluminum height-adjust control. A single paddle under the seat operates the height adjusting pneumatic cylinder.

Base

Two five-blade base options are available: a reinforced black nylon base or a polished aluminum base.

Stools are equipped with an 18" diameter, adjustable-height footring made of die-cast aluminum with a chrome plated tubular steel ring and black "spokes."

Casters

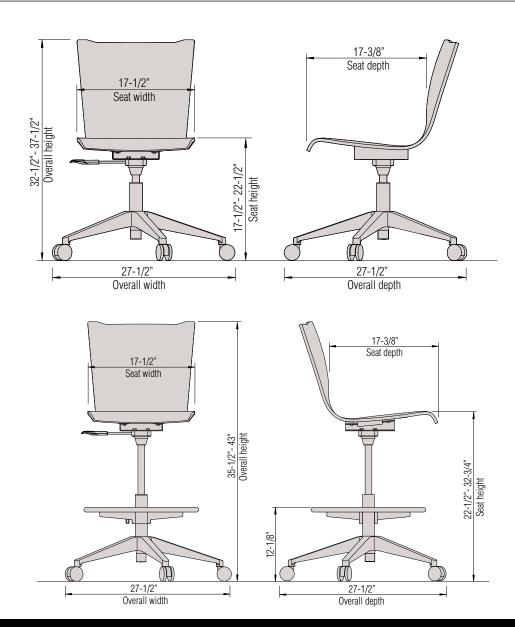

Casters are double-wheel, high-impact thermoplastic, available with hard or soft wheel surface. Casters, base, and cylinder are available in black.

Upholstered Seat

As an option, shells may be equipped with an upholstered seat pad. Urethane foam is attached to a formed plywood upholstery liner, then upholstered using a drawstring process. The foam is a nominal ½" thickness. The pad assembly is attached to the shell using 10-24 screws, engaging T-nuts in the liner.

Stacking Vinyl Upholstered Chairs

It is recommended that chairs to be stacked be covered in material other than vinyl as an impression in the seat may result. KI does not warrant the effects of stacking on stock or C.O.M. vinyl upholstery.

INFORMATION

C.O.M. Testing and ProductionRequirements

Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. Upholstered only and cushioned/upholstered chairs must be tested separately. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested. Customer's own vinyl cannot be used on this product.

Test samples must be sent to:

KI Attn: C.O.M. Specialist 1687 Westminster Drive - Gate 3 Green Bay, WI 54302

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Special Cost Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Special Cost Request.

Depth	25"	25"	25"
Back range	25 degrees (from 102 - 127 degrees)	25 degrees (from 102 - 127 degrees)	25 degrees (from 102 - 127 degrees)

SPECIFICATIONS

Constructed of a 1/2" thick, saddle-shaped plywood with 2-1/2" thick molded, highresilient foam and upholstered with fabric, vinyl, or leather. Back mesh material is PE elastomeric with polyester. The entire seat assembly is mounted to the mechanism by 4 screws.

Mechanism

Stamped steel dual housing forms a sturdy cradle for the seat. There is only one control lever which actuates the pneumatic cylinder with infinite selection within the range and locks the chair in an upright position. The synchrotilt mechanism adjusts the back and seat in a 2:1 free-floating mode.

Backrest

Nylon with fiberglass reinforced frame.

Back Height

Fixed height.

4D T-Arm (JR69)

Two-way adjustable width/height. Forwardslanting T-arms with ergonomic, maximummobility arm top (button-activated arm pad; 1" lateral, 2" forward and back, and diagonal adjustability.) Adjustable height range of 4.25". Adjustable width range of 1.75" each side.

Adjustable T-Arm (JR39)

Two-way adjustable width/height. Black molded urethane armcap. Adjustable height range of 4.25". Adjustable width range of 1.75" each side. Arm ships KD (same box as the chair) and must be installed on the chair (no tools required).

Fixed Loop Arm (KR48)

Black plastic arm.

Adjustable Loop Arm (KR72)

Black molded urethane armcap. 2.5" of height adjustment.

Adjustable K-Arm (KR200)

Two-way adjustable width/height. Black molded urethane armcap. Natural grip control. Adjustable height range of 2.75". Adjustable width range of 1" each side.

