# CertaWrap™

Weather Resistant Barrier

## The Smart Choice for Stucco

CertaWrap Weather Resistant Barrier is engineered for superior performance behind stucco facades, EIFS and other synthetic stucco systems. An ideal defense against mold, mildew and water damage, CertaWrap provides:

- Optimal Water Vapor Permeance
- Outstanding UV Performance
- Excellent Air Holdout
- Superior Water Holdout

## Proven Performance in Independent Tests

Independent tests prove the effectiveness of CertaWrap for stucco applications. Four application options were tested, using either one or two layers of CertaWrap and water pressure testing from 0.0 to 580 Pa. The result: Zero signs of leakage. No stucco adherence to the CertaWrap material.

## Professional Solutions

CertaWrap offers the job-site advantages of double-strength tear resistance, and the patented CertainTeed STUDfinder™ system, a built-in guide for accurate nailing. Although one layer provides an effective moisture barrier, the use of two layers of CertaWrap is required where codes are applicable.

## The CertainTeed Commitment

For homeowners, CertaWrap Weather Resistant Barrier provides peace of mind. An environmentally friendly product, CertaWrap is made from recycled materials. And, it's backed by a Lifetime Limited Warranty and additional 10-year SureStart™ coverage.