25" diameter, five-blade reinforced nylon base. Black only.

Casters

The double 55mm diameter black wheels are molded of high-impact thermoplastic and are housed in a high-impact frame. Carpet or hard floor casters are available.

SPECIFICATIONS

Seat

Seat is constructed of a molded polypropylene seatboard with 2-1/4" thick high-resilient foam molded directly onto it. The foam-covered board is upholstered with fabric. An integral "seat slide button" is attached to the underside of the board, which allows the seat depth to be adjusted from 16" to 19" for the chairs and 16" to 17-3/4" for the stool. A textured polypropylene seat shroud attaches to the bottom of the seat and permits access to the seat slide button. The entire assembly is mounted through slots in the mechanism that allow the seat to slide in and out.

Backrest

The backrest has the same basic construction as the seat except the textured polypropylene shroud is also available in an upholstered version. The back also includes an adjustment lever that allows the back to be raised or lowered 4" vertically along the J-bar.

Synchronized Knee Tilt Mechanism

A stamped and welded steel housing contains a set of torsion bars that supply the force to the mechanism. Controls include a back angle lock, tilt tension control and pneumatic seat height lever for both the chairs and the stool, but also a forward tilt lockout for the chairs. The seat is in a 2° reclined position. When the forward tilt lock is disengaged, the seat tilts to a 2° forward position. The back angle can be locked at three positions. The tension can be increased or decreased by turning the tension dial to set the desired amount of preset on the torsion springs. The seat height can be pneumatically adjusted from 16" - 20-3/4" on the chairs and 22" to 32-1/4" on the stools with infinite selection within the range. The plastic mechanism shroud and control handles match the color of the chair.

Engage® 24/7

J-Bar is constructed of GR50 steel.

Adjustable Armrests with Pivoting Armcaps (AA)

A curved and angled-forward arm support that is molded from reinforced nylon supports a height adjustable nylon sleeve that allows for 4" of vertical adjustment from 6" to 10" above the seat. The armrest height is adjusted by pressing a button mounted in the sleeve. The sleeve supports a self-skinning urethane armrest that pivots 360° from a point near the back of the armrest. The armrest has 4 detents that allow the armrest to snap into position, one straightforward, one each at 20° inward and 20° outward, and one at 180° reversed back position. The armrests are spaced 18-1/2" apart. All parts are color-matched to the other plastic parts of the chair. The nylon supports are bolted to the bottom of the mechanism with four 5/16" bolts and are field-installable.

Adjustable Armrests with Fixed Armcaps (HA)

A curved and angled-forward arm support that is molded from reinforced nylon, supports a height-adjustable reinforced nylon sleeve that allows for 4" of vertical adjustment from 6" to 10" above the seat. The armrest height is adjusted by pressing a button mounted in the sleeve. The sleeve supports a self-skinning urethane armrest. The armrests are spaced 18-1/2" apart. All parts are color-matched to the other plastic parts of the chair. The nylon supports are bolted to the bottom of the mechanism with four 5/16" bolts and are filed-installable.

Base

The 24" diameter (on chairs) and the 26" diameter (on stools), five-blade base is molded from reinforced nylon. A telescoping cylinder shroud conceals the pneumatic cylinder. All finishes match the chair color.

Poly Back Stool with Adjustable Arms (ENGSP/BL/AA)

Features		
Back Flex	•

SPECIFICATIONS

Underseat Structure

Support structure is die-drawn, 12-gauge steel plate. Fixed backrest mechanism structures are made from 1/2" diamter steel wire and attached by welding. Structure is finished with baked-on, electrostaticallyapplied, 30-degree gloss epoxy powder coating.

Arms

Optional cantilever arms are available. When equipped with arms, the supporting structure is 7/8° o.d. x 13-gauge tubular steel welded directly to the seat structure plate. The steel support tube is inserted into a socket moided into the armrest and secured with a screw. Armrests are molded from glass-reinforced nylon. Steel support tube and armcap color matches poly color. Diamond translucent poly has light tone arms; Pewter translucent has flannel arms; Bronze translucent has chocolate arms.

Backrest, Seat and Shroud

Injection molded polypropylene.

Backrest Articulation Mechanism

A pair of outer backrest supports formed from 1' diameter tubular steel are inserted into sockets molded into the backrest and secured with screws. The backrest assembly moves over molded thermoplastic slide bushings and is supported by steel coil springs. This mechanism allows the backrest to move through 15 degrees of movement, about an axis of rotation that is through the hips of the occupant.

Optional Upholstered Seat and Back

Urethane foam is attached to an injection-molded polypropylene liner board, then upholstered using a draw-string process. Seat foam is molded nominal 1" thickness and back foam is nominal 1/2" thickness. The fasteners that attach the back pad are color-matched to the polypropylene.

Base

26" injection-molded, glass-reinforced, nylon 5-blade base. A single paddle under the seat operates the height-adjusting pneumatic cylinder. Standard chair base and cylinder available in black or warm grey. Standard stool base available in black or warm grey. Standard stool cylinder available in black only. An optional polished die-cast aluminum base is available on both chairs and stools.

Base color selection for black includes; black base, black cylinder and black carpet or hard floor casters.

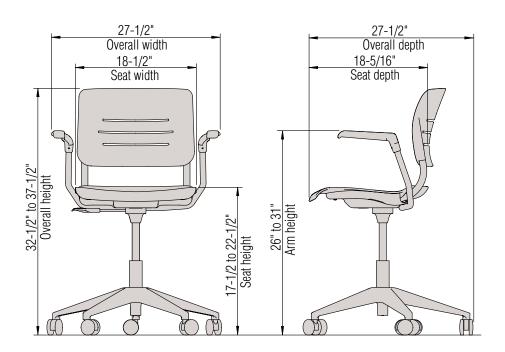

Base color selection for warm grey includes; warm grey base, warm grey cylinder and warm grey carpet casters. Stool cylinder is always black.

Base color selection for polished aluminum includes; polished aluminum base, black cylinder and black carpet or hard floor casters. Hard floor casters are black only.

Casters

Casters are double-wheel, high-impact thermoplastic available with hard (warm grey or black) or soft (black only) wheel surface.

INFORMATION

C.O.M. Testing and Production Requirements

Not all materials are suitable for upholstering this product. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI Attn: C.O.M. Specialist 1687 Westminster Drive - Gate 3 Green Bay, WI 54302

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Special Cost Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Special Cost Request.

Design

Designed by Giancarlo Piretti and manufactured in the USA by Krueger International, Inc. under license from Pro-Cord S.p.A

4D T-Arm (JR69)

Adjustable T-Arm (JR39)

Fixed Loop Arm (KR48)

Adjustable Loop Arm (KR72)

SPECIFICATIONS

Mechanism (KI62 and KI63)

A stamped steel dual housing forms a sturdy cradle for the seat. There are two control levers. One lever actuates the pneumatic cylinder, which adjusts the seat height with infinite selection within the range (Kl62). One lever locks the chair in several positions or actuates the free-floating mode. The synchronized 2:1 free floating mode has adjustments of 8° on seat and 16° on back.

Backrest (KI62 and KI63)

The injection molded plastic board has embedded inserts for mounting. The board is covered with contoured molded high-resilient foam and upholstered with fabric. A textured black shroud covers the rear side. An easy-to-operate mechanism is installed on the back board for adjusting the back height (3").

Backrest (KI60S)

The injection molded plastic board has embedded inserts for mounting. The board is covered with contour molded foam and upholstered with fabric. A textured black shroud covers the rear side.

Seat (KI62 and KI63)

Constructed of a 1/2" thick, saddle shape plywood with 2-1/2" molded high-resilient foam and upholstered with fabric. The entire seat assembly is mounted to the mechanism by four screws.

Seat (KI60S)

Constructed of a 1/2" thick, saddle shape plywood with 2-1/2" contour molded high-resilient foam, and covered with upholstered fabric.

Seat Slide (KI62 and KI63)

Double spring-loaded: side-mounted, easy-to-use control. Adjustment range of 3.1" (18" - 21.1")

Seat Height (KI62)

In addition to the standard height cylinder whose dimensions are shown above, there are two optional cylinders: Low Height: 16-3/4" - 19-1/2"

Tall Height: 20-1/2" - 26-3/4"

To select these optional cylinders, please see the "Options" section on the following page.

Memory Foam

Double layer of foam. Molded memory foam is layered over molded, high-resiliency foam. Seat only.

Pedestal Base (KI62 and KI63)

The 26" diameter, five-blade base is made of reinforced nylon. Black only.

Sled Base (KI60S)

The sled base is formed from 1-1/8" diameter, 13-gauge thickness steel tubing. Black only.

Carpet Casters (KI62 and KI63)

The double 55mm diameter black wheels are molded of high-impact thermoplastic and are

housed in a high impact frame. Hard floor casters are available.

Fixed Loop Arm (KR48)

Arm is black plastic.

Adjustable Loop Arm Option (KR72)

Black molded urethane armcap. Height adjustment of 2-1/2".

Adjustable T-Arm Option (JR39)

Height adjustment of 4-1/4" and width adjustment of 1-1/2" per side. Arm ships KD (same box as the chair) and must be installed on the chair (no tools required).

4D T-Arm (JR69)

Two-way adjustable width/height. Forward-slanting T-arms with ergonomic, maximum-mobility arm top (button-activated arm pad; 1" lateral, 2" forward and back, and diagonal adjustability.) Adjustable height range of 4.25". Adjustable width range of 1.75" each side.

UPHOLSTERY INFORMATION

C.O.M. Upholstery

C.O.M. requirement for 10 chairs or less with poly back is 1 yard (1-1/2 yds with memory foam) of 54" wide nondirectional fabric; upholstered or FR back, 1-1/2" yards of 54" wide nondirectional fabric. For orders of 11 or more chairs and for complete information on ordering C.O.M., see "Ordering C.O.M., C.O.V. and C.O.L." section.

OPTIONS

California TB133 Fire Safety Code

For California Technical Bulletin 133 compliant models, add the following upcharge:

Model=No Arm Added List Price=\$129

FR is also available on models with the Adjustable T-arm (JR39 arm). See Models KI62/FR39 and KI63/FR39 for pricing.

When FR version is ordered, the plastic back panel is upholstered (add upcharge). For C.O.M. yardage, see "C.O.M. Upholstery" note.

Optional Seat Height

The Task chair has 2 additional seat height options.

To select Low Height (16-3/4" - 19-1/2"), add CYL4 to the end of the model number.

To select Tall Height (20-1/2" - 26-3/4"), add IPCYL6SHD to the end of the model number.

Note: No additional leadtime or upcharge required.

4D T-Arm (JR69)

Adjustable T-Arm (JR39)

Fixed Loop Arm (KR48)

Adjustable Loop Arm (KR72)

SPECIFICATIONS

Mechanism (KI74, KI75 and KI78)

Stamped steel dual housing forms a sturdy cradle for the seat. There are two control levers. One lever actuates the pneumatic cylinder. One lever locks the chair at several positions or actuates the free-floating mode. The synchronized 2:1 free-floating mode has adjustments of 8° on seat and 16° on back.

Backrest (KI74, KI75, KI78 and KI71S)

Nylon with fiberglass reinforced frame. Back mesh material is polyethylene elastomeric with polyester.

Back Height (KI74 and KI75)

An easy-to-operate mechanism is installed on the back board for adjusting back height 3".

Headrest (High Back)

Headrest is black leather with adjustable height and angle.

Seat Slide (KI74, KI75 and KI78)

Double spring-loaded: side-mounted, easy-to-use control. Adjustment range of 3.1" (18" - 21.1").

Seat (KI74, KI75 KI78 and KI71S)

Constructed of a 1/2" thick, saddle-shaped plywood with 2-1/2" thick, molded, high-resilient foam and upholstered. The entire seat assembly is mounted to the mechanism by 4 screws.

Seat Height (KI74 and KI78)

In addition to the standard height cylinder whose dimensions are shown above, there are two optional cylinders:
Low Height: 16-3/4" - 19-1/2"
Tall Height: 20-1/2" - 26-3/4"

Memory Foam

Double layer of foam. Molded memory foam is layered over molded, high-resiliency foam. Seat only.

To select these optional cylinders, please see

the "Options" section on the following page.

Base (KI74, KI75, and KI78)

26" diameter, five-blade reinforced nylon base. Black only.

Sled Base (KI71S)

Sled shape, 1-1/8" diameter steel tube of 13-gauge steel. Black only.

Carpet Casters (KI74, KI75 and KI78)

The double 55mm diameter black wheels are molded of high-impact thermoplastic and are housed in a high-impact frame. Hard floor casters are available.

Adjustable T-Arm (JR39)

Black molded urethane armcap. 4-1/4" of height adjustment and 3" of total width adjustment. Arm ships KD (same box as the chair) and must be installed on the chair (no tools required).

Adjustable Loop Arm (KR72)

Black molded urethane armcap. Height adjustment of 2-1/2".

4D T-Arm (JR69)

Two-way adjustable width/height. Forwardslanting T-arms with ergonomic, maximummobility arm top (button-activated arm pad; 1" lateral, 2" forward and back, and diagonal adjustability.) Adjustable height range of 4.25". Adjustable width range of 1.75" each

Fixed Loop Arm (KR48)

Arm is black plastic.

SPECIFICATIONS

Seat

Dual molded urethane foams and plywood seat board are upholstered using a drawstring method and finished with a black plastic under-shroud.

Mechanism

A self-weighing mechanism passively adjusts backrest tilt tension based on occupant weight. The mechanism is made of stamped steel with a black plastic trim cover. One lever operates the height-adjust cylinder. A second lever allows the backrest tilt mechanism to move freely or locks it in one of four positions.

Backres

A reinforced black nylon frame with mesh insert.

Armrests

Optional height-adjustable arms (2 -1/2" range) are molded in black reinforced plastic with molded black polyurethane arm caps.

Armrests mount directly to the seat board.

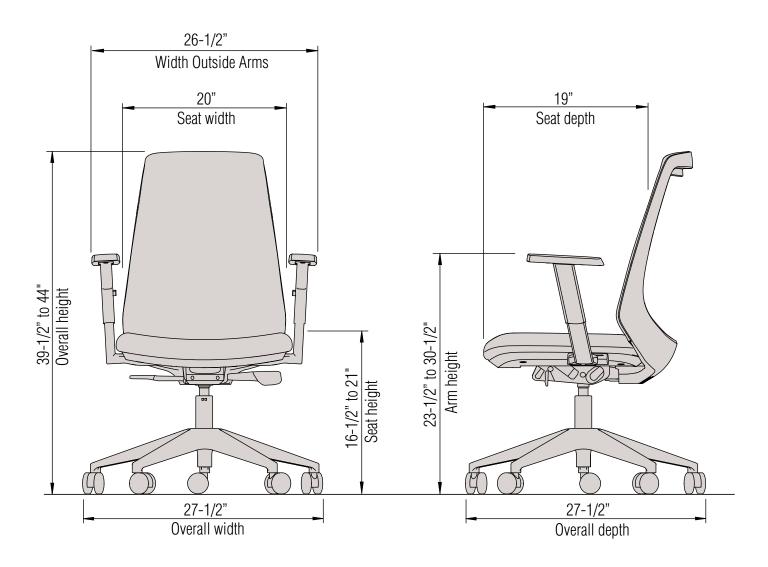

Base

26" Diameter, 5-blade base made from reinforced black nylon.

Casters

Dual-wheel carpet casters are molded in reinforced plastic.

Oath Task Chair

Easy adjustments optimize ergonomic comfort

Lumbar Support - built-in lumbar support automatically adjusts to the user for comfort.

Seat Height - To lower, lift
the lever while seated - to raise,
lift the lever with your weight off
the seat. Proper seat height allows your
feet to be firmly supported by the floor hips will be parallel to or slightly above
your knees.

300 Pound Weight Rating - chair tested to 300 pound weight rating for increased strength.

Back Tension - weight-activated motion is designed to adjust the recline tension as you move - when you recline, the seat lifts your weight and provides the correct amount of tension.

Arm Height - push button (located inside arm support) to raise and lower the height of the armrests to support forearms and keep shoulders relaxed.

Back Position - push lever backward to unlock the back tilt position and move freely. Push lever forward to lock the back in one of four upright positions.

SPECIFICATIONS

Seat

Seat is constructed of 5/8" thick, 10-ply plywood with one solid steel reinforcement plate that spans from seat edge to seat edge and 3.75" thick molded foam. The steel reinforcement plate has welded steel t-nuts for arms and mechanism. The contoured molded foam-covered board is upholstered with fabric. The front edge of the seat has a waterfall design. The seat is attached to a seat mechanism with four 5/16" screws into steel welded t-nuts.

An integral seat slide is attached to the under side of the seat board which allows the seat depth to be adjusted from 17" to 19-1/2". A black dust cover fabric shrouds the seat slide. The seat slide assembly is mounted to steel attachment brackets in the mechanism and seat plate that allow the seat to slide in and out.

Seat Mechanism

Chair features infinitely locking back angle, and tilt rocking.

Pneumatic Height Adjustment

Chair features pneumatic seat height adjustment from 18" to 23".

Backrest (vertically adjustable)

Backrest is constructed of 1/2" thick 9-ply plywood and 2-1/2" body-contoured molded foam. The outer back shell is upholstered plywood. The backrest is attached to a five-position ratcheting mechanism that provides 4" of vertical adjustment along a 1/4" thick x 4" wide high-strength steel J-bar. The J-bar is fastened directly to the seat mechanism with three 5/16" bolts.

T-Arms

Adjustable, heavy-duty arms have 2-3/4" vertical travel (from approximately 10" - 12-3/4" above the seat). There is 1-1/4" of width adjustment per side or 2-1/2" width adjustment total.

Loop Armrests

Main armrest support is made of 1/4" thick by 2-1/4" wide bent steel constructions. Armrests are attached to a solid steel reinforcement plate that spans from side to side and which is mounted to the seat board for increased arm strength. Armrest pads are self-skinning soft urethane material with steel inner structures. Loop arms are fixed height.

Base

Extra-wide 27" five-blade base constructed of heavy-duty composite. The center of the base has a patented non-slip ring where the pneumatic cylinder is mounted. A telescoping cylinder shroud conceals the heavy-duty pneumatic cylinder.

Casters

Heavy-duty 55mm diameter double wheels are molded of high-impact plastic with steel stud.

General Information

INFORMATION

C.O.M. Testing and Production Requirements

Not all materials are suitable for upholstering this product. A 2-1/2 yd x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage maybe requested.

Test samples must be sent to:

Pilot Attn: C.O.M. Department 1110 S. Mildred Ave. Ontario, CA 91761

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Special Cost Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Special Cost Request.

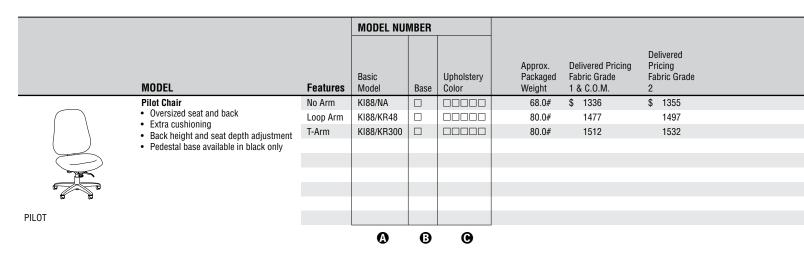

Assembly Ship knocked-down (KD). Minimal assembly required.

SPECIFICATIONS

TASK CHAIR

Backrest and Mesh Seat

Reinforced nylon frame with mesh material. SoSoft mesh material is made from 65% polyester and 35% nylon. Integral polypropylene lumbar support mechanism is easily adjusted by the user within a 3" range.

Mechanism

Stamped steel mechanism provides for sturdy seat and back mounting. Height-adjustable pneumatic cylinder is actuated by a control lever beneath the seat. Seat height adjusts from 18-1/4" to 22-1/4". Back lock mechanism provides five back positions. Tension control knob adjusts the tension recline force. Spring-loaded seat slide mechanism controls seat depth adjustment in five positions through a distance of 1-1/2" and is side mounted for easy use. Synchronized 2:1 seat/back tilt mechanism has movement of 8 degrees on seat and 16 degrees on back.

Base

Standard 26" diameter, five-blade reinforced nylon base, black only. Optional 26" diameter polished aluminum five-blade base.

Casters

Double 65mm diameter black wheels are molded of reinforced plastic. Hard floor or carpet casters available.

Adjustable T-Arm

Black molded urethane armcap. Armcaps move forward/backward in five positions through 1-1/2". Armcap width adjusts in five positions through 1". Arm support width can be set between 18-1/2" - 19-1/2" at assembly. Armrest height adjusts to 11 positions through 2-3/4". Armcaps rotate in three positions (+/- 20 degrees).

Weight Capacity

Passes all BIFMA x 5.1-2011 and KI's internal standard for 300 pound capacity.

GUEST CHAIR

Backrest and Mesh Seat

Reinforced nylon frame with mesh material. SoSoft mesh material is made from 65% polyester and 35% nylon. Backrest and seat secured to frame with four bolts each.

Upholstered Seat

Plywood seat structure with two layers of polyurethane foam with a fabric cover held in place with staples.

Frame

Tubular steel frame made with .08" thick x 1.32" x .88" oval steel tubing.

Arms

Arms are integral to the frame with a black molded reinforced nylon armcap.

Glides

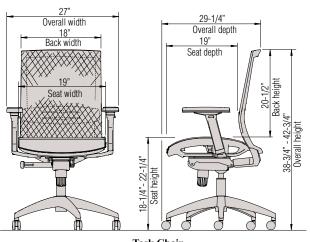

Four nylon glides.

Weight Capacity

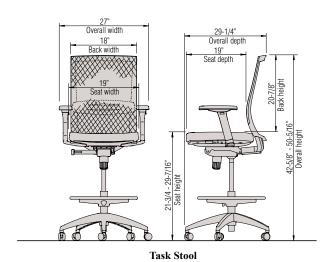

Passes all BIFMA x 5.1-2011 and KI's internal standard for 300 pound capacity.

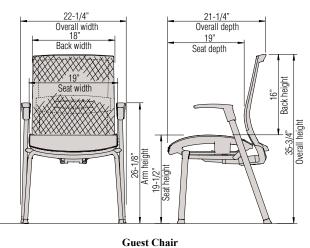

TASK STOOL

In addition to the standard height unit described under the Task Chair, a stool height version is available. Stools are equipped with a pneumatic cylinder allowing adjustment of seat height from 21-1/2" - 29". The 18" diameter adjustable footring is made of die-cast aluminum with a chrome-plated tubular steel ring and black "spokes." Stools are available with plastic or polished bases.

Armless Task Stool (SPSNAU)

Features		
Poly, upholstered seat, or upholstered seat/back	•	•
Flex back	•	•
General Dimensions		
Seat width	18"	18"
Seat depth	18"	18"
Seat height (upholstered - add 1")	17-1/4" - 22-1/4"	22-1/4" - 32-1/2"
Overall Dimensions		
Width	27-1/2"	27-1/2"
Depth	27-1/2"	27-1/2"
Height	32-3/4" - 37-3/4"	37-3/4" - 48"
Arms to floor	26" - 31"	

SPECIFICATIONS

Seat

Injection molded polypropylene attached directly to the structure.

Underseat Structure

Support structure is die-formed, 13-gauge steel welded to a 1" o.d. x 14-gauge tubular steel crossmember.

Δrms

When equipped with optional cantilevered arms, the supporting structure is 7/8" o.d. x 13-gauge tubular steel, welded directly to the seat support structure. The armcaps are injection molded nylon and are attached to the steel structure by means of screws. Both the steel tube arm support and the armcaps will match the color of the poly seat and back.

Backrest

Injection molded polypropylene with integral steel cantilever springs. The combination of

the slotted polypropylene back and the spring steel provides a supportive flexing back. Springs are nominal 4.5mm diameter chrome silicon valve spring wire.

Base

26" injection-molded glass-reinforced nylon 5-blade base (black or warm grey available on chair or stool). Casters have high-impact thermoplastic double wheels. A single control paddle under the seat operates the height-adjusting pneumatic cylinder.

Base color selection for black includes; black base, black cylinder and black carpet or hard floor casters.

Base color selection for warm grey includes; warm grey base, warm grey cylinder and warm grey carpet casters (hard floor casters not available in warm grey).

Stool cylinder is always black.

Casters

Double wheels of high-impact thermoplastic. High-impact plastic frame. Casters are monochromatic with base. Carpet or hard floor casters offered. Hard floor casters are black only.

Frame Finishes

Baked-on, electrostactically-applied 45° gloss epoxy powder coating.

Optional Upholstered Seat or Seat & Back

Molded urethane foam is attached to an injection molded polypropylene seat board, then upholstered using a draw-string process. The assembled seat pad is attached to the seat by means of hidden fasteners.

Task Stools

In addition to the standard height unit described above, a stool-height version is available. Stools are equipped with a pneumatic cylinder allowing adjustment of seat height. The 18" diameter adjustable-height foot ring is made of die-cast aluminum with a chrome-plated tubular steel ring and black "spokes."

Depth	24"	
Height	31-3/4" - 36-3/4"	
Width with arms	26-1/2"	
Width with no arms	24"	
Top of arm to floor	24-3/4" - 29-3/4"	

SPECIFICATIONS

Seat and Backrest

Seats and backrests are molded compound curved polypropylene with a textured finish. Seat is two-piece construction. Upholstered chairs have partially exposed polypropylene surfaces. Fabric is upholstered over 9/16" foam on the backrest and 15/16" on the seat for stack chairs. Fabric is upholstered over 1-1/2" foam on the seat for pedestal chairs.

Backrest Supports

Two die-cast aluminum backrest supports attach the backrest to the Torsion® mechanism. A steel tube is cast into each backrest support for added strength.

Armrests

A tubular steel frame supports self-skinning urethane armrests. The support is bolted to the seat underside and powder coated to match other hard surface elements. Arms are field-installable.

Torsion® Mechanism

The back flex is achieved by the Torsion® mechanism. It consists of two flat torsion springs captured at both ends by brass bushings which in turn engage with the backrest supports. The Torsion® mechanism creates gradually increasing resistance over the full 12° of back flex.

Pedestal Base

24" injection-molded glass-reinforced nylon, five-blade base for task. 26" for stool.

Caster

Double wheels of high-impact thermoplastic. High-impact plastic frame. Casters are black.

Adjustable Stool (TPSNAPSH)

INFORMATION

C.O.M Testing and Production Requirements

Not all materials are suitable for upholstering this product. A 3/4 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI Attn: C.O.M. Specialist 1687 Westminster Drive - Gate 3 Green Bay, WI 54302

Fabric Disclaimer

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Special Cost Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Special Cost Request.

Design

Designed by Giancarlo Piretti and manufactured in the USA by Krueger International, Inc. under license from Pro-Cord S.p.A. Task chairs and task stools ship knockdown. Minimal assembly is required.

SPECIFICATIONS

Seat and Backrest

Seat is a two-piece construction with a molded polypropylene liner with a molded compound curved polypropylene shroud with a textured finish. Seat is always upholsted. Foam (1-1/2") is applied to the molded polypropylene liner. Fabric is then upholstered over the foam. Backrest frame is molded glass-reinforced nylon. Mesh fabric is 100% polyester. Seat and backrest are field-replaceable.

Torsion Mechanism

The back flex is achieved by the torsion mechanism. It consists of two flat torsion springs captured at both ends by steel bushings that are welded to the backrest supports. The torsion mechanism creates gradually increasing resistance over the full 12° of back flex.

Back/Arm Supports

Two welded steel backrest supports attach the backrest to the torsion mechanism. If so equipped, optional armrest structure is integral to the backrest support. Arm caps are polypropylene and are field-replaceable.

Pedestal Casters

Double wheels of high-impact thermoplastic. High-impact plastic frame matches chair

Pedestal Base

26" injection-molded, glass-reinforced nylon 5-blade base. Base and cylinder are available in black. An optional polished die-cast aluminum base is available on both chairs and stools.
